

# Public Health Laboratory

The Public Health Laboratory is a microbiology facility specialising in bacterial testing of water and food samples.

NATA accreditation is available for a wide range of tests. The scope of accreditation can be found at <http://www.nata.asn.au>. The laboratory accreditation number is 1785.

If you require testing, contact the laboratory to discuss your requirements and receive sampling instructions.

Appropriate sampling containers are ESSENTIAL and are provided by the laboratory. A price schedule is available upon request.

Contact details.
