

# Quality and Safety Standards Framework

## Fact Sheet 3: Supporting Organisations

The Quality and Safety Team, Office for the Community Sector acknowledges that community sector organisations may require support to implement the Standards Framework. We are committed to doing all we can to assist all Agency funded community sector organisations.

Implementation of the Standards Framework will include:

- training and education to complete the *Self Report*;
- targeted training where need is identified;
- attendance at meetings of boards of management;
- provision of training and information packages;
- provision of direct and indirect individual organisational support; and
- flexible and interactive methods for training and information.

It is intended that the usual centre-based forums will be limited; maximising the use of on-line, workplace based and self directed training and information packages. Within the modest resources of the Office for the Community Sector, there may be instances whereby we are able to negotiate with organisations to assist with backfilling direct service delivery positions if staff are to attend training related to the Standards Framework.

For any further information regarding the Quality and Safety Standards Framework, please contact the Quality and Safety Team on:

(03) 6336 4132
