Prescribe for self	No restriction under the Act		Self-prescribing prohibited R.15(4)	
Number of items per prescription	No restriction under the Act		One preparation only R.15(7)(ab)	
Emergency supply (no prescription)	3 days' supply only R.48(b)(i), or unit pack R.48(b)(ii) also see ³	No supply without prescriber's authority R.18	No supply without prescriber's authority R.18	
¹Repeat Intervals R.23(5)-(7) & R.46(3)-(5)	<p>Where the prescription is for a narcotic substance and the dispensing of the prescription is authorised to be repeated, the minimum intervals at which it may be dispensed must be handwritten on the prescription by the prescriber. Where the prescription is for a declared restricted substance and the dispensing of the prescription is authorised to be repeated, the minimum intervals at which it may be dispensed must be indicated on the prescription by the prescriber. If this has not occurred, the pharmacist may do one of the following –</p> <p>(1) dispense original supply only, then cancel script;</p> <p>(2) contact prescriber for further instructions;</p> <p>(3) if the script has specific dose directions, calculate when new supply required and allow up to 4 days before that date. In the case of (2) and (3), the pharmacist is to write on script how minimum interval was ascertained, and sign and date the script.</p> <p>In the case of (3) where a pharmacist is dispensing a repeat, the due date for dispensing should be calculated using the date of first supply (not the date of the dispensing of the previous repeat).</p> <p style="text-align: center;">NB All directions, including the repeat interval MUST be handwritten by the prescriber</p>			
²Retaining S8 repeats R.23(2)	<p>All repeats must be retained by pharmacy where they were first dispensed. If a patient requests a transfer to another pharmacy the pharmacist must seek verbal or written authorisation from dhhs.tas.gov.au/psbtas</p>			
³Supply without prescription	<p>The following Regulations also apply:</p> <p style="text-align: center;">R.43 Emergency prescribing and dispensing of restricted substances R.43A Continued dispensing without prescriptions in specified circumstances R.49 Supply of restricted substance in a medical institution</p>			
Verifying S8 R.24(1)	<p style="text-align: center;">Authenticate the validity of the prescription, or provide 2 days' supply only until validity can be confirmed</p>			
Recording all prescriptions R.46(8)(c)	<p>All prescriptions must be recorded (including those containing unscheduled substances) in an appropriate recording system and the record retained for 2 years</p>			
Marking prescriptions R.46(8)(a)(d) and R46(12)(a)(b)	<p style="text-align: center;">NB for PBS scripts, mark the duplicate. The prescription must be labelled with the following:</p> <p style="text-align: center;">Date and signature of the pharmacist at each supply Address of dispensary and name of seller Identification code (numbers, letters) to match each label and prescription record At last supply, mark 'CANCELLED' and retain for 2 years</p>			
Repeats and quantity	<p style="text-align: center;">The Regulations do not specify any limits on number of repeats or quantity of drug</p>			
Schedule 3 substances	<p style="text-align: center;">Pharmacy must be identified on Schedule 3 items. R.53(4)</p>			
Narcotic Storage R.25	<p>All narcotic storage must comply with R.25. A "day safe" is allowed during the hours a pharmacy is open. The 'day safe' must be capable of being securely locked when not in use. The key must be retained by the pharmacist so no other person has access. The contents of the 'day safe' must be stored in the approved safe when a pharmacist is not onsite.</p>
