2011 INFECTION PREVENTION & CONTROL LIAISON PROGRAM

The 2011 Liaison Program is aimed at staff who have attended in previous years in order to expand their infection control knowledge base.

It is preferable but not essential for attendees to have participated in previous years.

PROPOSED TOPICS FOR 2011:

- The 2010 Australian Guidelines For The Prevention And Control Of Infection In Healthcare
- Clostridium difficile - the facts (background & management)
- Interactive Session 1
- Surveillance
- Hand Hygiene Program – a look at 18-months in Tasmania
- Interactive Session 2

PURPOSE AND AIMS OF LIAISON PROGRAM

To provide infection prevention and control training for healthcare workers with the focus on delegates from healthcare services such as rural hospitals, community health clinics and community nursing services.

The aim of the training is to develop the knowledge of nominated individuals and empower them to disseminate information / training in their workplace. Through involvement in the Liaison Program these individuals will establish a rapport with the Tasmanian Infection Prevention & Control Unit therefore acting as the liaison person within their health service.

It is preferable but not essential for attendees to have participated in previous years.

Spaces are limited and therefore preference will be given to Department of Health & Human Service staff and DHHS staff who have attended previous “link practitioner” training days (2008/2009). A limited number of non DHHS staff will be able to attend.

CONTACT DETAILS:

Tasmanian Infection Prevention & Control Unit (TIPCU)
Ph: (03) 6222 7779
Email: tipcu@dhhs.tas.gov.au
