## Executive Summary

The Tasmanian Role Delineation Framework (TRDF) and Clinical Services Profile (CSP) is the principal, government endorsed clinical service planning document for Tasmania’s public health system.

The TRDF and CSP strategic importance to the health system and how it can be best used by Service Providers and Planners is reflected in the figure below:

<table>
<thead>
<tr>
<th>Why is the TRDF and CSP important?</th>
<th>TRDF - A planning tool which provides a means to describe health service levels in order to identify and document the minimum support services, safety standards, skills and competencies, networking arrangements, and other service requirements.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Provides a means to categorise the acuity level of services required to meet the health needs of the population and is a useful tool to inform planning and development of services.</td>
</tr>
<tr>
<td></td>
<td>• CSP - Delineates service levels at each site to ensure safe and sustainable services are being provided to the community based on the needs of the population.</td>
</tr>
<tr>
<td>How is the TRDF/CSP used by Service Providers?</td>
<td>• Expanded to include rural inpatient facilities with designated inpatient beds, which also incorporates the Multi-Purpose Centres (MPC) and Multi-Purpose Services (MPS).</td>
</tr>
<tr>
<td></td>
<td>• In this iteration of the TRDF and CSP (V4.0) the primary and community care services have been given a generic description (refer pages 200 – 203) that play a vital role in providing referral pathways, health prevention, health promotion and primary health treatment close to where people live.</td>
</tr>
<tr>
<td>TRDF/CSP (V4.0) 2018 extension</td>
<td>• To delineate all clinical service providers of the Department into this framework (including private service providers).</td>
</tr>
<tr>
<td></td>
<td>• To articulate the full continuum of care to support cross sectoral (integrated) models of care and service delivery.</td>
</tr>
<tr>
<td>Future Direction of the TRDF/CSP</td>
<td>• Create the opportunity for the Department to be more sophisticated in its purchasing intent, and able to purchase community and primary care based services.</td>
</tr>
</tbody>
</table>
**Introduction**

The Tasmanian Government outlined its ‘One State, One Health System, Better Outcomes’ reform agenda through the release of a White Paper – *Delivering Safe and Sustainable Clinical Services* in June 2015, recognising the importance of a single state-wide health system where service delivery is aligned with community needs.

The White Paper states that it focuses heavily on Tasmania’s four major acute hospitals, but does highlight the role and importance of the other parts of the health system, including the rural hospital facilities and the primary and community care sectors.

For the most part, services currently described in the TRDF and being delivered will not change. However the 2018 TRDF and CSP extension includes the delineation of services into the rural inpatient facilities which will ensure the health system provides safe and more sustainable services within the resources currently available.

At the centre of many Tasmanian rural and remote communities is the local rural/district hospital or health centre. Local communities usually have a high level of support for these facilities. They provide necessary infrastructure to ensure appropriate health services that are safe and sustainable, and are provided close to people’s homes.

Role delineation can guide hospitals and health facilities within a state wide health system to plan and develop their services to the level that is necessary to meet the needs of the Tasmanian population, thus ensuring services are configured for quality care, while also improving access to better quality care.

The expansion of the Tasmanian Role Delineation Framework (TRDF) and Clinical Services Profile (CSP) provides a future planning framework to articulate service delivery requirements between health sectors. This framework will enable each clinical specialty to provide a safer patient transition along the full continuum of care (figure below).

**The level of care continuum**
Understanding the TRDF and CSP

The process of role delineation recognises that for each level of clinical service provision, a corresponding level of clinical support services and staff profile are required to ensure services are delivered in a safe, efficient and appropriate manner.

When applied across the state, a consistent set of minimum standards and requirements for clinical services will safeguard patient safety and facilitate clinical risk management in public health services.

TRDF

The TRDF is a planning document and its role is to describe the minimum support services, safety standards, skills and competencies, networking arrangements, and other service requirements necessary to provide a service at a specific level to ensure safe and appropriately supported clinical service delivery.

In short, the TRDF is responsible for delineating the level of clinical services, not the facilities themselves (this is achieved through the CSP).

The Role Delineation Framework consists of:

- **Core Clinical Services**
- **Clinical Support Services** which include Anaesthetics, Intensive Care Unit/High Dependency Unit/Close Observation Unit, Medical Imaging, Pathology and Pharmacy.

Core Clinical Services and Clinical Support Services are generally categorised into six levels of service provision with increasing acuity as described in the diagram below. The role delineation service levels are cumulative and build on each previous level’s capability requirements. It is intended that there is a level of flexibility between the margins of the levels.

Where a clinical service has no level description service, it does not mean no primary or community care services are currently being provided or co-ordinated (including outreach and outpatient services). It means no formal THS network or service provision at these levels can currently be delineated as these services are being delivered by a range of providers.
CSP

Whereas the TRDF delineates services, the CSP function is responsible for delineating which clinical services and clinical support services will be delivered at each site.

The CSP level assigned to each hospital needs to be read in conjunction with the level of acuity outlined in the TRDF.

White Paper states’ changes to the clinical service profile of major acute hospitals will not be implemented until they are able to be integrated into the development of services across the State and are adequately resourced and planned\(^1\).

Further, as part of this process the THS was to develop an implementation framework for the CSP by the 30 September 2015 which addressed, among other things, ‘the timeframes for implementing the changes to the clinical service profile\(^2\).’ This reflected the Government’s intention not to set timeframes themselves for implementing changes to the CSP in recognition of the fact that ‘the reforms outlined in this document will take a number of years to fully implement\(^3\).

Updates to the TRDF and CSP

The TRDF does not describe all services that could be provided by acute or rural hospitals, only the most common ones. Further, future service role delineation levels may evolve over time in response to changes in Models of Care or population needs.

The Department of Health (DoH) has developed a process whereby proposed changes to the TRDF and CSP are approved via a transparent and streamlined process with three levels of potential escalation depending on the extent of changes proposed.

The final decision will be made taking into account the strategic purchasing directions of the DoH as system manager and purchaser. Any approved additional service frameworks will be included and reflected in the next iteration of the TRDF and CSP.

How to use the Role Delineation Framework (example below)

Level 2 Respiratory and Sleep Medicine

A Level 2 service provides inpatient management of low-acute respiratory conditions, under the management of a registered medical practitioner.

Service requirements
- Basic patient monitoring including oximetry
- Provides on-site oxygen therapy
- May have access to allied health services
- Management and appropriate referral to a higher level Respiratory and Sleep Medicine service, including network access to specialist support

Workforce requirements
- Access to a registered medical practitioner or a GP
- On-site RN; RNs may be supported by ENs in providing care
- May have access to respiratory nurses and physiotherapists

Determining level of service
This box indicates the level of service for Respiratory and Sleep Medicine in New Norfolk Hospital at 2017/18
How to use the Clinical Service Profile Matrix (example below)

Indicates current delineation allocated
Indicates the health facility
Indicates the maximum approved level the facility can provide
Reflects the Government’s decision as the White Paper Reform 2015
Indicates that as of July 2015 the Mersey was providing a Level 4 Acute Stroke Service
Indicates the core clinical service
Indicates that the RHH will increase to a Level 5 service as per the White Paper Reform 2015

Indicates that as of July 2015 (White Paper Reform) the RHH provided a Level 4 Child and Adolescent mental health acute inpatient service

+ The service is not currently a statewide service, however if the service provider (THS) makes a decision to establish a statewide service in accordance with the described TRDF, the clinical service profile levels will need to be delineated and allocated for each facility and agreed by the Department as system manager. Funding will thus be allocated via the subsequent Service Plan.

*Where a significant increase in service level has been delineated which may require design specification, tendering, completion and commissioning of capital works, the DoH understands that some time is required for this development and planning intervals have been adjusted to reflect this.
Clinical Services Profile Matrix

The Clinical Services Profile matrix below provides the current and approved clinical service acuity levels for clinical services at each of the four acute hospitals and 13 rural inpatient facilities based on an assessment of current service and workforce requirements, and clinical support services available at each site.

The following symbols are referenced in the CSP matrix on the next page

* Service provided by private provider (in full or part)

***Palliative Care service level is determined by the National Palliative Care Role Delineation Framework

+ Service not currently provided statewide

Role Delineation Framework

Clinical Support Services

Clinical Support Services are those services which are essential to the safe, appropriate and quality provision of Clinical Services.

For the purposes of this Framework, Clinical Support Services comprise: Anaesthetic, Intensive Care Unit/High Dependency Unit/Close Observation Unit, Medical Imaging, Pathology, and Pharmacy.
Anaesthetics

Anaesthetic services are provided by a multidisciplinary anaesthetic and anaesthetic-assistant workforce with a range of skills in providing procedural and operative anaesthesia. Anaesthetics may be delivered by anaesthetic senior medical practitioner or appropriately credentialled registered general medical practitioners in health centre settings through to large tertiary referral hospitals.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Anaesthetics
No Level 1 service currently described.

Level 2 Anaesthetics

Service description
A Level 2 service generally provides analgesia/minimal sedation performed by a registered medical practitioner credentialled to provide anaesthetic services.

Service requirements
- Formal network linkages with specialist anaesthetist for consultation
- Registered medical practitioner or GP to provide analgesia/minimal sedation
- Some anaesthetic drug supplies on imprest

Workforce requirements
- Workforce staffing IAW PS9\textsuperscript{4}
- Registered medical practitioner or GP credentialled to provide anaesthetic services.
- Access to specialist anaesthetist for consultation

Level 3 Anaesthetics

Service description
A level 3 service provides low to medium-risk local anaesthetics, neuraxial block and regional block for low to medium anaesthetic risk patients undergoing Surgical Complexity I (SCI) and Surgical Complexity II (SCII) procedures.

Low to medium-risk general anaesthetics are provided to patients (ASA 1-3) undergoing Surgical Complexity III (SCIII) procedures (refer to General Surgical role delineation framework).

Service requirements
As for Level 2 plus:
- At least one operating/procedure room with separate on-site, dedicated recovery area/room for post-operative care

\textsuperscript{4} PS09 Guidelines on Sedation and/or Analgesia for Diagnostic and Interventional Medical, Dental or Surgical Procedures, Australian and New Zealand College of Anaesthetists.
- Access to Level 4 or above Intensive Care Unit (ICU) (may be off-site)
- On-site emergency service able to stabilise and transfer patients that experience deterioration
- Elective anaesthetic services are generally provided during business hours for regularly scheduled lists
- On-site medication

**Workforce requirements**

As for Level 2 plus:
- RN with experience/post graduate qualifications in anaesthetic nursing

**Level 4 Anaesthetics**

**Service description**

A Level 4 service provides all Level 3 services plus general anaesthetics on moderate to high anaesthetic risk patients (ASA 1-4) undergoing SCIII to Surgical Complexity IV (SCIV) procedures. Anaesthesia is administered by a specialist anaesthetist.

**Service requirements**

As for Level 3 plus:
- 24 hour access to perioperative services where emergency services are provided
- Broad range of day and general surgery and some specialty surgery
- More than one theatre
- High-dependency or ICU (24 hour ventilation capability) on-site
- On-site pathology, diagnostic and medical services

**Workforce requirements**

As for Level 3 plus:
- Specialist anaesthetists on-site
- Specialist anaesthetists on-call 24 hours
- Anaesthetics registrar on-call 24 hours

**Level 5 Anaesthetics**

**Service description**

A Level 5 service provides services at Level 4 plus surgery is performed on low to high anaesthetic risk patients (ASA 1-4) undergoing Surgical Complexity V (SCV) procedures. Generally, a combination of procedures with a moderate to high level of complexity and risk are performed, and management of some patients with comorbidities and risk of intra- and post-operative complications occurs. Anaesthesia is administered by a specialist anaesthetist with support from anaesthetic registrars.
## Service requirements

As for Level 4 plus:

- Provides emergency anaesthetic services
- Network referral role
- Has an active research role
- On-site cardiac medicine, cardiac care unit

## Workforce requirements

As for Level 4 plus:

- Specialist anaesthetist on 24 hour roster for low, moderate and high risk patients

## Level 6 Anaesthetics

### Service description

A Level 6 service manages the highest level of anaesthetic risk in a range of specialties in conjunction with the most complex surgical and medical presentations that have a high level of complexity or risk to patients with an extensive range of comorbidities requiring specialist staff.

### Service requirements

As for Level 5 plus:

- Procedural/operative anaesthesia performed on patients with high potential for intra- and post-operative complications
- Sub-specialty paediatric, cardiothoracic, neurosurgical, obstetric and trauma/retrieval anaesthetists
- Credentialed paediatric and cardiac sub-specialty anaesthetists

### Workforce requirements

As for Level 5 for:

- Anaesthetic registrar on-site 24 hours
- Broad range of surgical sub-specialties services on-site and available at close proximity 24 hours
Intensive Care Unit / High Dependency Unit/Close Observation Unit

An Intensive Care Unit (ICU) is a specially staffed and equipped, separate, self-contained section of a hospital for the management of patients with potentially life threatening conditions, and/or potentially reversible organ failures. An ICU provides clinical expertise, facilities and equipment for the support of patients and their families, utilising skills of specialist medical, nursing and allied health staff who are specifically trained in the multidisciplinary management of critically ill patients.

A High Dependency Unit (HDU) may be combined with an ICU or located separately. A HDU is a specifically staffed and equipped section of a hospital that provides a level of care intermediate between intensive care and general ward care. It may be located in a hospital with Level 4, 5 or 6 ICU’s or as a satellite unit supported by ICU in another hospital within a reasonable transport time, as long as transfer systems are available, safe and robust.

ICU’s / HDU’s provide high level acute, clinical support for the various specialist and subspecialist medical and surgical services practicing within a health service or hospital. In this sense, ICU provides a safety net for those patients undergoing major surgery, procedures and treatments, and for managing complications of these. ICU also supports those patients who present to the Emergency Department with severe acute reversible illness or injury, ICU care may also include end of life care and support for potential organ donation. Additionally, Intensive Care medical and nursing staff will provide a wide variety of outreach services to support patients on acute hospital medical and surgical wards.

A Close Observation Unit (COU) provides a higher level of monitoring and observation than standard ward base care, but it does not have the capability for invasive monitoring, or support from an aligned ICU.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Intensive Care Unit / High Dependency Unit/Close Observation Unit
No Level 1 service currently described.

Level 2 Close Observation Unit

Service description

A Level 2 service is a specifically staffed and equipped section of a hospital that provides a level of care intermediate between a HDU and that of standard ward base care. It provides close clinical and non-invasive vital sign monitoring of acutely ill medical or surgical patients within pre-defined clinical criteria, who do not meet criteria for urgent transfer to a higher level of care.

A COU cares for admitted patients who need observations or short term care that cannot be provided on a ward, where their condition is expected to improve such that they can be discharged within 24 hours. It may provide immediate resuscitation or lifesaving intervention under direct medical supervision, prior to urgent transfer to a higher level ICU.

Staff may be involved in local Rapid Response Systems.
### Service requirements

- Dedicated COU
- Close clinical observation with continuous cardiac ECG and pulse oximetry monitoring but no invasive pressure monitoring
- Developed admissions and discharge policy and protocols
- May provide nursing support for ward based emergency calls (MET Code Blue) as per developed policy and protocols
- Established referral pathways with higher level ICU service, including defined transfer policy and access to telehealth support
- Formal audit and review of activities and outcomes including need for urgent transfer, length of stay and morbidity/mortality
- Active hospital based infection control policies
- Clinical governance, management and leadership will be provided by an appointed part time Medical Director in conjunction with a Nurse Unit Manager (NUM)

### Workforce requirements

- Medical Director with suitable experience and qualifications in an acute care specialty (ICU, ED, Anaesthesia)
- Access to specialists from relevant disciplines to provide support and consultation as required
- NUM with experience and post registration qualification in either intensive care, high dependency or emergency medicine nursing (or equivalent)
- RNs with post registration experience in a critical care environment and minimum requirement of electrocardiography (ECG) interpretation and advanced life support (ALS) competence
- A minimum nurse-patient ratio of 1:3 present in the unit
- Educational program for nursing staff which may include links with higher level referral centres and tertiary education institutions
- Access to technical support staff (e.g. biomedical engineers and scientific officers), as required
- Access to clinical pharmacist, physiotherapist, pastoral care, social worker, dietician and any other allied health services

Level 3 High Dependency Unit

Service description

A HDU is a specifically staffed and equipped section of a hospital that provides a level of care intermediate between intensive care and general ward care. It may be located in a hospital with Level 4, 5 or 6 ICU service but physically separate, or as a satellite unit supported by ICU at a higher level ICU service within reasonable transport time.

Patients may be admitted to the HDU from the ICU as a step-down prior to transfer to the ward, or directly from the ward, post-anaesthetic care unit (recovery) or ED or from nearby lower level health facilities, such as day surgical centres, or small rural hospitals (level 1-2).

Typical patients in HDU have single organ system dysfunction or are assessed to be at a high risk of developing acute complications. An HDU should have sufficient resources and immediate access to appropriately skilled medical staffing for the immediate resuscitation and management of deterioration in critically ill patients. Equipment should be available to manage short term life-threatening emergencies, e.g. the need for mechanical ventilation.

Service requirements

As for Level 2 plus:

- Operationally linked to a higher level ICU which should be closest by distance and transport time
- Routine monitoring and support of stable patients including ECG, oximetry, and short term invasive measurement of blood pressure with pre-defined acceptable parameters that trigger escalation pathways
- Protocols and Guidelines supported by nurse educator to allow invasive monitoring and the safe use of low dose vasoactive therapies.
- All patients admitted to the HDU for more than 24 hours are referred to an attending Intensive Care Specialist for input towards care management
- Access to either Anaesthetic, Emergency Medicine, or Intensive Care Specialist attendance within 15 minutes for acute medical emergencies
- Access to theatre recovery or the Department of Emergency Medicine for short term ventilation and stabilisation whilst awaiting retrieval services
- Access to pharmacy, pathology, operating theatres and imaging services
- Structure and Equipment needs should adhere to College of Intensive Care Medicine (CICM) IC-13 recommendations
- Equipment Officer support from the affiliated CICM

Workforce requirements

As for Level 2 plus:

- Medical director who is either a Fellow of the College of Intensive Care Medicine (FCICM) or has another relevant Specialist Qualification and suitable recent experience in modern intensive care practice
• Access to Intensive Care Specialist to ensure patient safety and appropriateness of admission
• Registered medical practitioner or GP with appropriate ALS and airway experience
• Nurse Unit Manager with post registration qualification in intensive care
• RNs with post registration qualification in intensive care or high dependency nursing and have ECG interpretation and ALS competence
• A minimum nurse-patient ratio of 1:2.25 or 1:3 (24 hours) (Nursing Hours per Patient Day (NHPPD) HDU model (standalone))

Level 4 Intensive Care Unit

Service description

A Level 4 service provides a self-contained critical care area with easy access to the ED and operating theatres within the facility.

A Level 4 service has the capability of providing immediate resuscitation and short-term cardiorespiratory support for critically ill patients. It must be capable of providing mechanical ventilation and simple invasive cardiovascular monitoring for a period of at least several hours.

Service requirements

• Separate and self-contained facility in the hospital capable of providing basic, multisystem life support, usually for up to 36 hours
• Provides mechanical ventilation and simple invasive cardiovascular monitoring
• Admission and discharge protocols for all beds to be determined by the Medical Director
• Established referral relationship with a Level 5 or Level 6 ICU including defined transfer policies and access to telemedicine support
• Formal audit and review of activities and outcomes through participation in the Australian and New Zealand Intensive Care Society Centre for Outcome and Resource Evaluation database activities
• 24 hour access to on-call pharmacy, pathology, operating theatres and medical imaging services
• All patients admitted to a Level 4 Unit must be referred to the Consultant Specialist taking responsibility for the Unit at the time of admission (with the exception of Coronary Care Patients)
• Active hospital based infection control unit and policies

Workforce requirements

• Medical Director with a full-time commitment to the operation of the unit and who is a Fellow of the CICM
• Sufficient registered specialists from relevant disciplines on-call 24 hours, with rostering and call arrangements determined by the Medical Director

• In addition to the attending Specialist, at least one on-site registered medical practitioner with appropriate level of experience, airway and ALS skills, rostered for the unit and immediately available at all times to attend the unit

• A nurse in charge of the unit who has a post registration qualification in intensive care

• All nursing staff in the unit responsible for direct patient care being RNs with the majority of all nurses having a post registration qualification in intensive care

• All nurses working in unit must have ECG interpretation, ventilation, invasive line management, and ALS competence at a minimum

• A minimum of two RNs present in the unit at all times when there is a patient present in the unit, and this number should be maintained irrespective of Rapid Response Team involvement

• Educational programs for both medical and nursing staff which may include links with level 5 or 6 referral centres and tertiary education institutions

• Access to a dedicated unit nursing educator

• An orientation program for new staff

• A minimum nurse–patient ratio of 1:1 for ventilated and similarly critically ill patients, as per accepted clinical standards for ICUs

• A minimum 1:2 nursing ratio for high dependency patients

• Access to technical support staff (e.g. biomedical engineers and scientific officers), as required

• Appropriate access to specialist pharmacist, physiotherapist, social worker, dietician, pastoral care and any other allied health services

**Level 5 Intensive Care Unit**

**Service description**

A Level 5 ICU provides services at Level 4 plus it has the capability of providing a high standard of general intensive care including more complex, extended, multisystem life support.

A Level 5 service provides mechanical ventilation, renal replacement therapy, invasive cardiovascular monitoring for extended periods. A Level 5 ICU with suitably trained clinical and support staff and resources, may be capable of providing more advanced respiratory and cardiovascular support using ECMO. However this is not essential to the minimum provisions for a Level 5 ICU service.
**Service requirements**

As for Level 4 plus:

- Accredited CICM training program
- Regional referral role
- Adequate capacity, equipment resources, and medical and nurse staffing to support the required elective caseload, emergency surgical referrals and any medical procedural services provided on-site, locally or in affiliated regional centres. This will ultimately depend on the nature and level of other services delivered in the region and should be addressed and adjusted in line with other service structures
- Access to urgent echocardiography services 24/7, by either trained Intensive Care Specialists, Cardiologists or Cardiac sonographers
- Specialised bariatric lifting equipment integrated into bed spaces
- Nearby inpatient rehabilitation services for post-critical illness recovery and support
- Adequate staffing and resources to provide any ward-based support service or outreach programs and deteriorating patient quality assurance (National Safety and Quality Health Service (NSQHS) Standard 9)
- Active research program including research nurse and data collection
- Adequate clerical and administrative support, as per CICM guidelines
- Systems for the facilitation and support of organ donation

**Workforce requirements**

As for Level 4 plus:

- Minimum 50% of all nursing staff to have post registration qualification in ICU
- Each nursing shift requires a designated Clinical Nursing Co-ordinator and ACCESS nurses. The number of ACCESS nurses required per shift will vary depending on percentage of qualified staff. E.g. Units with 50-75% qualified ICU nurses require one ACCESS nurse for every 6 patient’s. (Australian College of Critical Care Nurses (ACCCN) ICU staffing position statement, 2003)
- Capacity and staffing models adequate to cope with surges in demand for unexpected peaks in emergency referrals, both from within the institution and from referring regional centres
- Allied health support, including dedicated, specialised ICU physiotherapists. Recommend 1.0 FTE Senior Physiotherapist per 7 ICU beds OR 1.0 FTE Senior per 5 HDU beds
- A dedicated ICU Specialist Pharmacist. Other pharmacy services including compounding, sterile room services, TDM, clinical drug guidelines and protocols
- Equipment officer
Level 6 Intensive Care Unit

Service description

A Level 6 service provides services at Level 5 plus it is the highest level referral unit for intensive care patients and is capable of providing comprehensive critical care, including complex and multisystem life support for an indefinite period, and support for complex Level 6 activity. A Level 6 ICU should contain and be supported by services that provide patient care at a level which delivers appropriate clinical services for all types of illness/injury, other than those which the State does not support such as acute transplantation medicine. As such a Level 6 ICU should not require transfer of acute patients to other ICUs except for times of significant bed pressure. However, elective transfer of patients to other ICUs within the State should be supported where services exist to support the patient, and the transfer facilitates better proximity to the patient's family.

Service requirements

As for Level 5 plus:

- Sub-specialty Cardiothoracic and/or Neurosurgical throughput and support
- Appropriate systems for support of Tertiary Trauma and/or Major Burns centre patients
- Hyperbaric chamber available at short notice
- Participates in the trauma team for the hospital
- Formal research program
- Statewide and interstate referral role
- Capacity for extended advanced respiratory and cardiovascular support using ECMO

Workforce requirements

As for Level 5 plus:

- Fellow of CICM qualified ICU Consultant specialists on-call 24 hours
- ICU registrar on-site and exclusively rostered to the Unit 24 hours

Medical Imaging

Medical Imaging encompasses a spectrum of both conventional and sophisticated diagnostic and interventional practices. It encompasses general radiography, ultrasound, computed tomography (CT) scan, fluoroscopy, bone mineral densitometry, mammography, angiography, interventional radiology, and magnetic resonance imaging (MRI). Nuclear Medicine diagnostic imaging has also been included in the Medical Imaging delineation section of this framework, it uses radiopharmaceuticals (radioactive substances) to provide functional and dynamic imaging, and includes gamma camera imaging as well as more specialist investigations such as PET (positron emission tomography) scanning.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Medical Imaging

Service description

A Level 1 service provides low-risk ambulatory care services during business hours and may provide some limited after-hours services. This service either has access to or onsite single, mobile or fixed, general x-ray unit which is delivered by licensed operators.

Service requirements

- A mobile or fixed general x-ray unit onsite or access to licensed medical imaging service for timely referral and reporting of images
- Range of imaging limited to x-ray of extremities, chest and abdomen if service is delivered by licensed operators

Workforce requirements

- Access to a radiographer or if no radiographer available, then a licensed x-ray operator with 24 hour access to an appointed radiographic advisor for supervision
- Medical imaging interpreted by registered medical practitioner / health professional
- Radiologist readily contactable to discuss findings and provide a report

Level 2 Medical Imaging

Service description

A Level 2 service provides services at Level 1 plus it provides a low-risk inpatient service. This service may also provide a low-risk ambulatory care service. This service is predominantly delivered by a sole radiographer and support may be provided by licensed operators. There is a designated room on-site with a fixed x-ray unit and may also include digital radiography; however, depending on the range of services provided at the facility (e.g. day hospitals), a mobile image intensifier may be the only modality available. The service may also have access to ultrasound for non-complex conditions.

Service requirements

As for Level 1 plus:

- Has dedicated x-ray room with fixed x-ray unit available
• Full range of images not restricted when a radiographer is on duty
• May have access to ultrasound for non-complex interpreted by registered medical practitioner/health professional and reported by a radiologist using teleradiology

### Workforce requirements

As for Level 1 plus:

• On-site radiographer available during business hours

### Level 3 Medical Imaging

#### Service description

A Level 3 service provides services at Level 2 plus it has on-site ultrasound and CT services. Sites may perform examinations involving contrast, such as intravenous pyelograms and has on-site radiologists able to perform some biopsies and procedures.

#### Service requirements

As for Level 2 plus:

• On-site designated radiography rooms
• Teleradiology facility available
• On-site ultrasound and CT facilities

### Workforce requirements

As for Level 2 plus:

• Radiographer in attendance who has regular access to radiological consultation
• Registered medical practitioner must be on-site at all times when procedures involving contrast are performed
• Ultrasound performed by a sonographer or registered medical practitioner trained in ultrasound

### Level 4 Medical Imaging

#### Service description

A Level 4 service provides services at Level 3 plus it provides on-site MRI services.

#### Service requirements

As for Level 3 plus:

• Facilities for general x-ray and fluoroscopy, in addition to mobile x-ray for wards, operating room and ED
• MRI scanner
• Formal links with nuclear medicine services
Workforce requirements

As for Level 3 plus:

- After-hours access to consultant radiology for reporting
- On-site radiographer on-call 24 hours
- Registered radiographers and sonographers
- RN/EN as required

Support service requirements

Level 5 Medical Imaging

Service description

A Level 5 service provides services at Level 4 plus a limited range of specialised interventional radiology and nuclear medicine services.

Service requirements

As for Level 4 plus:

- Nuclear medicine facilities with single-photon emission CT
- Preparation or reconstitution of radiopharmaceuticals with clear and appropriate documentation in place, including details of supply source, preparation date and batch number and reconstitution in line with the Australian and New Zealand Society of Nuclear Medicine Guidelines for Good Radiopharmacy Practice
- One or more gamma cameras on-site with whole body and single-photon emission CT facility
- May have the facility for in vivo and/or in vitro tracer studies
- Interventional radiology on-site

Workforce requirements

As for Level 4 plus:

- Clinical Director of Medical Imaging and lead radiographer
- Radiologist on-site and on-call 24 hours
- May have radiology registrar
- Registered and licensed nuclear medicine specialist present during radiopharmaceutical administration and available for consultation 24 hours
- Full-time supervision during procedures by a nuclear physician or radiologist with nuclear medicine qualification
- RN with evidence of ongoing clinical competency and experience appropriate to the service being provided on-site during the hours of operation of the department and available after-hours
- Access to an appropriately credentialed anaesthetist as required
- Registered nuclear medicine technologists
- Business hours access to a radiochemist/radiopharmacist
- Business hours access to technical support staff (e.g. biomedical engineering scientific officers)

**Support service requirements**

**Level 6 Medical Imaging**

**Service description**

A Level 6 service provides services at Level 5 plus it provides complex, on-site interventional and neuro-interventional procedures and PET services that must be available on-site. It also provides an interstate referral role.

**Service requirements**

As for Level 5 plus:

- Special rooms for digital angiography, neuroradiology etc., as required
- On-site PET scanning facilities
- 24 hour on-call service across multiple modalities including general radiography, CT, ultrasound, fluoroscopy, nuclear medicine and interventional angiography
- Provides interstate referral role

**Workforce requirements**

As for Level 5 plus:

- On-site imaging modality specialists during business hours
- Has radiology registrars (2 minimum according to Australian standard) and postgraduate Fellows
- One or more full-time medical physicists
- A full-time radiopharmacist/radiochemist available if radiopharmaceuticals are manufactured in-house
- An experienced/suitably qualified RN at minimum Grade 4 level

**Support service requirements**

Pathology

Pathology Services provide testing of materials, tissues or fluids from a patient to determine the cause and nature of a disease.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level. Pathology service requirements are consistent with the National Pathology Accreditation Advisory Council (NPAAC) requirements.

Level 1 Pathology

No Level 1 service currently described.

Level 2 Pathology

Service description

A Level 2 service does not have an on-site laboratory, but may have access to Point of Care Testing (PoCT) as well as competent operators to use this equipment and appropriate supervision and training from a higher level Pathology service within the network. No frozen sections are performed.

Service requirements

- Access to pathology services including an approved specimen and blood collection service
- Access to courier service for specimen and blood product transfer to laboratory for processing
- Compliance with the quality and safety requirements as determined by National Association of Testing Authorities (NATA) and the NPAAC
- May have on-site blood storage, but cross-matched blood managed by off-site laboratory at a higher level Pathology service

Workforce requirements

- Staff with appropriate qualifications, training and experience relevant to scope of testing being performed in accordance with standards and guidelines specified by NPAAC

Level 3 Pathology

Service description

A Level 3 service provides a limited range of pathology tests, including on-site basic biochemistry and haematology, and has the ability to manage pathology specimens until transfer of the specimen to a higher level Pathology service is available. More complex testing is accessible via higher level Pathology services.

Service requirements

- On-site basic biochemistry and haematology
- Access to blood bank services provided by a higher level Pathology service within the network
• Routine anatomical pathology provided within 96 hours via a higher level Pathology service within the network

• Routine microbiology samples (including culture of blood, urine, stool) are managed on-site and referred to a higher level Pathology service within the network

Workforce requirements

• Non-pathology specialists who are trained in the use of automated pathology testing equipment

• Where appropriate, specialist pathology staff with appropriate qualifications, training and experience relevant to scope of testing being performed in accordance with NPACC requirements

Level 4 Pathology

Service description

A Level 4 service provides services at Level 3 plus comprehensive testing in a local pathology laboratory.

This level of service can typically be provided by a category B (branch) accredited pathology laboratory.

Service requirements

As for Level 3 plus:

• Routine pathology services provided by laboratory scientists

• Blood bank service provided by local laboratory

• Electronic pathology result reporting available

Workforce requirements

As for Level 3 plus:

• Service provided by laboratory scientists with appropriate tertiary qualifications in accordance with NPACC guidelines

Level 5 Pathology

Service description

A Level 5 service provides services at Level 4 plus it provides a specialist pathologist service in a dedicated pathology department.

This level of service can typically be provided by a category GX or GY accredited pathology laboratory.

Service requirements

As for Level 4 plus:

• Service provided by pathologists and/or clinical scientists as per NPAAC guidelines

• Laboratory provides Haematology, Clinical Chemistry, Blood Bank, Microbiology and Histopathology services locally

• May have sub-specialist pathologists in a limited range of disciplines

• Has formal access to sub-specialist pathology services from a Level 6 Pathology service
Provide support to lower service level facilities within the network

**Workforce requirements**

As for Level 4 plus:

- Credentialed pathologists
- Specialist pathology laboratory staff available locally 24 hours

**Level 6 Pathology**

**Service description**

A Level 6 service provides services at Level 5 plus sub-specialty services and a statewide referral role for complex, highly specialised and sub-specialty pathology services.

This level of service can be provided by a category GX accredited pathology laboratory.

**Service requirements**

As for Level 5 plus:

- Sub-specialty pathology services
- Cytogenetics service
- Cell culture facilities and cryopreservation
- Interstate referral role

**Workforce requirements**

As for Level 5 plus:

- Credentialed sub-specialty pathologists
Pharmacy

Pharmacy services include preparation, dispensing and clinical monitoring and provision of information on appropriate utilisation of drugs within health services. The level of pharmacy service provided by a health facility reflects acuity of patients treated. Pharmacy services must comply with the Poisons Act 1971 and Pharmacy Board of Australia legislation regarding storage and security requirements.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Pharmacy

Service description

A Level 1 service provides services on an outpatient basis to a local community. This level service is provided to low risk patients in health facilities and for patients living in rural and remote community settings and homes.

Service requirements

- Access to authorised prescriber to prescribe appropriate medication
- If service is provided through an established facility, where there is no pharmacist employed, on-site medication service oversight provided by a pharmacist located elsewhere from a higher level Pharmacy service via telehealth where available or through a documented process with a community pharmacist
- Links to other relevant services to support patients taking medications (e.g. community nursing services)
- Access to registered pharmacists for medication management, patient education and support, home medicines review and formal medication reviews in collaboration with the patient’s usual general practitioner
- Meets relevant licencing and regulation requirements
- Access to telehealth facilities where this has been identified as a means of providing medication services and oversight
- A reliable internet connection with sufficient capacity to enable access to receive consultation from a higher level Pharmacy service
- Defined and appropriate supply chain where medications are sourced from a network hospital, primary health care clinic or community pharmacy
- Linked to higher level Pharmacy services within the network
- Provision of pharmacy drug information, drug monitoring, drug utilisation evaluation and adverse drug reaction reporting

Workforce requirements

- Access to registered pharmacists where not on-site
- Must have access to a registered medical practitioner for prescriptions
• Access to a registered medical practitioner and/or Nurse Practitioner (NP) for facilities in rural and remote areas

**Level 2 Pharmacy**

**Service description**

A Level 2 service provides services at Level 1 plus it provides an inpatient clinical pharmacy service.

**Service requirements**

As for Level 1 plus:

• Suitable and secure on-site imprest

• Medications supplied for inpatients by hospital pharmacy within the network

• Medications for inpatients on discharge supplied on individual prescription from either a community pharmacy, appropriate hospital within the network, or a higher level Pharmacy service with documented processes in place for the provision of medications that require compounding

• Patient education provided for inpatients from nursing or visiting pharmacy staff

• Timely access to clinical information, including medical records, medication history and pathology results for patients

• May provide pharmacy undergraduate and postgraduate teaching role

**Workforce requirements**

As for Level 1 plus:

• Access to pharmacist

• Access to more specialised pharmacist support from a higher level facility within the network

**Level 3 Pharmacy**

**Service description**

A Level 3 service provides services at Level 2 plus it provides a clinical pharmacy service on weekdays through an on-site pharmacy or a contracted service, and includes an out-of-hours medication mechanism and ideally has access to a pharmacist for emergency advice 24 hours.

**Service requirements**

As for Level 2 plus:

• Medications and clinical services for day patients and, where applicable, ambulatory patients in specialty clinics

• Provides support to outreach and specialist services

• Access to basic, non-sterile extemporaneous compounding in the network

• Clinical service includes drug information, drug monitoring, drug utilisation evaluation, adverse drug reaction reporting, patient education and support, and membership on hospital based
network committees (e.g. Drugs and Therapeutic Committee, Quality Control, and Clinical Governance Committees)

- Timely access to clinical information, including medical records and pathology results, reliable access to a dedicated desktop and/or laptop computer in the ward/clinical area, or equivalent (e.g. electronic tablet), if wireless technology is available
- May provide pharmacy undergraduate and postgraduate teaching role
- Appropriate networking with higher level Pharmacy service
- Must comply with Poisons Act 1971 and Pharmacy Board of Australia legislation regarding storage and security requirements
- Provides pharmacy support to rural and remote areas within the network

**Workforce requirements**

As for Level 2 plus:

- Service provided by a pharmacy team which includes a pharmacist, pharmacy assistant and pharmacy technician
- Pharmacist available during designated business hours. Documented processes in place to access medications and medicines information outside these hours (after-hours service may be provided by a higher level Pharmacy service under a documented process)
- Access to relief/locum pharmacist services, as required
- Referral pathways and access to allied health and complementary services, as required for patient care (ideally, access to dietetics, occupational therapy, physiotherapy and interpreter services)
- Education for nursing staff and support for registered medical practitioners

**Support service requirements**

**Level 4 Pharmacy**

**Service description**

A Level 4 service provides services at Level 3 plus it provides a medication service that is available 24 hours. The service is able to provide care for a full range of patient risk levels, and has the capacity and capability to care for patients that are likely to have complex and competing therapeutic needs, and multiple comorbidities that the service must consider when optimising therapy.

**Service requirements**

As for Level 3 plus:
• Provides network consultation and accepts referrals from lower level services within the network

• Medication distributed and stored by the facility and, as required, to any lower level service that is safe, meets legislative requirements and assures the quality of the medicinal products (e.g. maintains cold chain)

• Has responsibilities across a defined area within the network, providing support and medication service oversight to lower level services through intermittent visits, via outreach pharmacy or telepharmacy services if available, or through other means

• Provides support for a range of specialty services (e.g. chemotherapy)

• Provides support for clinical trial medication distribution

• Provides visiting services to lower level services within the network

Workforce requirements

As for Level 3 plus:

• An after-hours, on-call service for medication supply and clinical services, including medicines information, available 24 hours

• General or junior-level pharmacy staff mentored or clinically supervised by a specialist or advanced-level practitioners where applicable

Support service requirements

Level 5 Pharmacy

Service description

A Level 5 service provides services at Level 4 plus provides an extended hours service that has the capacity to act as a referral service for very high-risk patients except those who need high level specialist clinical services, such as highly complex patients.

Service requirements

As for Level 4 plus:

• Basic, non-sterile, extemporaneous compounding possibly with limited small-batch manufacturing for local hospital use, and sterile, individually compounded products (e.g. chemotherapy including parenteral, targeted and oral chemotherapy) if the use of these products falls within the scope of practice of the pharmacist or trained support staff providing supporting medication services

• The capacity to respond to requests for medicines information related to direct patient care in a timely manner, either through a medicines/drug information service or a service provided internally

• A medicines/drug information service provided for the whole of the network and State
- The service may actively participate in multidisciplinary research
- Undergraduate and postgraduate pharmacy teaching role and training

**Workforce requirements**

As for Level 4 plus:

- Pharmacist available 24 hours
- A pharmacy team structured to deliver services at multiple levels throughout the organisation
- Specialist pharmacist positions which reflect the range of specialist services provided (e.g. ICU, haematology, and medical oncology)

**Support service requirements**

<table>

**Level 6 Pharmacy**

**Service description**

A Level 6 service provides services at Level 5 plus it acts as a referral service for all lower level services across the State (i.e. a Statewide and/or super-specialty service), accepting referrals, including interstate, where applicable. The service has the capacity and capability to provide care for patients who have the most complex care needs. A team of pharmacists, including specialist advanced level pharmacists aligned with clinical specialist services, provides medication services.

**Service requirements**

As for Level 5 plus:

- A specialised or Statewide Medicines and Drug Information Service, and/or Poisons Information Service may be provided
- Product evaluation with drug use/policy development
- Participates in research, clinical trials and clinical reviews

**Workforce requirements**

As for Level 5 plus:

- A full range of specialist pharmacist positions which reflect the range of specialist services provided (e.g. ICU, haematology, medical oncology, cardiology, paediatrics, geriatrics, psychiatry, and drug information).

Core Clinical Services

For the purposes of this Framework, core clinical services comprise of Acute Stroke, Alcohol and Drug, Allergy and Immunology, Burns, Cancer, Cardiology, Cardiothoracic Surgery, Child and Adolescent Mental Health, Clinical Genetics, Ear, Nose and Throat, Emergency Medicine, Endocrinology, Gastroenterology, General Medicine, General Surgery, Geriatrics, Gynaecology, Hyperbaric and Diving Medicine, Infectious Disease, Maternity, Mental Health, Neonatology, Nephrology, Neurology, Neurosurgery, Ophthalmology, Oral Health, Orthopaedics, Paediatric Medicine, Paediatric Surgery, Palliative Care, Persistent Pain Medicine, Plastics and Reconstructive Surgery, Rehabilitation, Respiratory and Sleep Medicine, Rheumatology, Sexual Assault Services, Trauma, Urology and Vascular Surgery.
Acute Stroke

Stroke medicine is a specialised area of clinical practice involving the diagnosis, treatment, and rehabilitation of patients who have experienced a stroke.

The scope of this Framework recognise that:

- All people with stroke should be admitted to hospital and be treated in a stroke unit with a multidisciplinary team.
- All people with stroke should be admitted directly to a stroke unit (preferably within three hours of stroke onset).
- Smaller hospitals should consider stroke services that adhere as closely as possible to the criteria for stroke unit care. Where possible, patients should receive care on geographically discrete units.
- If people with suspected stroke present to non-stroke unit hospitals, transfer protocols should be developed and used to guide urgent transfers to the nearest stroke unit hospital.

A designated Stroke Unit requires:

1. Co-located beds within a geographically defined unit.
2. Dedicated, interprofessional team with members who have a special interest in stroke and/or rehabilitation. The minimum team would consist of medical, nursing and allied health (including occupational therapist, physiotherapist, speech pathologist, social worker and dietitian). For Tasmania, the minimum team also consists of a neuropsychologists and pharmacist.
3. Interprofessional team meet at least once per week to discuss patient care.
4. Regular programs of staff education and training relating to stroke, (e.g. dedicated stroke in-service program and/or access to annual national or regional stroke conference).

The scope of this Framework also describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Acute Stroke
No Level 1 service currently described.

Level 2 Acute Stroke
No Level 2 service currently described.

Level 3 Acute Stroke

Service description

A Level 3 service provides assessment and basic hospital care for a stroke patient, either who has presented to the service or who has been transferred from another service, for which the stroke results in the patient requiring end of life care (refer to Palliative Care Service framework). Non-palliative acute strokes who present directly to a Level 3 Acute Stroke Service need to be transferred to a designated stroke unit.
Service requirements

- Capacity to provide initial assessment and diagnosis of stroke
- Capacity to provide end of life care
- Formal links with higher level Acute Stroke Services
- Formal transfer protocols for non-palliative acute stroke patients with designated stroke units

Workforce requirements

- Carers
- Registered medical practitioner or GP on-site
- Access to specialist palliative care services in the network 24 hours
- RNs on-site 24 hours; RNs may be supported by ENs in providing care to patients

Level 4 Acute Stroke

Service description

A Level 4 services provides specialist hospital care for stroke patients. Level 4 services do not have a dedicated stroke unit. Moderate complexity patients are transferred to a higher level Acute Stroke service.

Service requirements

As for Level 3 plus:

- Formal linkages including referral processes with Level 5 or 6 Acute Stroke Service within the network to facilitate timely transfer of stroke patients and/or provision of clinical advice via telehealth in line with agreed guidelines

Workforce requirements

As for Level 3 plus:

- Physician practicing in general medicine on-site and on-call 24 hours
- Access to a pharmacist
- Access to specialist stroke unit, specialist Neurology, designated allied health and Rehabilitation Services in the network
- RNs with appropriate post graduate qualifications and/or extensive experience in stroke care

Support service requirements

Level 5 Acute Stroke

Service description

A Level 5 service is a designated primary stroke centre. To be classified as a primary stroke centre it must receive over 75 stroke admissions each year.

Service requirements

As for Level 4 plus:

- Dedicated stroke unit with clinicians who have stroke expertise
- Close linkages with Level 6 as part of statewide stroke service
- Access to ICU/HDU for complex patients
- Written stroke protocols for emergency services, acute care and rehabilitation
- Access to thrombolytic therapy
- Protocols to transfer appropriate patients to a comprehensive stroke centre
- Ability to provide acute monitoring (telemetry and other physiological monitoring) for up to 72 hours
- Onsite neurovascular imaging (CT and Carotid) and timely access to expert interpretation
- Rapid (within 48 hours) Transient Ischaemic Attack (TIA) assessment clinics/services
- Access to standardised and early assessment for neuro-rehabilitation
- Coordinated processes for patient transition to ongoing rehabilitation and secondary prevention services including referral back to acute services if required
- Access to an Early Supported Discharge Service
- Interdisciplinary stroke or neuro-rehabilitation team with access to staff education and professional development specific to stroke
- Access to clinical neuropsychologist as part of the ongoing care after acute admission
- Regular audit and stroke-specific quality improvement activities

Workforce requirements

As for Level 4 plus:

- Access to CNC providing leadership in stroke management
- Dedicated medical lead who has primary focus on stroke (stroke centre director)
- Clinical psychologist
- Access to specialist rehabilitation services
- Access to early Supported Discharge team comprising of a physiotherapist, occupational therapist, nurse, speech pathologist, physician, social worker and administrative support person
- Access to allied health services with special expertise in stroke/rehabilitation

Level 6 Acute Stroke

Service description

A Level 6 service is a designated comprehensive stroke centre, providing comprehensive care for acute stroke admissions. This level provides statewide specialist stroke support to all lower level facilities in the network and is responsible for establishing statewide protocols for stroke assessment and management.

To be a designated comprehensive stroke centre it must receive over 350 acute stroke admissions each year. These centres have established well organised systems to link emergency services, acute care, coordinated processes for ongoing inpatient rehabilitation, secondary prevention (e.g. clinic or follow up service), and community reintegration (e.g. early supported discharge).

Service requirements

As for Level 5 plus:

- Statewide coordination of stroke services
- Network referral role
- On-call neurologist for statewide service to support lower level services in acute thrombolysis and transfer decisions
- Dedicated stroke unit with specialised resources and personnel available 24 hours
- Formal linkages with emergency services
- Links with Level 5 Rehabilitation Service
- Provides 24 hour availability of thrombolysis
- Access to advanced imaging capability (MRI, advanced CT and catheter angiography)
- Access to sub-specialist neurosurgical and neuro-intensive care, interventional radiology services, cardiology and palliative care
- Provide outreach services to lower services
- Provides clinical advice, education and training to lower level services
- Leads clinical research

Workforce requirements

As for Level 5 plus:

- Access to neurosurgeons and neuro-intensive care staff
- On-site clinical neuro-psychologist

Alcohol and Drug

Alcohol and Drug Services provide a wide range of services to assist individuals, families and communities to reduce the harm caused by substance abuse.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Alcohol and Drug

Service description

A Level 1 service provides general alcohol and drug services by community health staff, registered medical practitioners and GPs.

Service requirements

- No specialist alcohol and drug professionals available on-site
- Information, risk assessment and referral is provided by community health staff, registered medical practitioners and GPs
- Ability to refer to alcohol and drug residential rehabilitation services (may be off-site)
- Provides information, counselling and referral to specialist services
- Formal linkage to specialist alcohol and drugs services

Workforce requirements

- Visiting registered medical practitioner or GPs
- Access to specialist Alcohol and Drug Medical Staff
- Visiting community nursing and / or allied health staff with specialist knowledge and skills in alcohol and drugs treatment and support, as required

Level 2 Alcohol and Drug

Service description

A Level 2 service provides services at Level 1 plus outpatient assessment and brief intervention for alcohol, tobacco and other drugs use.

Service requirements

As for Level 1 plus:

- Provides pharmacotherapy for opioid dependence for generally low risk, stable patients (e.g. where community pharmacies are unavailable)
- Provides limited access to dispensing and supervised dosing of pharmacotherapy for opioid dependence
- Assessment, brief interventions for alcohol, tobacco and other drugs
- Formal linkage with higher level specialist alcohol and drug treatment service
Workforce requirements

As for Level 1 plus:

- Registered medical practitioners or GPs authorised to provide pharmacotherapy for opioid dependence
- Registered pharmacist accredited to provide dispensing and dosing of pharmacotherapy for drug dependence, including opioid dependence
- RNs with some experience in providing treatment for patients with alcohol and drug problems. RNs may be supported by ENs in providing care to patients.
- Allied health professionals with some experience in alcohol and drugs

Level 3 Alcohol and Drug

Service description

A Level 3 service provides services at Level 2 plus support services for patients experiencing co-occurring alcohol and drug related conditions. A Level 3 service also provides patient education and prevention Alcohol, Tobacco and Other Drug (ATOD) programs within a motivational interviewing framework.

Service requirements

As for Level 2 plus:

- Provides pharmacotherapy dispensing and dosing within business hours
- Assessment and treatment provided by multidisciplinary team
- Brief intervention and support (within a motivational interviewing framework) for patients and their families undertaking care coordination role including referral and transfer of care for ongoing support
- Appropriate patient case management

Workforce requirements

As for Level 2 plus:

- Multidisciplinary team comprising of registered medical practitioners, nursing staff and allied health professionals
- Access to addiction medicine specialists and/or medical practitioners with ATOD skills visiting or via telephone

Level 4 Alcohol and Drug

Service description

A Level 4 service provides services at Level 3 plus comprehensive and multidisciplinary alcohol and drug treatment services.

Service requirements

As for Level 3 plus:

- Access to multidisciplinary alcohol and drug teams
- Access to higher level detoxification service

Workforce requirements

As for Level 3 plus:

- Access to specialist alcohol and drugs multidisciplinary team
- Access to alcohol and drug specialist provider 24 hours in the network

Level 6 Alcohol and Drug

Service description

A Level 6 service provides services at Level 5 plus inpatient beds for medical detoxification and an onsite specialist addiction medicine service for patients with complex conditions, including but not limited to Fetal Alcohol Spectrum Disorder (FASD), alcohol related brain injury (ARBI), chronic pain, perinatal and mental health multi-morbidity.

Service requirements

As for Level 5 plus:

• Training program for undergraduate, graduate, post graduates and AOD specialisation
• Statewide alcohol and drug service leadership and co-ordination role
• Statewide research, planning and policy role
• Specialist drug and alcohol training program for all staff working with conditions related to alcohol and drug use and clinical supervision of these staff
• Clinical Support and training provided for community pharmacotherapy programs
• Specialist alcohol and drug services to patient groups with particular needs, including pregnant opioid dependent women and patients with blood-borne viruses.
• Specialist and integrated services available for young people
• Teaching and consultancy services to all other Levels

Workforce requirements

As for Level 5 plus:

• Alcohol and Drug Service Clinical Director whose primary role is to provide statewide leadership for strategic planning, policy and research
• Medical officers, allied health professionals and RNs with appropriate post graduate qualifications and/or experience in drug and alcohol
• Funded specialised training positions across all disciplines

Allergy and Immunology
(+service not currently provided statewide in public health system)

Allergies occur when a person’s (including children) immune system reacts to substances that are normally harmless to most people. These substances are generally known as allergens and can be found in foods, airborne particles (e.g. dust mites, pollens or moulds), insect venoms and drugs.

Immunology is a branch of medicine that covers all aspects of the immune system and deals with the physiological functioning of the immune system in both health and disease. These conditions include immune deficiency and immune mediated diseases.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level for Allergy and Immunology.

Level 1 Allergy and Immunology
No Level 1 service currently described.

Level 2 Allergy and Immunology

Service description
A Level 2 service provides a low-acuity, single-system medical condition ambulatory and outpatient service.

It is run by a registered medical practitioner or a GP with 24 hour access.

This service can be delivered in small rural hospitals, large GP practices or community health centres.

Service requirements
- Ability to perform basic PoCT
- Undertake allergy assessments
- Appropriate support from higher level Allergy and Immunology services within the network
- Access to advice to immediately avoid whilst waiting for further education

Workforce requirements
- 24 hours access to a registered medical practitioner or a GP to manage acute issues such as anaphylaxis
- Business hours access to allied health professionals expertise in allergy and immunology, as required

Level 3 Allergy and Immunology

Service description
A Level 3 service provides services at Level 2 plus provides inpatient and outpatient care.
Outpatient care can be provided by a registered medical practitioner or a GP or specialist with skills in allergy and immunology or a nurse or allied health professionals with specialist knowledge and skills in allergy and immunology.

**Service requirements**

As for Level 2 plus:

- Formal network linkage to higher level Allergy and Immunology service

**Workforce requirements**

As for Level 2 plus:

- Registered medical practitioner or GP with skills in allergy and immunology on-call 24 hours
- On-site RN 24 hours access for inpatient services
- Access to allied health professionals with specialist knowledge and skills in allergy and immunology, as required

**Level 4 Allergy and Immunology**

**Service description**

A Level 4 service provides services at Level 3 plus provides allergy and immunology care by a physician practicing in general medicine with experience in allergy and immunology.

A Level 4 service should be accredited by Australasian Society of Clinical Immunology and Allergy (ASCIA).

**Service requirements**

As for Level 3 plus:

- Inpatient care by physician practicing in general medicine with dual training or extensive experience in allergy and immunology
- On-site access to allied health service
- On-site allergy and immunology nurse-led education service
- Inpatient access to safe meals, medications etc. that are managed by suitably experienced staff
- Outpatient consultation by Clinical Allergy/Immunology Specialist via telehealth
- Formal network linkages with higher level Allergy and Immunology Service

**Workforce requirements**

As for Level 3 plus:
• On-site physician practicing in general medicine with dual training or extensive experience in allergy and immunology

• RNs with appropriate experience in allergy and immunology nursing; RNs may be supported by ENs in providing care to inpatients

• On-site allied health professionals with allergy and immunology expertise (e.g. dietitian, pharmacist, psychologist, social worker)

Level 5 Allergy and Immunology

Service description

A Level 5 service provides services at Level 4 plus provides inpatient care by a resident Clinical Allergy/Immunology Specialist.

Service requirements

As for Level 4 plus:

• An integrated multidisciplinary hospital/community allergy and immunology management service for the assessment and treatment of patients with allergy disorders, acquired and primary immunodeficiency disorders, and autoimmune disease

• Designated area for formal allergen challenge testing

• On-site specialised allied health services

Workforce requirements

As for Level 4 plus:

• Clinical Allergy/Immunology Specialist on-site

• Clinical Allergy/Immunology Specialist or physician practicing in general medicine with dual training in allergy and immunology on-site and on-call 24 hours

• Medical registrar on-site and on-call 24 hours

• Specialist Allergy and Immunology RN

• Specialised allied health professionals including dietitian, pharmacist, psychologist, social worker

Burns

Burns Service delivers positive outcomes for both adults and paediatric patients experiencing burn injury in Tasmania through best practice, and evidence based quality care. Burn injuries are for a lifetime and require specialised coordinated care through the State Burns Unit and Burns Service.

The Burns Service has the multi-disciplinary expertise and facilities available to manage both adult and paediatric across the range of depth and extent of burn injury without having to rely on other jurisdictions. The Burns Service has strong links across primary, public and private health facilities, providing both support and development to allow patients to be treated in their communities, where appropriate.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Burns

Service description

No level 1 service currently described.

Level 2 Burns

Service description

A Level 2 service provides ambulatory care services only. It has the capacity to manage minor burns, not requiring surgical intervention, that do not meet the criteria for transfer under the Tasmanian Burns Service Referral and Transfer Guidelines. All other burns are to be stabilised and transferred as per the Tasmanian Burns Service Referral and Transfer Guidelines.

Service requirements

- Formal network linkages with Level 5 Burns Service for consultation and advice
- Formal referral protocols established with higher level Burns services

Workforce requirements

- Registered medical practitioner or GP
- General Surgeon available for consultation
- Paediatrician available for consultation
- Access to allied health services including physiotherapy and occupational therapy
- On-site RNs who have undertaken the Tasmanian Burns Resource Nurse Program with current certificate

Level 3 Burns

Service description

A Level 3 burns service provides services at Level 2, plus provides immediate surgical management if required. A Level 3 service may admit patients for pain management and/or stabilisation prior to transfer as per the Tasmanian Burns Service Transfer and Referral Guidelines.

Service requirements

As for Level 2 plus:

- Access to general rehabilitation services
- Access to scar management service
- Access to liaison psychiatry

Workforce requirements

As for Level 2 plus:

- General Surgeon (≥3 years postgraduate) with experience on-call 24 hours
- On-site access to allied health services

Level 4 Burns

Service description

A Level 4 service provides services at Level 3, plus treats burns:

- Less than or equal to 10% Total Body Surface Area (TBSA) in adult patients that do not meet the criteria under the Tasmanian Burns Service Transfer and Referral Guidelines, and
- In children equal to or greater than 2 years old and involving less than or equal to 5% TBSA with no risk of airway compromise, that do not meet the criteria under the Tasmanian Burns Service Transfer and Referral Guidelines.

A Level 4 service also provides surgical management for burns that do not meet criteria for transfer under the Tasmanian Burns Service Transfer and Referral Guidelines.

Service requirements

As for Level 3 plus:

- Plastic Surgery Unit
- Operating theatre available 24/7
- Access to skin substitutes
- Contributes to Burns Registry of Australian and New Zealand (BRANZ) data collection
• Access to Level 4 Paediatric services

### Workforce requirements

As for Level 3 plus:

• Plastic surgeon on-call and available 24 hours
• Surgeon with experience in the use of skin substitutes

### Level 5 Burns

#### Service description

A Level 5 Burns service provides services at a Level 4, plus treats burns within capacity and in accordance with the agreed Tasmania Burns Transfer and Referral Guidelines following consultation with a Level 6 service (interstate).

A Level 5 service provides a comprehensive service including inter-hospital transfers for patients that meet the criteria for transfer under the Tasmanian Burns Service Transfer and Referral Guidelines, including back transfers.

#### Service requirements

As for Level 4 plus:

• Dedicated inpatient beds
• Operating theatre available 24/7
• Paediatric and Adult ICU on-site
• Coordinated statewide service including case-management by Burns CNC
• Links to Level 6 Plastics Surgery service and Level 5 Rehabilitation service
• Pain management services on-site
• Access to sub-specialty services on-site with consultation available including paediatric services, obstetrics and gynaecology services for adults, dental service for children, ENT, child and family psychiatry services, ophthalmology services
• Provides telehealth and digital imaging support to lower level services, including clinical advice, skills maintenance, and professional development support for staff
• Provides ambulatory burns clinics for referrals from lower level services, including wound management
• On-site specialised multidisciplinary allied health team
• Access to palliative care and pastoral care services
• Provides burns specific health promotion statewide
• Statewide teaching and research role which includes facilitation of the Tasmanian Burns Resource Nurse Program
• Co-ordinates data entry for BRANZ
• Key burns personnel have an active role within the Australian and New Zealand Burns Association (ANZBA), and networking opportunities as part of the Tasmanian Burns Service are fostered

Workforce requirements

As for Level 4 plus:

• Clinical Director Burns with relevant clinical experience
• Plastic Registrar available 24 hours
• Registered medical practitioner on-site 24 hours
• NP Burns
• CNC Burns
• Nephrologist and Emergency Medicine Consultants on-call 24 hours
• ENT Consultant and Senior Registrar on-call 24 hours
• 24 hour access to paediatric and adult ICU Consultants
• Specialist burns nursing staff on-site 24 hours (Emergency Management of Severe Burns (EMSB)) accredited
• On-site access to specialised Burns and Paediatric allied health services including dietetics, occupational therapy, physiotherapy, speech therapy, orthotics and prosthetics, play therapist/specialist, psychology and social work
• Resource allocated to data collection and upload to BRANZ

Level 6 Burns (Interstate)

The following burn injuries will be discussed on a case by case with the Level 6 interstate Burns Service and Level 5 Tasmanian Burns Service:

• greater than 40% TBSA in children,
• greater than 20% TBSA in children with associated trauma or inhalation injury, and
• greater than 50% TBSA in adults.

Once stabilised, transfer may be the recommended pathway for Burn Injuries.
Cancer
Cancer Services refer to the overall suite of specialised services delivered by health facilities in diagnosing and treating cancer and cancer survivors.

Cancer services should be part of an integrated model and the scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required for Medical Oncology, Radiation Oncology and Malignant Clinical Haematology. There are service interdependencies between each of these services.

Malignant Clinical Haematology
Haematology is the branch of medicine concerned with the study of blood, the blood-forming organs and blood diseases. This includes the overall suite of specialised services delivered by health facilities in diagnosing and treating haematological malignancy as well as non-malignant haematology. This service has interdependencies with Medical Oncology and Radiation Oncology.

Level 1 Malignant Clinical Haematology
No Level 1 service currently described.

Level 2 Malignant Clinical Haematology
No Level 2 service currently described.

Level 3 Malignant Clinical Haematology
No Level 3 service currently described.

Level 4 Malignant Clinical Haematology

Service Description
A Level 4 service has infrastructure that enables ambulatory haematology care to be provided to patients. This level of service provides outpatient consultative and day treatment services and provides only low-risk systemic therapy.

The service has links with a higher level Malignant Clinical Haematology service which coordinates the patient’s care and makes relevant treatment decisions. A visiting registered medical specialist with credentials in haematology provides on-site services.

Service requirements
- 24 hour access to higher level Malignant Clinical Haematological services for emergency advice
- A day treatment area for procedures that administers systemic therapy, biological agents and blood transfusions
- Administers systemic therapies under the supervision of a specialist medical practitioner with credentials in haematology
- Access to a central venous access service
- Access to a full blood bank service
• Access to designated allied health services including social workers, occupational therapists, physiotherapists, speech pathologists, psychological and emotional support services, palliative care and a nutrition team, as required

**Workforce requirements**

• Formal linkages with consultant haematologist
• RNs appropriately qualified and experienced in the administering and monitoring of systemic therapies
• Specialist pharmacist haematology/oncology

**Support service requirements**

**Level 5 Malignant Clinical Haematology**

**Service description**

A Level 5 service provides specialist haematologist inpatient and outpatient treatment services for patients with haematological diseases. A Level 5 service provides inter-disciplinary care in conjunction with other consultation services, including infectious diseases, pain services, palliative care, psychiatry, radiotherapy, medical imaging, nephrology, respiratory and surgical services.

This level service manages moderate to high risk systemic therapy protocols and may perform cell separation/plasmapheresis. The service is able to provide initial courses of systemic therapy and supervise subsequent maintenance courses.

A Level 5 service coordinates all definitive diagnostics and development of a plan for treatment, which may take place at a lower level, this level or a higher level Malignant Clinical Haematology service.

The service provides multidisciplinary management of haematology patients, including case conferences and the development of treatment plans. A Level 5 service does not perform stem cell transplantation.

**Service requirements**

As for Level 4 plus:

• Inpatient haematology care delivered by a multidisciplinary team
• On-site access to medical oncology, radiation oncology, infectious diseases, pain services, palliative care, psychiatry, medical imaging, nephrology, respiratory and surgical services
• Access to specialist haematology advice 24 hours
• On-site access to a radiotherapy unit for patient referral and transfer

**Workforce requirements**

As for Level 4 plus:

• Appointed haematologist
• Medical registrar on-site 24 hours
• Access to specialist medical practitioners with credentials in infectious diseases, pain, palliative care, psychiatry, radiation oncology, medical imaging, nephrology, respiratory medicine and surgical disciplines
• Staff trained, and with evidence of ongoing competency, in the collection of peripheral blood progenitor cells
• Specialist haematology RNs

Level 6 Malignant Clinical Haematology

Service description

A Level 6 service provides services at Level 5 plus autologous stem cell transplantation and inpatient and outpatient care by a specialised haematology-led multidisciplinary team.

Service requirements

As for Level 5 plus:
• Statewide referral role for some services
• Advanced haematological diagnostics and transfusion services provided by a laboratory accredited under relevant national accreditation body
• Autologous stem cell transplantation service accreditation under relevant national accreditation bodies
• 24 hour aphaeresis cover
• Dedicated standard isolation rooms
• May manage all high-risk and/or complex protocols, and deliver intensive chemotherapy protocols
• An accredited haematology training program
• Access to interventional radiology service, PET service and vascular service for management of venous and arterial thrombosis where appropriate
• Multidisciplinary meetings in malignant haematological disorders
• Active participation in clinical trials and research

Workforce requirements

As for level 5 plus:
• Clinical Haematologist on-site and on-call 24 hours
- Clinical Haematology registrar/Resident Medical Officer (RMO)
- Nurse Unit Manager (NUM) providing clinical leadership in haematology including in-reach and outreach
- RNs appropriately qualified and experienced in clinical haematology
- Clinical scientists on-site
- Designated transplant coordinator on-site
- Transfusion nurse

Medical Oncology

Medical Oncology is the component of cancer medicine that assesses patients with solid tumour cancer and manages their care, particularly through the use of systemic therapies. This service has interdependencies with Radiation Oncology and Malignant Clinical Haematology.

Level 1 Medical Oncology
No level 1 service currently described.

Level 2 Medical Oncology
A Level 2 service provides outpatient management and appropriate referral of patients by a registered medical practitioner or a GP for patients who are under the care of a Level 5 or Level 6 Medical Oncology service.

Level 2 services may participate in multi-disciplinary meetings regarding the patient’s management.

Level 3 Medical Oncology
As for Level 2, plus a Level 3 service provides outpatient management and appropriate referral of patients by a physician practicing in general medicine or equivalent for patients who are under the care of a Level 5 or Level 6 Medical Oncology service.

Level 4 Medical Oncology

<table>
<thead>
<tr>
<th>Service description</th>
</tr>
</thead>
</table>
As for Level 3, plus a Level 4 service that has infrastructure enabling on-site ambulatory chemotherapy to be provided to patients. This service has links with a higher level Medical Oncology service which coordinates the patient’s care and makes relevant treatment decisions.

A Level 4 service has a visiting medical oncologist and provides appropriately qualified and/or experienced RNs with specialist cancer care nursing knowledge and expertise, including in the administration of chemotherapy to ambulatory patients.

A Level 4 service can coordinate referral to a higher level Medical Oncology service for initial diagnosis and transfer to a higher level Medical Oncology service for the assessment and management of post treatment complications.

Service requirements

As for level 3 plus:

- Capacity to provide day treatment, with designated ambulatory day beds for treatment
- Visiting medical oncologist
- Formal linkages with higher level Medical Oncology service

Workforce requirements

As for level 3 plus:

- Access to medical oncologist in the network 24 hours, seven days a week via telehealth
- Access to visiting medical oncologist
- RNs with post graduate qualifications and/or nursing experience in medical oncology
- Specialist pharmacist haematology/oncology

## Level 5 Medical Oncology

### Service description

A Level 5 service provides all services at Level 4 plus some inpatient medical oncology care. A Level 5 service does not provide inpatient chemotherapy; however, patients with medical oncology care needs may be admitted as inpatients under the care of a physician practicing in general medicine.

This service has access to medical oncology multi-disciplinary teams, including at a higher service level.

### Service requirements

As for Level 4 plus:

- Service has formal linkages to Level 6 Medical Oncology service
- 24 hour access to specialist medical practitioners with credentials in medical oncology, radiation oncology, haematology, palliative care, pain management services and microbiology for advice and support within the network
- Appropriate network access to nuclear medicine

### Workforce requirements

As for level 4 plus:

- NUM providing clinical leadership in medical oncology
- Physician practicing in general medicine on-site and on-call 24 hours
- Access to designated allied health services including social workers, occupational therapists, physiotherapists, speech pathologists, psychological and emotional support services, palliative care and a nutrition team, as required
- RNs with post graduate qualifications and/or nursing experience in medical oncology; RNs may be supported by ENs in providing care to inpatients

Level 6 Medical Oncology

Service description

A Level 6 service provides all services at Level 5 plus delivery of inpatient systemic therapy, including intensive chemotherapy protocols. The service provides initial assessment, management and treatment plans for common malignancies, in collaboration with disease-specific surgeons, radiation oncologists, pathologists and supportive care specialties.

Service requirements

As for Level 5 plus:

- Oncology department
- Provides ambulatory and inpatient chemotherapy
- On-site radiotherapy, palliative care and pain management services
- Specialist medical oncology advice and support available 24 hours
- Access on-site to renal dialysis, respiratory, cardiology and infectious diseases services
- On-site access to specialist allied health professionals (social workers, dietitians, pastoral care)
- Site-specific (breast, lung and colorectal) and general oncology consultative services available
- Active participation in clinical trials and research
- Multidisciplinary meeting in major cancer streams

Workforce requirements

As for Level 5 plus:

- Medical oncology specialist on-site and on-call 24 hours
- Medical oncology registrar / RMO

Radiation Oncology

Radiation Oncology plays a major role in cancer treatment. Radiation therapy is either used alone or combined with surgery, chemotherapy, or other therapies in the curative or palliative treatment of cancer. This service has interdependencies with Medical Oncology and Malignant Clinical Haematology.

Level 1 Radiation Oncology
No Level 1 service currently described.

Level 2 Radiation Oncology
No Level 2 service currently described.

Level 3 Radiation Oncology
No Level 3 service currently described.

Level 4 Radiation Oncology
No level 4 service currently described.

Level 5 Radiation Oncology

Service description

A Level 5 service has at least one linear accelerator that enables on-site radiation treatment to be provided to patients.

The service has links with a higher level Radiation Oncology service. Clinical pathways will be developed in collaboration with the higher level service with some of the more complex cases referred to the higher level Radiation Oncology service. The Level 6 Radiation Oncology service provides the radiation planning component of the patient’s clinical pathway and may also need to support treatment in times of staff shortage to prevent patients having to travel.

Service requirements

- Accredited radiation oncology facility
- Radiation treatment provided on-site and supported by Level 6 service as required
- Planning for radiation treatment
- Visiting medical oncology service
- On-site palliative care
- 24 hour access to advice and support from a radiation oncologist
- Network access to medical oncology, palliative care, higher level Radiation Oncology services and nuclear medicine

Workforce requirements

- Specialist Radiation Oncologist
• Dedicated radiation therapists, RNs and radiation physicists with appropriate radiation oncology training and experience as determined by Level 6 Radiation Oncology service

### Level 6 Radiation Oncology

#### Service description

A Level 6 service provides all services at Level 5 plus it provides radiation oncology treatment services and facilities for planning on-site.

The service has on-site access to radiation oncologists, physicists and radiation therapists.

#### Service requirements

As for Level 5 plus:

- Multi-disciplinary patient management in designated cancer streams
- Access to PET service either on-site or through referral network
- Acute inpatient beds available on-site for specialised procedures and for supportive care
- Interstate access to total body irradiation and total skin electron beam therapy
- Interstate link to paediatric super-specialist facilities where children are treated
- Interstate links to adolescent and young adult specialty services
- Access to a clinical genetics/medical genetics service, including genetic counselling
- Active participation in clinical trials and research
- Access to specialised and complex Radiology Services
- On-site medical oncology, palliative care and pain management

#### Workforce requirements

As for Level 5 plus:

- Specialist medical practitioner with credentials in radiation oncology
- Radiation oncology registrars/RMOs
- RNs with appropriate post graduate qualifications and/or extensive experience in radiation oncology
- Radiation oncology medical physicists and radiation therapists on-site during operational hours
- On-site access to specialist allied health professionals (social workers, dietitians, speech pathologists, PEG service including dedicated nurse, stomal care nurses, psychological medicine, pastoral care, pharmacists)
- Access to Oncology Pharmacist

Cardiology

Cardiology Service involves the prevention, investigation, diagnosis, treatment and management of a range of cardiac diseases, e.g. coronary artery disease, valvular heart disease, arrhythmias, heart failure and adult congenital heart disease. Services can range from emergency care, to acute care, surgery, rehabilitation, ongoing care for chronic conditions, and palliative care.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Cardiology

Service description

A Level 1 service provides a low-acuity, ambulatory care for minor cardiac diseases and management of acute conditions with the ability to provide acute resuscitation.

It should provide health promotion/disease prevention and chronic disease management programs. This service would normally be delivered by registered medical practitioner or GP in an outpatient setting and may incorporate nurse-led services.

Service requirements

- Access to / integration into a statewide Acute Coronary Syndrome (ACS) management pathway
- Provision of basic cardiovascular risk factor/disease prevention information

Workforce requirements

- A registered medical practitioner, GP or RNs with appropriate post graduate qualifications and/or experience; RNs may be supported by ENs in providing care to inpatients.

Level 2 Cardiology

Service description

A Level 2 service provides services at Level 1 but in addition provides a low-acuity, single-system medical condition ambulatory and outpatient service.

It is run by registered medical practitioner or GP with 24 hour access.

This service will be delivered in small community hospitals, large GP practices or rural health centres.

Service requirements

As for Level 1 plus:

- Has digital ECG machine with appropriate support from higher level Cardiology services within the network to safely and effectively operate and maintain equipment
- Ability to perform PoCT
- Appropriate support from higher level Cardiology services within the network
- Access to pathology / medical imaging in a short timeframe
- Access to Automated External Defibrillator (AED), oxygen and the ability to achieve venous access
• Specialist allied health/nursing staff community rehabilitation

**Workforce requirements**

As for Level 1 plus:

• 24 hours access to a registered medical practitioner
• Access to visiting allied health professionals during business hours, as required

**Support service requirements**

**Level 3 Cardiology**

**Service description**

A Level 3 service provides services at Level 2 plus ambulatory and non-acute services.

Outpatient care is accessible by a visiting registered medical practitioner, general internal medicine specialist or cardiologist or via telehealth.

Patients with acute cardiac care needs are transferred to a higher level Cardiology service.

**Service requirements**

As for Level 2 plus:

• Provides outpatient, ambulatory and non-acute care led by a cardiologist and supported by visiting medical specialists and / or via telehealth
• Elective diagnostic investigations performed
• Provides thrombolysis and blood gas monitoring
• Ability to provide close care and monitoring at the bedside with appropriate facilities and appropriately trained nursing staff in place
• Linkages to specialist medical services from a higher level Cardiology service within the network
• Formal referral protocols established with higher level Cardiology services
• Links to Cardiac NP

**Workforce requirements**

As for Level 2 plus:

• On-site 24 hour access to a registered medical practitioner or registered medical specialist
• 24 hour cover by RNs/ENs
• Access to cardiologists in the network
• On-site access to some allied health services during business hours including physiotherapy
• Access to Cardiac Rehabilitation Nurse
• Access to Cardiac NP or Clinical Nurse Specialist (Cardiac/Health Promotion)

**Level 4 Cardiology**

**Service description**

A Level 4 service provides services at Level 3 plus inpatient cardiology care by a registered medical practitioner practicing in general medicine and/or non-interventional cardiologist.

Outpatient consultation is provided by a cardiologist.

**Service requirements**

As for Level 3 plus:

• Capability and capacity to deliver multi-disciplinary team based care to cardiology patients
• Provides a range of inpatient and outpatient cardiology services including transthoracic echocardiography, cardiac event monitoring, ambulatory blood pressure monitoring, implantable cardiac device checks, and exercise stress testing
• Provides cardiac rehabilitation and preventative patient cardiac education
• Discrete area within the facility for provision of level of care more intensive than ward based care (e.g. may be CCU, HDU or ICU)
• Performs non-invasive monitoring
• Formal referral protocols established with higher level Cardiology services
• Can provide resuscitation and stabilisation of emergencies until transfer or retrieval to higher level facility

**Workforce requirements**

As for Level 3 plus:

• Registered medical specialist with experience in cardiology, on-call 24 hours
• Access to anaesthetist
• Outpatient cardiologist service provided by outreach but would include review of inpatients by visiting cardiologist
• Formal liaison with higher Level 6 Cardiology service
• In-hours access to allied health services appropriate to the level of cardiology services being provided (local, visiting or via telehealth dependent on availability and clinical appropriateness), including psychology, dietetics and social work
• On-site emergency medicine specialist
• Cardiac Rehabilitation Nurse
• Cardiac NP or Clinical Nurse Specialist (Cardiac/Health Promotion)

Level 5 Cardiology

Service description

A Level 5 service provides cardiology services at Level 4 plus a full range of cardiac services through a dedicated cardiology department including emergency services and on-site cardiac catheterisation laboratory. A Level 5 service caters for the complex cardiology medical care. The service is usually provided at a general hospital by a multi-disciplinary team available 24 hours and has a network referral role.

Service requirements

As for Level 4 plus:

• On-site CCU capable of providing a dedicated ward area for patients requiring cardiac monitoring and/or resuscitation, with appropriate levels of staff and specialised resources including monitoring equipment and appropriate investigations

• Provides a range of cardiology of diagnostic services including, CT coronary angiography, transthoracic echocardiograph, stress echocardiogram, transeosophageal echocardiography cardiac event monitoring, ambulatory blood pressure monitoring, implantable cardiac device checks, tilt table testing and functional assessment

• Access to on-site central haemodynamic monitoring capacity

• On-site diagnostic coronary angiography, permanent pacemaker, percutaneous revascularisation and angioplasty

• Provides a range of outpatient services, coronary risk factor clinics as well as cardiac rehabilitation and preventive patient education programs

• Paediatric liaison service and shared care model with Royal Melbourne Hospital for Adult Congenital Heart Disease

• A comprehensive heart failure service with a NP

• Formal links to cardiothoracic service and Level 5 Respiratory service

• Specialist consultation or diagnosis provided by telehealth to smaller sites and services

• Formal liaison with Level 6 Cardiology service

• Provides specialist consultation and diagnosis to lower level services

• May have research role

• Clinical audit and monitoring
Outreach provided to lower level services

**Workforce requirements**

As for Level 4 plus:

- 24/7 cover by an Interventional Cardiologist
- Cardiology registrar (advanced trainee)
- RMO or intern in cardiology
- Medical registrar on-site 24 hours
- CNC providing clinical leadership in cardiology
- RNs with appropriate post graduate qualifications and/or extensive experience in cardiac nursing
- Heart Failure NP
- Designated multi-disciplinary Cardiac Rehabilitation service
- 24/7 access to relevant allied health service provision including physiotherapy
- A full complement of cardiac technicians for echocardiography with 24/7 on-call roster and pacing services

**Support service requirements**

**Level 6 Cardiology**

**Service description**

A Level 6 service provides services at Level 5 plus a full range of cardiac services through a dedicated cardiology department including emergency services and on-site cardiac catheterisation laboratory. A Level 6 service caters for the most complex cardiology medical care. The service is usually provided at a large referral hospital by a multi-disciplinary team available 24 hours and includes an interstate referral role.

**Service requirements**

As for Level 5 plus:

- Full range of cardiology services, with dedicated cardiology department, emergency care, diagnostic and interventional cardiology services with on-site cardiac catheter laboratory, on-site cardiothoracic surgery and cardiac rehabilitation services
- Able to deal with highly complex diagnostic and treatment procedures in consultation with other specialties
- Provides implant and follow up service for complex cardiac devices
- Provides statewide pulmonary hypertension service
• May provide an electrophysiology service (EPS) including radiofrequency ablation and a structural heart disease program including Trans-aortic valve implant (TAVI)
• Capable of providing an adult congenital disease service
• Cardiac MRI and cardiac PET scanning services available on-site
• On-site cardiothoracic surgery
• Access to invasive cardiovascular monitoring on-site
• Statewide referral role
• Provides clinical advice, education and training to lower level services via telehealth
• Active research role
• Clinical audit and monitoring

Workforce requirements

As for Level 5 plus:
• Staff Specialist in cardiology on-site and on-call 24 hours
• Cardiology Registrars (advanced trainees) on-site and on-call 24 hours
• Cardiology RMO or intern
• NP providing high level nursing expertise in cardiac care/cardiac rehabilitation
• Senior allied health professionals including physiotherapists with advanced specialty skills and involved in education and research appropriate to their specialty, as required

Cardiothoracic Surgery

Cardiothoracic surgery is the field of medicine related to the surgical treatment of diseases of the chest, particularly surgery of the heart and lungs.

Services can range from emergency and trauma care to elective surgery for chronic heart, lung and chest conditions.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Cardiothoracic Surgery
No Level 1 service currently described.

Level 2 Cardiothoracic Surgery
No Level 2 service currently described.

Level 3 Cardiothoracic Surgery
No Level 3 service currently described.

Level 4 Cardiothoracic Surgery
No Level 4 service currently described.

Level 5 Cardiothoracic Surgery

Service description
A Level 5 Service may provide pre-operative and post-operative cardiothoracic surgical services on-site by a visiting cardiothoracic surgeon. A Level 5 Service has on-site cancer, palliative care and pain management services.

Service requirements
- Radiation oncology and medical oncology available on-site
- Palliative care and pain management services available on-site
- On-site ICU/CCU
- Access to specialised allied health services

Workforce requirements
- Visiting cardiothoracic surgeons
- On-call cardiothoracic surgeons available 24 hours
- General surgeon on-site and on-call 24 hours
- Specialist anaesthetists on-site
• Medical oncologist, radiation oncologist, palliative care physician, pain medicine specialist on-site
• Access to CNC providing high level nursing expertise to a collaborative model of interdisciplinary care
• Access to designated allied health services appropriate to the level of cardiothoracic services being provided

**Support service requirements**

**Level 6 Cardiothoracic Surgery**

**Service description**

A Level 6 service provides services at Level 5 plus the service is able to deal with high complex diagnosis and treatment in association with other specialities. It has a statewide referral role, research role and undergraduate and post graduate teaching role.

Level 6 Cardiothoracic Services in Tasmania do not provide heart and lung transplantation services.

**Service requirements**

As for Level 5 plus:

- Statewide referral role and pathways established to refer patients for elective and urgent cardiothoracic surgical procedures
- Elective and emergency thoracic and cardiothoracic procedures by on-site cardiothoracic surgeons
- Able to deal with highly complex diagnosis and treatment in association with other specialties
- Ability to provide intra-aortic balloon pump and extra corporeal membrane oxygenation [ECMO] facility by having perfusion and support services available 24 hours
- Research role

**Workforce requirements**

As for Level 5 plus:

- At least 2 fully trained cardiac surgeons accredited by the RACS available 24 hours
- Cardiothoracic registrar/RMO available 24 hours
- A cardiac anaesthetist – one for every 100 adult cases treated
- At least 2 cardiac medical and/or clinically accredited perfusionists
- At least 2 Registrars/Fellows/Trainees with additional resident medical staff including interns
- ICU specialists on-site. They should be supported by registrars or junior staff (year 3 or above in training) 24 hours for ICU management
• Appropriately qualified and experienced nursing staff in operating theatres, intensive care units, wards and in rehabilitation services along with dedicated nurse managers
• CNC/NP providing leadership within a collaborative model of interdisciplinary care.
• Physiotherapists and allied health services, and cardiac rehabilitation services
• Actively practising medical specialists in the following specialities should be available at all times for clinical consultation:
  o Cardiologists
  o Haematologists
  o General surgeons
  o Urologists
  o Respiratory physicians
  o Neurologists
  o Neurosurgeons
  o Nephrologists
  o Endocrinologists
  o Infectious diseases consultants
  o ENT specialists
  o Dental surgeons
  o Vascular surgeons
• On-call rosters for echocardiographers, radiographers, pacemaker technician, biomedical engineers
• Audit manager, educators and data collectors
• Appropriately qualified and experienced liaison nurse with a statewide co-ordination role

Child and Adolescent Mental Health Acute Inpatient

Child and adolescent mental health services (CAMHS) are specialist multidisciplinary services for infants, children, adolescents and their families between the age of 0 and 18 years, who present with severe and complex mental health problems that cause functional impairment and have an adverse impact on social and emotional development or risk of harm. As well as the provision of specialist care, CAMHS will provide support for other service sectors to provide mental health services to children with mild to moderately severe problems.

The definition is underpinned by the following principles:

- Promotion of social inclusion and recovery in intervention services;
- Enhancing prevention and early intervention services;
- Improving access co-ordination and continuity of care within service systems; and
- Strengthening research and performance monitoring.

Level 1 Child and Adolescent Mental Health Acute Inpatient

No Level 1 service currently described.

Level 2 Child and Adolescent Mental Health Acute Inpatient

Service description

A Level 2 service is capable of providing limited short-term (up to 72 hours) or intermittent inpatient mental health care to low-risk/complexity voluntary mental health consumers up to 18 years (time frames beyond this require specific consultation with higher level Child and Adolescent Mental Health Acute Inpatient Service that will contribute in ongoing manner to case review and management).

Care is delivered predominantly by team of general health clinicians within a hospital that does not have dedicated mental health staff (on-site) or allocated beds. Consumers are admitted by registered medical practitioner.

Service provision typically includes assessment, brief interventions and monitoring; consumer and carer education and information; documented case review; consultation-liaison with higher level mental health services; and referral, where appropriate.

Service requirements

- Provides general healthcare and some limited mental health care 24 hours a day
- Identification, initial acute assessment, brief intervention and monitoring of uncomplicated mental health problems
- Development of care plan
- Medication management
- Forward referrals for expert assessment, diagnosis and intervention as required
• Limited psychoeducation (including information about available mental health services, mental health problems and illnesses, indicated treatment options and support services)

• Additional mental health interventions may be directly provided by mental health clinicians using telehealth facilities, visiting and/or community-based workforce

• Daily care coordinated by a registered medical practitioner or GP who has access to registered medical specialist with credentials in psychiatry and certificate in child and adolescent psychiatry (or equivalent) to assist and guide assessment, treatment, case management and case review (may be via telehealth)

• Assessments and interventions conducted in consultation with child and adolescent mental health clinician where clinically indicated, and associated with documented review process

• Documented processes with Level 5 or 6 Child and Adolescent Mental Health Acute Inpatient Service

• Considers necessity of parent / carer being admitted with child aged 5 years and younger

• Medical services provided on-site or in close proximity to provide rapid response at all times

**Workforce requirements**

• Registered medical practitioner or GP

• Access to registered medical specialist with credentials in psychiatry and certificate in child and adolescent psychiatry (or equivalent)

• RNs with appropriate post graduate qualifications and/or experience in child and adolescent mental health nursing

• Access during business hours to allied health professionals

• Assistants-in-nursing (AINs) or equivalent may support clinical team at discretion of nurse in charge (however titled)

• Bachelor of Nursing students (second or third year undergraduate) may support clinical team at discretion of nurse in charge (however titled) and under RN supervision

**Support service requirements**

**Level 3 Child and Adolescent Mental Health Acute Inpatient**

**Service description**

A Level 3 service is capable of providing short and medium term (1 week to 10 days) or intermittent inpatient mental health care to low-risk/complexity voluntary mental health consumers up to 18 years (time frames beyond this require specific consultation with higher level acute inpatient service for Child and Adolescent Mental Health who will continually contribute to case review and management).
Care is delivered predominantly by team of general and children’s health professionals within hospital that has paediatric unit or beds. A Level 3 service does not have allocated mental health beds or staff on-site.

Consumers are admitted by registered medical practitioner or registered medical specialist with credentials in paediatrics.

Service provision typically includes assessment, interventions and monitoring; consumer and carer education and information; documented case review; consultation-liaison with higher level mental health services; and referral, where appropriate.

**Service requirements**

As per Level 2, plus:

- Provides mental health care for high prevalence mental conditions 24 hours a day
- Identification, acute assessment, intervention and monitoring of mental health problems (that may be associated with simple comorbidities and/or resistance to treatment)
- Daily care coordinated by registered medical practitioner, GP or registered medical specialist with credentials in paediatrics who has access to registered medical specialist with credentials in psychiatry and certificate in child and adolescent psychiatry (or equivalent) to assist and guide assessment, treatment, case management and case review (may be via telehealth)
- Limited range of primary (e.g. parenting support) and secondary (e.g. weight management) prevention services
- Basic clinical data collection to inform assessment, diagnosis, intervention and recovery
- Psychoeducation (including information about available mental health services, mental health problems and illnesses, indicated treatment options and support services)
- Access to perinatal health services

**Workforce requirements**

As per Level 2.

**Level 4 Child and Adolescent Mental Health Acute Inpatient**

**Service description**

A Level 4 service is capable of providing short- to long-term (4 to 6 weeks) or intermittent inpatient mental health care to low- and moderate-risk/complexity voluntary and, if authorised to do so, involuntary mental health consumers up to 18 years (time frames beyond this require specific
consultation with higher level Child and Adolescent Mental Health Acute Inpatient service that will contribute in ongoing manner to case review and management).

Care is delivered predominantly by a team of mental health clinicians and children’s health professionals within hospital that has allocated mental health beds for children and/or adolescents. Consumers are admitted under registered medical specialist with credentials in psychiatry and certificate in child and adolescent psychiatry (or equivalent).

Service provision typically includes multidisciplinary assessment, targeted interventions and monitoring; consumer and carer education and information; documented weekly case review; appropriate group programs; consultation-liaison with higher level mental health services; and referral, where appropriate.

**Service requirements**

As per Level 3, plus:

- Provides mental health care 24 hours a day
- Flexible use of paediatric and mother-baby beds co-located with inpatient psychiatric services
- Identification, ongoing assessment, monitoring and interventions for mental health problems (that may be associated with comorbidities and/or indicators of treatment resistance)
- Integrated approach to identification, assessment and intervention of any co-occurring substance-use disorders
- Development of comprehensive individual mental health recovery plans within 1 week of assessment
- Daily care coordinated by registered medical specialist with credentials in psychiatry who has 24 hours access to registered medical specialist with credentials in psychiatry and certificate in child and adolescent psychiatry (or equivalent) to assist and guide assessment, treatment, case management and case review (may be via telehealth)
- May be an authorised mental health service under *Mental Health Act 2000*
- Comprehensive clinical data collection to inform assessment, diagnosis, intervention and recovery
- Range of primary (e.g. parenting support) and secondary (e.g. weight management) prevention services
- Psychoeducation for consumer and family / carer (including information about available mental health services, mental health problems and illnesses, indicated treatment options and support services)
- Documented processes and collaborative partnerships established with schools, education networks and service providers

**Workforce requirements**

As per Level 3, plus:

- 24 hour access to a registered medical specialist with credentials in psychiatry and certificate in child and adolescent psychiatry (or equivalent)
• Two or more RN per shift qualified and experienced in mental health. If inpatient unit occupancy is low, only one RN per shift

• Access during business hours to community or hospital based allied health staff with qualifications and/or experience in mental health

• Access to some on-site and/or visiting specialties in health / mental health

### Level 5 Child and Adolescent Mental Health Acute Inpatient

#### Service description

A Level 5 service is capable of providing short to long term and intermittent inpatient mental health care to low, moderate and high risk/complexity voluntary and involuntary mental health consumers up to 18 years 24 hours a day.

Care is delivered predominantly by child and adolescent mental health professionals within dedicated child and adolescent mental health unit.

Service provision typically includes multidisciplinary assessment and targeted interventions by mental health professionals; consumer and carer education and information; documented weekly case review; group programs; extensive primary and secondary prevention programs; consultation-liaison with higher and lower level mental health services; and referral, where appropriate.

#### Service requirements

As per Level 4, plus:

• Designated child and adolescent inpatient mental health beds

• Identification, ongoing assessment, monitoring and interventions for mental health problems ranging in risk and complexity (that may be associated with complex comorbidities and/or indicators of treatment resistance)

• Targeted clinical programs for individuals / groups / families / carers (e.g. group therapy for families / carers of patients with psychotic illness)

• Extensive range of primary (e.g. parenting support) and secondary (e.g. weight management) prevention services

• Authorised mental health service under Mental Health Act 2000

• As clinically indicated, ECT services may be facilitated and/or provided by mental health service authorised to provide ECT under Mental Health Act 2000, and under care of registered medical specialist with credentials in psychiatry and certificate in child and adolescent psychiatry (or equivalent), and in accordance with Mental Health Act 2000
May provide a range of additional clinical programs and service components, such as telehealth services or a day program

**Workforce requirements**

As per Level 4, plus:

- Qualified and/or experienced RN in charge of each shift with extensive skills appropriate to service being provided
- Majority of unit nursing staff have mental health qualifications and/or experience, and/or qualifications and/or experience in child and adolescent mental health, and/or children’s health
- Access during business hours to community or hospital based allied health staff with qualifications and/or experience in child and adolescent mental health (postgraduate qualifications desirable)
- Access to psychology, social work, occupational therapy, speech pathology and dietetic services
- Access to dedicated pharmacy services for mental health
- Access to extensive range of on-site and/or visiting specialties in health/mental health
- May have hospital based school teacher dedicated to mental health consumer

**Level 6 Child and Adolescent Mental Health Acute Inpatient**

**Service description**

A Level 6 service is capable of providing short to long term and intermittent inpatient mental health care 24 hours a day to voluntary and involuntary mental health consumers up to 18 years who present with highest level of risk and complexity.

Consumer group may be targeted population with special care needs who may demonstrate extreme comorbidities and/or indicators of treatment resistance.

Highly specialised and/or statewide inpatient service delivered from child / adolescent hospital that incorporates dedicated mental health unit or may be delivered from purpose designed and built mental health facility.

Care is delivered by a highly specialised, multidisciplinary team of child and adolescent mental health professionals.

A Level 6 service has statewide and/or interstate health service functions. It demonstrates specialist expertise in delivery of mental health services to a patient group that cannot be safely and effectively cared for in any other level of acute inpatient mental health service.
Service provision includes multidisciplinary assessment and specialised interventions by mental health professionals; consumer and carer education; documented daily case review; targeted group programs; all levels of prevention programs / services; consultation liaison with lower level mental health services; and referral, where appropriate.

Service requirements

As per Level 5, plus:

- Identification, ongoing assessment, monitoring and interventions for complex mental health problems (that may be associated with most complex comorbidities and/or indicators of treatment resistance)
- Extensive clinical data collection to inform assessment, diagnosis, intervention, recovery and broader service delivery in all levels of service
- Extensive range of primary (e.g. parenting support), secondary (e.g. weight management) and tertiary (e.g. psychosis treatment maintenance) prevention services
- Statewide clinical forums to assist dissemination of clinical expertise
- Separate clinical services for families / carers, if required
- Specialist consultation-liaison to other health and non-health services / agencies for target population
- Psychoeducation for consumer, families / carers and groups (including information about available mental health services, mental health problems and illnesses, indicated treatment options and support services)
- Forms part of integrated mental health service and is based in a network that also includes Child and Adolescent Mental Health Ambulatory Service
- May provide extensive range of additional clinical programs and service components, such as an outreach service, telehealth services or day program
- Medical services provided on-site or in close proximity to provide rapid response at all times

Workforce requirements

As per Level 5, plus:

- 24 hours access to registered medical practitioner (psychiatry registrar / principal house officer / senior medical officer / career medical officer) with credentials relevant to the discipline
- Extended-hours access to community or hospital based allied health staff with qualifications and experience in child and adolescent mental health
- Access to extensive range of on-site and/or visiting specialties in children’s health
- Access to on-site school with school teachers who can provide range of educational services dedicated to children and/or adolescents with mental illness

Clinical Genetics

The Clinical Genetics Service provides diagnosis, medical management advice, genetic testing, genetic counselling and support for individuals and families affected by a wide range of genetic conditions.

This is a statewide service operating from a single site with outreach services.

Service description

The Clinical Genetics Service is an out-patient service providing consultations on diagnosis, testing, counselling and management of genetic conditions across the following areas:

- Paediatric syndromes, including developmental delay and intellectual disability
- Adult onset inherited neuro-muscular, skeletal and cardiac conditions
- Risk assessment and carrier testing for inherited genetic disorders
- Prenatal diagnosis for inherited genetic disorders
- Diagnosis and counselling when a birth defect is detected during pregnancy
- Familial cancer syndromes Chromosomal disorders
- Metabolic disorders
- Abnormal newborn screening results for cystic fibrosis

Service requirements

- Access to appropriate clinic space for consultations at each acute hospital site in all three regions of the state
- Access to telehealth facilities
- Suitable office accommodation, with space for storage of genetic files, and including privacy or sound proofing for provision of telephone counselling by genetic counsellors
- Access to Cytogenetics and Molecular Pathology Laboratories (intrastate or interstate)
- Access to and linkages with neonatology, maternity, oncology and gynaecological oncology and gastroenterology Services
- An independent patient database program, which is able to store medical information in family files and is capable of operating the reminder service provided by the Familial Cancer Registry
- Dedicated software program for drawing family trees (pedigrees) such as Progeny
- Education/Training and Professional Development opportunities for Clinical Geneticists, Genetic Counsellors and Associate Genetic Counsellors

Workforce requirements

- Clinical Geneticist/s
- Genetic Counsellor with full certification in Genetic Counselling by the Human Genetics Society of Australasia to enable supervision of Associate Genetic Counsellors in training
- Associate Genetic Counsellors on-site
- Data manager with expertise in management of genetic databases and pedigree drawing software
- Administrative support for clinic organisation and appointment scheduling

Ear, Nose and Throat

Ear, Nose and Throat (ENT) Surgical Services treat diseases, injuries or deformations of the ears, nose, throat, head and neck areas. ENT surgical services encompass a broad range of complexity from uncomplicated day procedures and elective surgery to highly complex cases including intracranial procedures.

Higher level ENT services work in close partnership with other specialist medical and surgical services. In particular patients with complex ENT problems may require radiotherapy and plastic and reconstructive surgery to maximise the quality of the care they receive. Patients with complex ENT problems may also require specialist allied health support from audiology, speech pathology, dietetics and physiotherapy services.

The scope of this Framework describes the surgical services, their requirements and the minimum staffing needs and clinical support services required within each level.

May provide surgical procedures on children (refer to Paediatric Surgery Service Framework within this document).

Level 1 Ear, Nose and Throat

No Level 1 service currently described.

Level 2 Ear, Nose and Throat

No Level 2 service currently described.

Level 3 Ear, Nose and Throat

Service description

A Level 3 service provides ENT surgery for low risk patients undergoing SCI to SCIII procedures (refer to General Surgical Services framework). Surgery is performed by visiting ENT surgeon.

Service requirements

- At least one operating/procedure room with separate recovery area/room for post-operative care

Workforce requirements

- Visiting ENT surgeon
- On-site diagnostic audiology services for children and adults
- Registered medical practitioners or a GP credentialed to administer anaesthetic
- RNs with appropriate post graduate qualifications and/or experience in post-operative nursing; RNs may be supported by ENs in providing care to inpatients
- Medical, anaesthetic and nursing pre-admission services
- 24 hour access to a registered medical practitioner or a GP (on-site or on-call)
• Access to some allied health services

**Level 4 Ear, Nose and Throat**

**Service description**

A Level 4 service provides services at Level 3 plus surgery for low to moderate risk patients undergoing SCI to SCIII ENT procedures (refer to General Surgical Services framework). Surgery is performed by specialist ENT surgeons. No neuro-optic or intracranial surgery is performed.

**Service requirements**

As for Level 3 plus:

- Designated acute surgical inpatient unit with RNs/ENs with appropriate post graduate qualifications and/or experience in peri-operative and post-operative nursing

**Workforce requirements**

As for Level 3 plus:

- ENT surgeon on-site
- Surgical registrar on-call 24 hours
- Consultant anaesthetist on-site and on-call 24 hours
- Anaesthetics registrar on-call 24 hours
- Access to designated allied health services, including speech pathology

**Level 5 Ear, Nose and Throat**

**Service description**

A Level 5 service provides services at Level 4 plus surgery is performed on low to high anaesthetic risk patients undergoing SC IV and SCV ENT procedures (refer to General Surgical Services framework). Generally, a combination of procedures with a low to high level of complexity and risk are performed, and management of some patients with comorbidities and risk of intra- and post-operative complications occurs.
Surgery is performed by one or more specialist ENT surgeons with the ability to support patients in the post-operative stage 24 hours.

### Service requirements

As for Level 4 plus:

- On-site ICU
- On-site plastic surgery service
- On-site medical oncology, radiation oncology and palliative care services
- May provide specialty ENT surgical training

### Workforce requirements

As for Level 4 plus:

- ENT surgeon on-site and on-call 24 hours
- Surgical RNs with specialist ENT expertise
- On-site plastic surgery, medical oncology, radiation oncology and palliative care specialists
- On-site allied health staff, including audiology, speech pathology, dietetics and physiotherapy
- Access to a CNC specialising in ENT and providing leadership for the service

### Level 6 Ear, Nose and Throat

#### Service description

A Level 6 service provides all services at Level 5 plus the service has the ability to deal with a full range of complex cases in association with other specialists including neuro-optic and intracranial procedures.

#### Service requirements

As for Level 5 plus:

- On-site neurosurgical services
- Coordinates statewide cochlear implant service delivery face to face and / or via telehealth

#### Workforce requirements

As for Level 5 plus:

- Neurosurgeon on-site; and on-call 24 hours
- Neurosurgical registrar on-site 24 hours
- Allied health professionals available 24 hours, as required
• Allied health staff with specialist skills in the assessment and ongoing management of patients with cochlear implants, including specialist audiology, speech pathology and social work

• Audiometry service

Emergency Medicine

Emergency Medicine is the clinical specialty that is dedicated to the diagnosis and treatment of unforeseen illness or injury.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Emergency Medicine

Service description

A Level 1 service provides basic life support by an RN with access to a registered medical practitioner or GP for attendance at the facility within 30 minutes.

Service requirements

- Basic emergency equipment as referenced in “Tasmania’s Rural Hospitals – 2016’ Report
- Classified as a Tier 2 facility or equivalent as referenced in “Tasmania’s Rural Hospitals – 2016’ Report
- Designated emergency care area
- Local paramedic ambulance service
- Formalised transfer protocols with Ambulance Tasmania for rapid retrieval and transport
- Access to telehealth services

Workforce requirements

- On-site RN 24 hours for basic life support
- Access to a registered medical practitioner or GP (Tier 2) under the relevant Practitioner’s Agreement

Level 2 Emergency Medicine

Service description

A Level 2 service provides services at a Level 1, plus provides 24 hour advanced life support by an RN with access to a registered medical practitioner or GP, and/or paramedic for attendance at the facility within 15 minutes.

Service requirements

As for Level 1 plus:

- Extra emergency equipment available as referenced in “Tasmania’s Rural Hospitals – 2016’ Report
- Classified as a Tier 1 facility or equivalent as referenced in “Tasmania’s Rural Hospitals – 2016’ Report
- Access to retrieval services for urgent transfer of patients to higher level Emergency Medicine service
Workforce requirements

As for Level 1 plus:

- Access to a registered medical practitioner or GP (Tier 1) under the relevant Practitioner’s Agreement
- On-site RN 24 hours for advanced life support

Level 3 Emergency Medicine

Service description

A Level 3 service provides services at level 2, plus on-site emergency treatment for low risk patients with uncomplicated minor acute illnesses without the need for referral to a higher level Emergency Medicine service and for the initial management of sick patients pending referral and transport to a higher level facility. A level 3 service does not manage major trauma.

Ambulance Tasmania patients are not managed on-site with the exception of suspected acute coronary syndrome and subacute patients.

Service requirements

As for Level 2 plus:

- Formal linkage with higher level Emergency Medicine services within the network
- Emergency department with resuscitation bays
- On-site short stay unit
- Access to critical care facilities within the network

Workforce requirements

As for Level 2 plus:

- Medically staffed by GPs, Australian College of Rural and Remote Medicine (ACRRM) specialists, ACRRM trainees or registered medical practitioner with postgraduate training in emergency medicine
- Fellow of the Australasian College of Emergency Medicine (ACEM) for clinical governance and education and training on-site during business hours
- RMO in emergency department 24 hours on-site
- On-site RNs with emergency medicine experience available 24 hours

Level 4 Emergency Medicine

Service description

A Level 4 service provides services at Level 3, plus is medically staffed by emergency physicians with on-call access to emergency physicians 24 hours.

Service requirements

As for Level 3 plus:

- On-site HDU or ICU
- Accredited for advanced training with the ACEM
- May have a NP (Emergency)

Workforce requirements

As for Level 3 plus:

- Emergency physicians on-site 16 hours a day and on-call 24 hours
- RNs with experience and/or post graduate qualifications in emergency nursing on-site 24 hours
- Emergency registrars/RMOs on-site 24 hours
- General surgeon on-site and on-call 24 hours
- General medicine specialist on-site and on-call 24 hours

Level 5 Emergency Medicine

Service description

A Level 5 service provides services at Level 4, plus has access to on-site interventional cardiology and critical care medicine services 24 hours.

Service requirements

As for Level 4 plus:

- On-site ICU
- On-site interventional cardiology service
• Accepts transfers from other hospitals in the region

**Workforce requirements**

As for Level 4 plus:

• General medicine specialist on-site and on-call 24 hours

• Critical care medicine specialist on-site/on-call after-hours

• On-site intervention cardiology services on-site / on-call 24 hours

• CNC providing clinical leadership in emergency care

• CNE to support undergraduate and postgraduate nursing students and skill development of nurses

• Specialist pharmacist, emergency

Endocrinology

Endocrinology is the branch of medicine that deals with the medical aspects of hormones and their associated diseases and conditions. The minimum service and workforce requirement for a Tertiary Diabetes Centre is outlined below.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Endocrinology
No Level 1 service currently described.

Level 2 Endocrinology
No Level 2 service currently described.

Level 3 Endocrinology

Service description
A Level 3 service provides registered medical practitioner or GP inpatient and outpatient care.
Outpatient care can be provided by an endocrinologist, a medical officer or specialist with skills in endocrinology or a diabetes nurse educator.

Service requirements
- Inpatient hospital beds
- Formal linkage with all higher level Endocrinology services
- Formal access to diabetes educators

Workforce requirements
- GP on-call 24 hours
- On-site RN 24 hours for inpatient services

Support service requirements

Level 4 Endocrinology

Service description
A Level 4 service provides endocrinology care by an endocrinologist or physician practicing in general medicine with dual training in endocrinology.
A component of a level 4 service is a designated Diabetes Centre accredited by the National Association of Diabetes Centre.
A Diabetes Centre provides inpatient care as well as ambulatory (outpatient) multidisciplinary care for individuals with a clinical diagnosis of diabetes. The Centre aims to bridge the gap between acute hospital care and primary care within the community, including the prevention of hospitalisation.

The Diabetes Centre does not need to operate from a single site. The service and workforce requirements will require a close interrelationship with each of the hospital sites to which the Diabetes Centre is attached.

The primary role of the Diabetes Centre is to optimise health outcomes for people with diabetes by reducing hospital lengths of stay and initiating hospital avoidance where possible, by supporting inpatient care and outpatient flow within its affiliated hospital.

**Service requirements**

As for Level 3 plus:

- On-site diabetes nurse-led education service
- On-site access to designated allied health services in particular to dietetic and psychologist services

**Diabetes Centre**

- Provide peri-operative and post hospital discharge support
- Clinical inpatient advice, assessment and education
- Ambulatory care for patients with diabetes
- Appropriate patient case management
- Specialist clinics to meet the acute and sub-acute needs of patients with diabetes
- Multidisciplinary led outpatient clinics
- On-site nurse-led diabetes education services and allied health group therapy sessions for patients and carers
- In-service training and education for primary, secondary and tertiary health care providers, as well as community based diabetes providers
- Research role

**Workforce requirements**

As for Level 3 plus:

- On-site endocrinologist or physician practicing in general medicine with dual training in endocrinology
- Endocrinologist or physician practicing in general medicine on-call 24 hours
- RNs with appropriate post graduate qualifications and/or extensive experience in endocrinology/complex diabetes nursing; RNs may be supported by ENs in providing care to inpatients
**Diabetes Centre**

- Access to specialist endocrinologist and paediatrician with expertise in diabetes care
- NUM
- On-site NP with experience in diabetes to provide specialised diabetes patient assessment, management and education
- On-site Australian Diabetes Educator Association Credentialed Diabetes Educator/s with expertise in the management of diabetes
- Intern trainee diabetes educator position
- On-site specialised Diabetes allied health services including; dietitian, psychologist, podiatrist, and social workers

**Level 5 Endocrinology**

**Service description**

A Level 5 service provides inpatient care by resident endocrinologist.

**Service requirements**

As for Level 4 plus:

- An integrated hospital/community interface diabetes management service
- On-site specialist endocrinology allied health services

**Workforce requirements**

As for Level 4 plus:

- Endocrinologist on-site
- Access to endocrinologist or physician practicing in general medicine with dual training in endocrinology on-call 24 hours
- Access to subspecialists surgeons with endocrine surgical expertise
- Medical registrar on-site during business hours and on-call 24 hours
- CNC/Educator specialising in endocrinology

**Level 6 Endocrinology**

**Service description**

A Level 6 service provides a full range of endocrinology services with endocrinology department and emergency care. It has a statewide referral role and is the statewide provider for pituitary surgery, pancreatic surgery, complex thyroid cancer and endocrine malignancy management.

**Service requirements**

As for Level 5 plus:

- Statewide referral and support role
- Endocrinology department
- On-site access to staff and facilities for thyroid and endocrine cancer management, including direct access to an on-site nuclear medicine and PET service with radiiodine treatment and radiation isolation treatment rooms
- On-site neurosurgical services
- On-site access to laboratory service to support specialist endocrine pathology testing
- Full on-site weekday supervision of clinical services and advanced training by specialists with credentialing in endocrinology
- Accredited endocrinology training program
- Research role
- Endocrinologist inpatient and outpatient diabetes and specialist endocrine related activities

**Workforce requirements**

As for Level 5 plus:

- Endocrinologist on-call 24 hours and available for advice and support for acute emergency services, consultant to consultant Endocrinology registrar on-site
- Neurosurgeon on-site
- Neurosurgeon on-call 24 hours
- Neurosurgical registrar on-call 24 hours
- Access to subspecialists surgeons with endocrine surgical expertise
- CNC/Educator specialising in Diabetes

General Medicine

General medicine refers to the maintenance of health and the diagnosis, management and non-surgical treatment of diseases. General medicine care is provided to adult patients.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 General Medicine

No Level 1 service currently described.

Level 2 General Medicine

Service description

A Level 2 service provides a low-acuity medical care service. It is a nurse-led service. A Level 2 service also has the ability to monitor patients, with 24 hour access to a RN and access to a registered medical practitioner or GP.

Service requirements

- Access to registered medical practitioner or GP
- May host outreach service from higher level General Medicine service within the network

Workforce requirements

- 24 hour access to a RN; nursing services also provided by EN

Level 3 General Medicine

Service description

A Level 3 service provides services at Level 2 plus it has the ability to provide acute resuscitation prior to transfer. It provides a low-acuity, multi-system medical condition ambulatory and/or inpatient service.

Service requirements

As for Level 2 plus:

- Has a designated emergency care area
- Must have telehealth linkages to some specialist medical services, including emergency care, from a higher level service within the network

Workforce requirements

As for Level 2 plus:

- Inpatient care by a registered medical practitioner or GP
- May have access to allied health professionals, as required

**Level 5 General Medicine**

**Service description**

A Level 5 service provides services at Level 4 plus inpatient care by a physician practicing in general medicine supported by inpatient and outpatient consultations for a (limited) range of medicine subspecialties.

**Service requirements**

As for Level 4 plus:

- Inpatient care provided by an on-site physician practicing in general medicine
- Inpatient consultation provided by limited number of on-site medical sub-specialist services
- Outpatient consultation provided by limited on-site medical sub-specialist services supplemented by visiting medical sub-specialists
- Access to networked sites for advice and consultation for inpatients and outpatients by full range of sub-specialty medical services utilising telehealth services where appropriate
- Endoscopy services (acute and elective)
- Formal linkage to interventional cardiology services within the network
- Access to on-site cardiac investigations, including exercise stress testing and echocardiography

**Workforce requirements**

As for Level 4 plus:
- 24 hour on-call roster for physicians practicing in general medicine
- Registered medical practitioner on-site 24 hours
- Nursing staff with appropriate experience and post graduate qualifications
- Full range of generalist allied health services

**Level 6 General Medicine**

**Service description**

A Level 6 service provides services at Level 5 plus a multidisciplinary team approach to treat complex and critically ill medical patients. The service provides inpatient care by a team of on-site physicians practicing in general medicine with on-site access to a comprehensive range of sub-specialty medicine expertise.

**Service requirements**

As for Level 5 plus:
- Physicians practicing in general medicine providing consultative services to other departments for inpatients admitted from other sites requiring local expertise in these disciplines
- On-site access to a comprehensive range of medical sub-specialty services
- On-site interventional cardiology and bronchoscopy services
- Provider of general medicine consultation service by telehealth to lower level services

**Workforce requirements**

As for Level 5 plus:
- Medical registrar on-site 24 hours
- Sub-specialists available on-site for consultation
• RMOs in majority of sub-specialist medicine services
• Specialised allied health services on-site
• May have on-site NPs to supplement sub-specialty medicine roles

General Surgery

General surgery includes emergency and elective surgery with varying levels of surgical complexity.

The levels of surgical complexity indicate the requisite levels of clinical support services required in general surgery and are especially important in determining the appropriate levels of anaesthetic, perioperative and ICU services.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

May provide surgical procedures on children (refer to Paediatric Surgery Service Framework within this document).

Surgical Acuity Characteristics (QLD Health CSCF 2005)

Level I surgical complexity (SCI):
- is an ambulatory / office procedure
- requires local anaesthetic but not sedation
- requires a procedure room, aseptic technique but not an operating theatre
- requires access to resuscitation equipment.

Level II surgical complexity (SCII):
- is usually an ambulatory, day stay or emergency department procedure
- does not require general anaesthesia
- requires at least one operating or procedure room and separate recovery area.

Level III surgical complexity (SCIII):
- usually requires general anaesthesia or equivalent
- requires at least one operating room and a separate recovery room
- is usually an ambulatory or day stay procedure
- may have access to close observation care.

Level IV surgical complexity (SCIV):
- involves major surgical procedures with low to medium anaesthetic risk
- usually requires general anaesthesia
- has access (not necessarily on-site) to intensive care services
- has the capacity to provide emergency procedures.

Level V surgical complexity (SCV):
- major surgical procedures with high anaesthetic risk
- surgery and anaesthesia with the highest potential for intra- and post-operative complications
- provides specialist clinical staff, equipment and infrastructure
- on-site intensive care services
- extensive support services available.

**Level 1 General Surgery**

No Level 1 service currently described.

**Level 2 General Surgery**

**Service description**

A Level 2 service performs low complexity surgery on low to medium-risk patients undergoing SCI procedures. Surgery is performed by a registered medical practitioner. The surgery is performed on outpatient or same-day basis.

**Service requirements**

- On-site perioperative service
- Outpatient care
- Must have one procedure room

**Workforce requirements**

- Registered medical practitioner or a GP to coordinate care
- RNs with appropriate post graduate qualifications and/or experience; RNs may be supported by ENs in providing care to low complexity general surgical patients
- General surgeon available for consultation

**Support service requirements**

**Level 3 General Surgery**

**Service description**

A Level 3 service provides services at Level 2 plus surgery is performed on patients undergoing SCI to SCIII procedures. Surgery is performed by specialist surgeons on a day case basis.

**Service requirements**

As for Level 2 plus:

- At least one operating/procedure room with separate recovery area/room for post-operative care
- On-site medical practitioners credentialed to administer anaesthetic
Workforce requirements

As for Level 2 plus:

- Visiting registered medical specialist with credentials in general surgery or other surgical specialties may be available
- Medical practitioners credentialed to administer anaesthetic
- RNs with appropriate post graduate qualifications and/or experience in perioperative nursing; RNs may be supported by ENs
- Medical, anaesthetic and nursing pre-admission services
- Access to allied health services, as required

Level 4 General Surgery

Service description

A Level 4 service provides services at Level 3 plus surgery is performed on low to medium risk patients undergoing SCIV procedures. Surgery is performed by one or more consultant surgeons.

Service requirements

As for Level 3 plus:

- Broad range of day and general surgery and some specialty surgery
- More than one theatre
- Designated acute surgical inpatient unit with appropriately qualified/experienced nursing staff
- Provides specialty surgical training

Workforce requirements

As for Level 3 plus:

- Specialist surgeons on-site; and on-call 24 hours
- Surgical registrar on-call 24 hours
- Specialist anaesthetists on-site; and on-call 24 hours
- Anaesthetics registrar on-call 24 hours
- Critical care specialist on-site; and on-call 24 hours
- RNs with appropriate post graduate qualifications and/or extensive experience in perioperative nursing; access/ on-call 24 hours
• RNs with appropriate post graduate qualifications and/or experience in post-operative nursing; RNs may be supported by ENs in providing care to inpatients
• CNC providing leadership in peri-operative and post-operative care
• CNE
• Access to designated allied health services appropriate to the level of general surgical services being provided

Level 5 General Surgery

Service description

A Level 5 service provides services at Level 4 plus surgery is performed on low to high anaesthetic risk patients undergoing SCV procedures. Generally, a combination of procedures with a moderate to high level of complexity and risk are performed, and management of some patients with comorbidities and risk of intra- and post-operative complications occurs.

Surgery is performed by consultant surgeons with the ability to support patients in the post-operative stage 24 hours. This service has the ability to undertake most emergency surgeries.

Service requirements

As for Level 4 plus:

• Has an active research role
• On-site ICU

Workforce requirements

As for Level 4 plus:

• Access to specialised allied health services
• Access to multiple surgical sub-specialties on-site; and on-call 24 hours

Level 6 General Surgery

Service description

A Level 6 service provides services at Level 5 plus this service manages the most complex and highly specialised surgical presentations with the highest level of risk in specified areas of expertise.
Service requirements

As for Level 5 plus:
- On-site cardiothoracic and neurosurgical services
- Comprehensive acute and persisting pain management services
- PET scanning services

Workforce requirements

As for Level 5 plus:
- Broad range of surgical sub-specialists available on-site
- Dedicated surgical staff with clinical competency in a range of sub-specialty areas available at close proximity 24 hours
- Allied health professionals available 24 hours, as required

Geriatrics

Geriatric medicine is a speciality that focuses on the health care of older people. It aims to promote health by preventing and treating diseases and disabilities in older adults.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Geriatrics

No level 1 service currently described.

Level 2 Geriatrics

A Level 2 service provides outpatient and outreach care from a higher level Geriatrics service. These services have access to a health practitioner specialising in geriatric assessment and access to some allied health services.

Level 3 Geriatrics

Service description

A Level 3 service provides services at Level 2 plus provides inpatient and outpatient care by an on-site registered medical practitioner or GP. Access to a visiting geriatrician or general physician, via telehealth.

Service requirements

- Inpatient beds available within the facility
- Access to rehabilitation services within the network
- Access to higher level Geriatrics service in the network

Workforce requirements

- On-site registered medical practitioner or GP
- Access to a visiting geriatrician or general physician, or via telehealth
- 24 hour cover by RN; RNs may be supported by ENs in providing care to inpatients
- Access to some allied health services

Support service requirements

Level 4 Geriatrics

Service description

A Level 4 service provides services at Level 3 plus provides inter-disciplinary assessment and management of the care and needs of older people. A Level 4 service provides services to day patients and inpatients by a general physician or geriatrician.
Service requirements

As for Level 3 plus:

- Access to appropriate geriatric clinics
- May have access to inpatient geriatrics rehabilitation beds
- Access to Geriatric Assessment service
- Access to psychogeriatric service

Workforce requirements

As for Level 3 plus:

- General physician or geriatrician on-site
- Access to a psychogeriatrician
- Registered medical practitioner available 24 hours
- RNs with appropriate post graduate qualifications and/or experience in geriatric nursing
- Access to allied health and rehabilitation services, as required
- Access to palliative care consultation and services

Level 5 Geriatrics

Service description

A Level 5 service provides services at Level 4 plus provides inpatient care by a geriatrician. It has links with inpatient rehabilitation services, geriatric psychiatry services, and ortho-geriatric services, and provides support to lower level services in the network.

Service requirements

As for Level 4 plus:

- Designated geriatric medicine beds
- Rehabilitation services available on-site
- Provides ortho-geriatrician services
- Provides outreach services to lower level services
- Provides specialty training in geriatrics

Workforce requirements

As for Level 4 plus:

- Geriatrician on-site
• Geriatrics registrar/RMO
• Access to CNC
• Access to specialised allied health professionals

**Gynaecology**

Gynaecology is the branch of medicine that deals with the treatment of diseases of the female reproductive system. Services are delivered by registered medical practitioners who are credentialed in gynaecology.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

**Level 1 Gynaecology**

No Level 1 service currently described.

**Level 2 Gynaecology**

No Level 2 service currently described.

**Level 3 Gynaecology**

**Service description**

A Level 3 service performs minor procedures on low risk patients by an appropriately trained and credentialed health professional. There are no inpatient services provided at this level.

**Service requirements**

- Visiting outreach service that provide clinic-based gynaecological procedures
- Formal linkages with higher level Gynaecology Service

**Workforce requirements**

- Appropriately trained and credentialed health professional
- Access to visiting gynaecologist or via telehealth

**Support service requirements**

**Level 4 Gynaecology**

**Service description**

A Level 4 service provides services at Level 3 plus some major procedures on low and moderate risk patients performed by a Fellowship of Royal Australian and New Zealand College of Obstetricians and Gynaecologists (FRANZCOG) gynaecologist.

This unit must have the capacity to resuscitate patients and have access to an emergency theatre on a 24 hour basis. This unit must have access to a FRANZCOG on a 24 hour basis that is able to attend within 30 minutes.
Service requirements

As for Level 3 plus:

- Inpatient surgical beds for gynaecology patients
- At least one operating/procedure room with separate recovery area/room for post-operative care
- Network links with specialist gynaecological oncology, medical oncology, radiation oncology and palliative care services
- Specialty training in gynaecology

Workforce requirements

As for Level 3 plus:

- On-site gynaecologists registrars on-call 24 hours
- On-call gynaecologist accessible within 30 minutes if required
- RNs with appropriate post graduate qualifications and/or experience in peri-operative nursing

Level 5 Gynaecology

Service description

A Level 5 service provides services at Level 4 plus it provides a diagnostic service and performs surgery on all patients by specialist gynaecologists. It has the ability to manage a broad range of patients in association with other specialists, with appropriate formal links and referrals in place with higher level Gynaecology services for certain complex cases.

Service requirements

As for Level 4 plus:

- Inpatient surgical beds for gynaecology patients
- On-site Level 4 Maternity Service
- Provides medical specialty training in gynaecology
- Network access to gynaecology oncology specialists
- Outpatient services that provide clinic-based gynaecological procedures

Workforce requirements

As for Level 4 plus:

- On-site gynaecologists on-call 24 hours
• Gynaecology registrars on-site; and on-call 24 hours
• RNs with appropriate post graduate qualifications and/or experience in gynaecological nursing
• CNC providing leadership in gynaecological care

Level 6 Gynaecology

Service description

A Level 6 service provides services at Level 5 plus this service has the ability to manage complex cases in association with other specialists including reproductive endocrinology, infertility, and gynaecological malignancy.

Service requirements

As for Level 5 plus:

• Provides specialist consultation to lower level services
• Performs complex gynaecological surgery
• On-site ICU
• Gynaecologic oncology multidisciplinary team with representation from medical oncology, radiation oncology, and gynaecological oncology
• Designated gynaecological cancer care coordinators
• Dedicated women’s health ward
• Ability to accept referrals for complex cases from lower level services
• Research role

Workforce requirements

As for Level 5 plus:

• On-site gynaecological oncologist
• On-site gynaecological registrar with gynaecological oncology responsibilities
• On-site gynaecologists with sub-specialty interest in uro-gynaecology, minimally invasive surgery and reproductive endocrinology

Hyperbaric and Diving Medicine

State Referral Centre – Single Site Service

Hyperbaric and Diving Medicine Services

Hyperbaric and diving medicine is a specialised area of clinical practice involving the diagnosis, management and treatment of dysbaric illness of all levels of severity and for patients with medical conditions that respond to hyperbaric oxygen, including arterial gas embolism, gangrene and necrotizing infections, complex problem wounds, radiation injury and necrosis, acute ischaemic conditions and trauma.

Hyperbaric oxygen treatment is administered in a pressurised hyperbaric chamber capable of delivering 100% oxygen at 2.8 atmospheres absolute pressure for medical cases and up to 6 atmospheres absolute for divers.

The scope of this framework describes the service, its requirements and the staffing needs and clinical support services required within each level.

Service description

This service has critical care capability and manages the highest level of patient acuity and complexity with an extensive range of comorbidities. The service provides emergency recompression treatment for all divers (up to 6 atmospheres absolute pressure) and acute hyperbaric oxygen treatment to medical and surgical patients of all illness severity.

This service also provides a tertiary wound care service in association with medical hyperbaric treatment of hypoxic complex wounds, trauma and radiation injury.

To be defined as a comprehensive hyperbaric facility the service needs to be capable of providing hyperbaric oxygen therapy at a treatment pressure of at least 2.8 atmospheric pressure absolute (180 kilopascal gauge pressure), and capable of managing critical care patients with mechanical ventilation and invasive monitoring. The precise definition of a comprehensive hyperbaric facility is governed by Commonwealth Department of Health Medicare regulations.

Service requirements

- State wide referral and network role
- Linkage to Level 6 integrated retrieval service with direct rotary wing access for time critical cases
- Hyperbaric facility with full critical care capability delivering hyperbaric oxygen treatment to ventilated patients with or without circulatory and inotropic support, in support of other specialities managing patients with multisystem disease, or specialities such as cardiac surgery where specific complications require emergency hyperbaric treatment
- On-site Level 6 Emergency Department with resuscitation and monitoring facilities available
- On-site Level 6 critical care support
- Hyperbaric medical specialist and registrar cover, 24 hours for emergencies
- RNs with appropriate post graduate qualifications and/or extensive experience in hyperbaric medicine and technical cover, 24 hours for emergencies
• Broad range of surgical sub-specialties on-site and available at close proximity 24 hours
• Capability of treatment of divers with serious neurological injury, unconscious and those requiring critical care or ventilation
• Capability of procedural interventions such as intubation and ventilation, invasive monitoring, and thoracostomy tubes
• Provides specialist advice and diving medicine support for Tasmania’s diving industry
• Provides specialist technical support in forensic investigation of diving accidents
• Provides specialist and complex wound management
• Accredited for post-graduate specialist registrar training and post-graduate nurse training
• Has an active research role

Workforce requirements:
• Medical Director with postgraduate qualifications in Diving and Hyperbaric Medicine
• Hyperbaric specialists with postgraduate qualifications in Diving and Hyperbaric Medicine and Acute Care Specialty training (Anaesthesia, Emergency Medicine or Critical Care) on –call 24 hours
• Director of clinical training for supervision of registrar training
• Registrar on-call 24 Hours
• Specialist RNs with appropriate post graduate qualifications and/or extensive experience in critical care and wound care on-call 24 hours (Minimum 30% of nursing staff with critical care post graduate qualifications)
• Full time Specialist technical staff with hospital based Hyperbaric technical training, including advanced commercial and/or Navy diving experience on-call 24 hours
• Administrative support on site

Infectious Disease

Infectious Diseases is the discipline of medicine that provides specialised diagnosis and management of illness resulting from pathogenic micro-organisms.

The scope of this Framework describes infectious diseases services, including inter-related areas of clinical microbiology and sexual health medicine, service requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Infectious Disease
No Level 1 service currently described.

Level 2 Infectious Disease
No Level 2 service currently described.

Level 3 Infectious Disease
A Level 3 service provides outpatient care by a visiting infectious medical diseases specialist. A level 3 service does not provide inpatient management of infectious diseases.

Level 4 Infectious Disease

Service description
A Level 4 service provides services at Level 3 plus it provides ambulatory and inpatient consulting services provided by a physician practicing in general medicine.

Service requirements
- General inpatient beds for the care of patients with infectious diseases
  - Isolation room(s) with internal wash basins and toilets
  - Staff wash basins immediately outside the room
  - Separate ventilation for isolation room(s)
- Formal access to specialist infectious diseases and sexual health physicians within the network
- On-site infection prevention and control service

Workforce requirements
- On-site physician practicing in general medicine
- Appointed infection prevention and control personnel
- RNs with appropriate post graduate qualifications and/or experience in sexual health nursing

Maternity

Maternity services provide care for mother and baby along the continuum of care. This includes during pregnancy, during labour and birth, and during the postnatal period.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level. Safety in the provision of maternity care depends upon appropriate consultation and / or referral and transfer of patients consistent with well-defined clinical pathways.

This framework is consistent with the National Maternity Services Framework.

Level 1 Maternity

Service description

A Level 1 service provides community antenatal and/or postnatal care for women and infants who have normal care needs for antenatal and postpartum care. Outpatient and ambulatory care are available. There are no planned birthing services. The service has capacity to provide emergency resuscitation and care to critically ill mother and babies until transfer or retrieval takes place. A Level 1 service accepts back transfer of physiologically stable women and neonates from a higher level Maternity service, following midwifery/obstetric consultation.

Service requirements

- Emergency resuscitation equipment (adult and neonate)
- Basic equipment for antenatal and postnatal care
- Access to offsite pathology and medical imaging services
- Network access to high level maternity services
- Access to specialist obstetric services via telehealth

Workforce requirements

- Registered midwives or RN with access to midwifery support where registered midwives are not available
- Visiting GP
- Access to an obstetrician via telehealth
- Access to allied health professionals including physiotherapy, social work, continence advisors and dietitians
- Access to maternal and child health nurses and perinatal mental health services
- Access to Child Protection and Child Health and Parenting Services
- Access to lactation consultants

**Level 2 Maternity**

**Service description**

A Level 2 service provides services at Level 1 plus antenatal, intrapartum and postnatal inpatient services for women with uncomplicated pregnancy from 37 weeks gestation. A Level 2 service must have immediate transfer arrangements in place for retrieval and transfer to appropriate higher level Maternity service. A Level 2 service provides referral for planned lower segment caesarean section (LSCS).

**Service requirements**

As for Level 1 plus:

- Dedicated birthing rooms for planned births for gestation of 37 weeks or more
- Antenatal cardiotocograph (CTG) monitoring with access to remote assessment and interpretation
- Access to consultation from higher level Maternity services within the network face to face or via telehealth
- On-site Level 3 or above neonatology service

**Workforce requirements**

As for Level 1 plus:

- Registered midwives available on-site and on-call 24 hours
- 24 hour on-site access to a DRANZCOG registered medical practitioner who is able to attend within 30 minutes

Support service requirements

**Level 3 Maternity**

**Service description**

A Level 3 service provides services at Level 2 plus it provides services for planned normal births for women ≥37 weeks gestation where the mother and baby have uncomplicated care needs.

---

6 As per National Capability Framework for Maternity Services
7 Diploma of Obstetrics and Gynaecology from the Royal Australian and New Zealand College of Obstetricians and Gynaecologists (DRANZOG)
Service requirements
As for Level 2 plus:

- Service can perform continuous electronic foetal monitoring in labour where clinically indicated
- On-site facilities for emergency delivery (abdominal or vaginal)
- Able to support vaginal birth after following $\geq 39$ weeks of pregnancy
- Able to support induction of labour following $\geq 39$ completed weeks of pregnancy
- Able to perform elective caesarean section at $\geq 39$ weeks gestation
- Urgent retrieval to Level 4 or above Maternity Service available
- Formal linkages with higher level Maternity services within the network

Workforce requirements
As for Level 2 plus:

- 24 hour access to a registered medical practitioner with credentials in anaesthetics who can attend within 30 minutes
- 24 hour access to a registered medical practitioner credentialed to provide care to the neonate and who can attend within 30 minutes

Level 4 Maternity

Service description

A Level 4 service provides services at Level 3 plus it is able to provide intrapartum care for low and moderately complex mothers and babies with pregnancy $\geq 34$ weeks gestation.

In utero transfer of neonates should be undertaken where there is a risk of delivery below this threshold when this is clinically and logistically possible. When this is not possible and the neonate is close to the transfer criteria threshold, clinical discretion should be applied to the decision to transfer dependant on the condition of the neonate, in consultation with a qualified neonatologist and the Level 5 or Level 6 maternity and neonatology service as appropriate.

Service requirements
As for Level 3 plus:

- 24 hour on-site access to foetal scalp pH or lactate sampling
- Access to on-site urgent blood and specimen testing, blood and volume expanders
- Blood storage facilities on-site and cross-matched blood readily available
• Access on-site to 24 hour ultrasound services
• Access to consultation from higher level Maternity services within the network face to face or via telehealth
• Provides training of specialist obstetricians and midwives
• On-site Level 4 Neonatology Service
• Access to Level 4 or above ICU/HDU services within the network
• Access to genetics service in the network

Workforce requirements

As for Level 3 plus:

• Appointed FRANZCOG (Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists) or equivalent registered medical specialist with credentials in obstetrics on-site and on-call 24 hours who can attend within 30 minutes
• Nominated obstetric clinical leader for the service
• Obstetric registrars and RMOs
• On-site specialist anaesthetist on-call 24 hours and able to attend within 30 minutes
• On-site specialist paediatrician with experience in neonatal care on-call 24 hours and able to attend within 30 minutes
• 24 hour access to Level 4 or above General Surgery Service in the network
• Resident medical officer on-site 24 hours
• Registered midwives on-site 24 hours
• Access to allied health professionals as required, including physiotherapy and social work
• On-site access to perinatal mental health professionals able to provide perinatal mental health assessment and support for perinatal loss
• Nominated midwifery clinical leader
• Access to a midwifery educator

Level 5 Maternity

Service description

A Level 5 service provides services at Level 4 plus it is capable of providing intrapartum care for low, moderate and high complexity mothers and babies with gestation ≥32 weeks gestation. This service is a multidisciplinary service with the capacity to manage all unexpected pregnancy and neonatal emergency presentations.
In utero transfer of neonates should be undertaken where there is a risk of delivery below this threshold when this is clinically and logistically possible. When this is not possible and the neonate is close to the transfer criteria threshold, clinical discretion should be applied to the decision to transfer dependant on the condition of the neonate, in consultation with a qualified neonatologist and the Level 6 Maternity and Level 6 Neonatology service.

**Service requirements**

As for Level 4 plus:

- A full range of antenatal, birthing and postnatal care facilities, including dedicated birth suites, an antenatal day assessment unit, allocated inpatient beds within a maternity unit and dedicated maternity beds for the acute care of high-acuity patients
- On-site Level 5 Neonatology Service
- On-site Level 4 or above General Surgery Service
- The capacity to measure and permanently document foetal scalp sampling and cord blood gases
- Portable ultrasound in birth suite 24 hours used by practitioners credentialed in ultrasound
- Access to interventional radiology and vascular services within the network
- Provides training of specialist obstetricians and midwives
- May have research role

**Workforce requirements**

As for Level 4 plus:

- Clinical leadership roles in obstetrics, midwifery, nursing and neonatology
- Obstetric registrars and RMOs
- Paediatrics registrars and RMOs
- Anaesthetics registrars and RMOs
- On-site allied health professionals including occupational therapy, continence advisors, dietitians, and drug and alcohol services

**Level 6 Maternity**

**Service description**

A Level 6 service provides services at Level 5 plus it provides all levels of care, including the highest level of complex care for women with serious obstetric and foetal conditions that require high-level multidisciplinary care.

A Level 6 service provides clinical advice and support by a consultant registered medical specialist credentialed in obstetrics 24 hours.
Service requirements

As for Level 5 plus:

- A 24 hour maternity service that provides comprehensive specialist services, including, but not restricted to, midwifery, obstetric, mental health and surgical care for women with high-risk and complex needs
- On-site dedicated acute observation area within the maternity unit
- On-site 24 hour access to obstetric imaging service
- On-site Level 6 Neonatology Service
- Access to maternal foetal medicine specialty services
- Access to foetal surgical services
- On-site perinatal mental health service
- On-site vascular surgery and interventional radiology services
- Support and statewide clinical leadership provided to lower level services
- Active research role

Workforce requirements

As for Level 5 plus:

- Specialist neonatologists on-site and on-call 24 hours
- Obstetricians with certification or special interest in maternal foetal medicine and obstetric ultrasound
- 24 hour on-site access to consultant-level medical imaging, paediatrics, anaesthetics and adult ICU staff

Mental Health Inpatient Services

Mental Health is a specialist area of health care that promotes recovery to enable people living with mental disorders or mental health problems to lead a contributing life. Mental health services are concerned with the clinical assessment, diagnosis, monitoring and treatment of people who have a mental illness or disorder.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Mental Health Inpatient Services

No Level 1 service currently described.

Level 2 Mental Health Inpatient Services

No Level 2 service currently described.

Level 3 Mental Health Inpatient Services

Service description

A Level 3 service provides mental health care to low complexity mental health patients. It has the capacity for non-authorised mental health treatment only.

Service requirements

- Capacity for non-authorised mental health treatment only
- Admission and management by GP or other registered medical officers
- Capacity to cope with acutely unwell pending transfer
- Limited assessment and treatment for severe and persistent mental health conditions
- Limited access to mental health multidisciplinary team

Workforce requirements

- GP or other medical officers
- Access to psychiatrist within the network
- RNs with appropriate post graduate qualifications and/or experience in mental health nursing; RNs may be supported by ENs in providing care to patients
- Limited access to mental health multidisciplinary team

Level 4 Mental Health Inpatient Services

Service description

A Level 4 service provides services at Level 3 plus it provides mental health care to moderate complexity mental health patients. It has the capacity for dedicated but non-authorised mental health treatment only.

Service requirements

As for Level 3 plus:

- Capacity for dedicated but non-authorised mental health treatment only
- Assessment and treatment for severe and persistent mental health conditions

Workforce requirements

As for Level 3 plus:

- Multidisciplinary staff available 24 hours, seven days a week on-call
- Clinical pharmacist

Level 5 Mental Health Inpatient Services

Service description

A Level 5 service provides services at Level 4 plus it has the capability of providing mental health care to low, moderate and high complexity mental health patients. It has the capacity for authorised mental health treatment.

Service requirements

As for Level 4 plus:

- Capacity for authorised mental health treatment
- Comprehensive multidisciplinary team routinely available on-site
- Consultation liaison services to general health wards
- mental health high dependency unit

Workforce requirements

As for Level 4 plus:

- Comprehensive multidisciplinary team routinely available on-site
Level 6 Mental Health Inpatient Services

Service description

A Level 6 service provides services at Level 5 plus it has the capability of providing mental health care for patients who present with the highest level of mental health risk and complexity. This service provides mental health care 24 hours.

Service requirements

As for Level 5 plus:
- Assessment and treatment for complex mental health conditions
- Comprehensive multidisciplinary teams available 24 hours, seven days a week
- Secure mental health unit
- Psychiatric consultation liaison services available to general wards
- Psychiatric intensive care service on-site

Workforce requirements

- Comprehensive mental health multidisciplinary teams available 24 hours, seven days a week on-site
- Specialist pharmacist, mental health

Support service requirements
Neonatology

Neonatology Service provides a range of care from well infant care to highly specialised care, for sick, low birth weight and/or premature infants, and/or infants born with congenital or other conditions.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level. Safety in the provision of neonatal care is dependent upon appropriate consultation and/or referral and transfer of patients consistent with well-defined clinical pathways.

The proposed framework is consistent with the National Maternity Services Framework.

This Framework also describes a Level 6 paediatric ICU role delineation, which is co-located with Level 6 Neonatology services.

Level 1 Neonatology
No Level 1 service currently described.

Level 2 Neonatology
No Level 2 service currently described.

Level 3 Neonatology

Service description

A Level 3 service has the ability to initiate and maintain intravenous therapy and for all births greater than 37 weeks gestation and with a birth weight greater than 2500 grams. At least one clinician is available exclusively for neonatal resuscitation.

Service requirements

- Well-equipped special care nursery
- Provides phototherapy and controlled oxygen therapy in consultation with a higher level Neonatology service

Workforce requirements

- Nursing ratio of 1:4 cots; access to RNs with appropriate post graduate qualifications and/or experience in neonatal nursing; RNs may be supported by ENs in providing care
- 24 hour on-site access to a health professional skilled in initiating (accredited) neonatal resuscitation
- On-site medical practitioner with credentials in advanced neonatal resuscitation and the necessary skills in post-resuscitation assessment, stabilisation and potential referral for emergency retrieval to a centre at a higher service level. Medical practitioner should be on-call 24 hours and available within 30 minutes of hospital
- Access to outreach, community or hospital based health professionals such as dietitians, physiotherapists and social workers
- Access to infant and child neuropsychology services for cognitive and developmental assessment and management of at-risk and symptomatic infants
• Access to paediatric rehabilitation services, including occupational therapy for patients with rehabilitation needs and/or who require specific medical intervention and surveillance

• Access to perinatal mental health services

### Level 4 Neonatology

#### Service description

A Level 4 service provides services at Level 3 plus has the capability to plan and deliver care for infants greater than or equal to 34 weeks with minimal complications or who are back-transferred from a higher level Neonatology service.

In utero transfer of neonates should be undertaken where there is a risk of delivery below this threshold when this is clinically and logistically possible. When this is not possible and the neonate is close to the transfer criteria threshold, clinical discretion should be applied to the decision to transfer dependant on the condition of the neonate, in consultation with a qualified neonatologist and the Level 5 or Level 6 Maternity and Neonatology service as appropriate.

#### Service requirements

As for Level 3 plus:

- Commence mechanical ventilation in consultation with a higher level Neonatal service pending transfer to a higher level Neonatology service
- On-site neonatal facilities for apnoea monitoring, low level oxygen therapy (including monitoring) and nasal/orogastric feeding
- Short-term intravenous therapy available
- All patients managed by attending paediatrician
- Accredited paediatrics training program

#### Workforce requirements

As for Level 3 plus:

- On-site paediatrician with experience in neonatology on-call 24 hours
- Access to dietetic, physiotherapy, social work and speech pathology services
- Access to a lactation consultant
- RNs with appropriate post graduate qualifications and/or experience in neonatal nursing; RNs may be supported by ENs in providing care
- Specialist pharmacist
Level 5 Neonatology

Service description

A Level 5 service provides services at Level 4 plus it has the capability to plan and deliver care for infants with risk factors or complex care needs who were born at the hospital or back transferred from a higher level Neonatology service and who are greater than or equal to 32 weeks gestational age.

In utero transfer of neonates should be undertaken where there is a risk of delivery below this threshold when this is clinically and logistically possible. When this is not possible and the neonate is close to the transfer criteria threshold, clinical discretion should be applied to the decision to transfer dependent on the condition of the neonate, in consultation with a qualified neonatologist and the Level 6 Maternity and Level 6 Neonatology service.

Service requirements

As for Level 4 plus:

- Specialist nursery beds to manage increased workload associated with regional referral role
- Provision of short-term mechanical ventilation (<6 hours) pending transfer
- Nasal CPAP (continuous positive airway pressure) with facilities for arterial blood gas monitoring
- Non-invasive BP (blood pressure) monitoring
- Receives transfers from lower level services and back-transfer from higher level Neonatology services

Workforce requirements

As for Level 4 plus:

- Neonatal nursing staff to provide back-transfer support, local education and training
- Consultant paediatrician with scope of practice including neonatology
- On-site paediatrics registrar on-call 24 hours
- Specialist neonatology allied health providers

Level 6 Neonatology

Service description

A Level 6 service provides services at Level 5 plus it provides the highest level of care to infants and has personnel and equipment to provide continuous life support and comprehensive multidisciplinary care for newborns, including those less than 32 weeks gestation.

Service requirements

As for Level 5 plus:

- On-site neonatal intensive care unit (NICU)
- Provision of medium to long-term mechanical ventilation and full life support
- Supports infants of high-risk pregnancies and births
- On-site 24 hour access to neonatal echocardiography services
- Provides consultation and leadership for emergency neonatal transport
- On-site neonatal emergency transport team on-call 24 hours
- On-site neonatal surgery
- Active participation in clinical trials and research

Workforce requirements

As for Level 5 plus:

- On-site specialist neonatologists on-call 24 hours
- Advanced trainees in neonatology
- Neonatology registrars/RMOs
- Specialist nursing positions including neonatal intensive care nurse educators and intensive care equipment nurse
- RNs with post graduate qualifications and/or experience in neonatal intensive/critical care nursing on-site 24 hours

Level 6 Paediatric Intensive Care Service

Service description

A Level 6 Neonatology service also provides Level 6 Paediatric Intensive Care services within this framework.

Service requirements

- On-site paediatric intensive care unit (PICU)
- Provision of medium to long-term mechanical ventilation and full life support for paediatric patients
- Provides consultation and leadership for emergency paediatric transport
- On-site paediatric emergency transport team on-call 24 hours
- On-site paediatric surgery

Workforce requirements

- On-site specialist paediatric intensive care specialists on-call 24 hours
- Paediatric intensive care registrar
- Neonatology registrars/RMOs
- Data collector for reporting to national benchmarking organisations, data audit and to support active research role
- Specialist nursing positions including paediatric intensive care nurse educators and intensive care equipment nurse
- RNs with post graduate qualifications and/or experience in paediatric intensive/critical care nursing
- Specialist pharmacist

Nephrology

Nephrology is the specialised area of medical practice involving the investigation, diagnosis and treatment of clinical abnormalities and diseases of the kidneys. The clinical presentation of kidney disease ranges from no symptoms (asymptomatic), a sudden onset of clinical symptoms (acute) or symptoms that develop over months or years (chronic).

Care for people with kidney disorders is delivered in a range of different health settings. While most care is delivered in an outpatient or ambulatory setting, a significant proportion also require inpatient services under specialist supervision or advice. A range of health professionals are involved, and deliver various services, including dialysis, transplantation and renal supportive care.

The scope of this Framework describes the nephrology service profile, its requirements, the minimum staffing needs and clinical support services required within each level of the service. This profile does include community based outpatient services provided via satellite units and home dialysis services.

Level 1 Nephrology

No Level 1 service currently described.

Level 2 Nephrology

Service description

A level 2 service provides local support and care to renal patients as part of a formal network. This could include a self-dialysis room in an ambulatory setting for self-managing home dialysis patient if considered clinically appropriate by their nephrologist or higher level Nephrology service. This is for patients who are medically stable.

Level 3 Nephrology

Service description

A Level 3 service provides inpatient care by a GP who manages renal patients who do not have a need for haemodialysis.

A Level 3 service has links to a higher level Nephrology service for specialist renal advice and acute treatment.

Service requirements

- Inpatient beds
- Formal network linkage to higher level Nephrology service

Workforce requirements

- Inpatient care provided by a GP
- Outpatient consultation by visiting renal specialist or via telehealth
- Nursing and Allied health service on-site

**Level 5 Nephrology**

**Service description**

A Level 5 service provides services at Level 4 plus it provides definitive acute renal medical care and treatment by an appointed renal physician for patients with acute and chronic renal disease.

A Level 5 service provides ambulatory dialysis services (satellite units).

**Service requirements**

As for Level 4 plus:

- Nephrology department with formal linkages with Level 6 Nephrology Service
- Renal biopsies performed by a Nephrologist
- Access to acute inpatient dialysis services
- Access to visiting vascular surgeons and radiological interventions at an appropriate level
- Access to sub-specialties services: rheumatology and infection disease services
- Provision of outpatient clinics for chronic kidney disorder, including general nephrology, dialysis, renal supportive care and renal transplantation
• Provision of acute inpatient nephrology consolation
• Provides medical governance and clinical outreach to regional dialysis centres (satellite unit/s) and smaller community dialysis units
• Manages a home therapies service (providing education, professional and technical support) to allow home haemodialysis or peritoneal dialysis locally or remotely
• Accredited Nephrology Advanced Training Program
• Undergraduate and postgraduate teaching role
• May have a research role
• On-site specialised allied health service

**Workforce requirements**

As for Level 4 plus:

• Nephrologist on-site and on-call 24 hours
• Medical registrar on-site 24 hours
• 24 hour access to on-call RN with specialised experience in renal replacement modalities of haemodialysis and peritoneal dialysis
• Specialist RNs with specialised experience in renal nursing and dialysis treatments, supported by ENs
• NUM
• RNs dedicated for vascular access, chronic kidney disease education and home therapies training
• RN dedicated to coordination for renal transplant workup for recipients and donors
• CNC to provide supportive care for patients choosing a non-renal replacement therapy pathway
• Access to visiting vascular surgeons
• Operational support staff

Level 6 Nephrology

Service description

A Level 6 service provides services at Level 5 plus it provides nephrology support and co-ordinated care for patients with acute renal failure, chronic kidney disease and end-stage kidney disease.

It has a statewide referral role.

Service requirements

As for Level 5 plus:

- Statewide referral role and coordination for renal transplant cases
- Provides clinical advice, education and training to lower level services via telehealth
- Provides statewide data collection; in home dialysis therapies; transplantation; and renal supportive care
- 24 hour apheresis
- On-site 24 hour sub-specialties services: vascular surgery, neurosurgery, cardiothoracic surgery, interventional radiology
- On-site Level 6 Neonatal and Paediatric ICU
- Active research role

Neurology

Neurology is the specialty that deals with diseases of the nervous system (including the brain, spinal cord and peripheral nerves) especially those due to vascular, inflammatory, autoimmune or degenerative causes (e.g. stroke, epilepsy, multiple sclerosis, Parkinson’s disease and neuropathy).

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level. Stroke services are referred to separately in the Stroke Services framework.

Level 1 Neurology
No Level 1 service currently described.

Level 2 Neurology
No Level 2 service currently described.

Level 3 Neurology

Service description
A Level 3 service provides inpatient care by a registered medical practitioner or GP for low acuity neurological conditions with 24 hour cover by a RN/EN.

Service requirements

- Inpatient care by registered medical practitioner or GP
- Established referral relationship with higher level Neurology services including defined transfer policies and protocols
- Access to specialist clinical advice and education from a higher level Neurology service through telehealth
- Access to allied health services as required

Workforce requirements

- Registered medical practitioner or GP
- 24 hour cover by RNs which may be supported by ENs in providing care to inpatients

Level 4 Neurology

Service description
A Level 4 services provides services at Level 3 plus inpatient care by an on-site physician practicing in general medicine and outpatient medical consultation by a visiting specialist neurologist.
This level of service is able to manage uncomplicated presentations relating to common neurological conditions. Outpatient electroencephalogram (EEG) is available via visiting service.

**Service requirements**

As for Level 3 plus:

- Outpatient visiting EEG testing
- Consultation with neurologist for management decisions for complex patients
- Access to neurological advice through higher level Neurology service in the network

**Workforce requirements**

As for Level 3 plus:

- On-site physician practicing in general medicine on-call 24 hours
- Medical practitioner on-site 24 hours
- Visiting specialist neurologists
- Access to designated allied health services
- Visiting neurophysiology scientist for visiting EEG service

A Level 5 service provides services at Level 4 plus it provides inpatient care by neurologist(s).

**Service requirements**

As for Level 4 plus:

- Inpatient care by neurologists
- 24 hour access to CT and MRI
- May provide undergraduate teaching
- May have a research role
- Inpatient and outpatient EEG and nerve conduction studies (NCS) / electromyography (EMG) available
- Designated neurology beds and outpatient services

**Workforce requirements**

As for Level 4 plus:
- Neurologist available on-site
- Network access to on-call neurologist at Level 6 service 24 hours
- On-site access to medical specialist with neurology scope of practice 24 hours
- RNs with appropriate post graduate qualifications and/or extensive experience in neurological nursing; RNs may be supported by ENs in providing care to inpatients
- Access to CNC providing leadership in neurology
- Access to specialised allied health services
- On-site rehabilitation specialist
- On-site neurophysiology scientist for EEG services

### Level 6 Neurology

#### Service description

A Level 6 service provides services at Level 5 plus it provides most neurological services within designated neurology department.

Assessment and surgery for epilepsy surgery and movement disorders will be referred interstate by a neurologist from a Level 5 or Level 6 service.

#### Service requirements

As for Level 5 plus:

- Statewide and interstate referral role
- Designated neurology beds
- A Level 6 HDU for neurology inpatients
- Inpatient and outpatient EEG and specialised neurophysiological testing
- Capacity for 24 hours inpatient video EEG monitoring with appropriate infrastructure and staffing support available
- Brain PET scanning available
- Provides clinical advice, education and training to lower level services
- Accredited neurology training program
- Access to on-site neurosurgical services
- Active research role
Workforce requirements

As for Level 5 plus:

- Consultant neurologists on-site and on-call 24 hours
- Neurology registrars / RMOs
- Access to on-site and on-call neurosurgeons
- On-site neurophysiology scientists for EEG, NCS/EMG and evoked potential (EP) testing

Neurosurgery

Neurosurgery is the surgical specialty that deals with the diagnosis and treatment of disorders which affect any portion of the nervous system, including the brain, spinal cord, peripheral nerves and extra-cranial cerebrovascular system.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

May provide surgical procedures on children (refer to Paediatric Surgery Service Framework within this document).

Level 1 Neurosurgery
No Level 1 service currently described.

Level 2 Neurosurgery
No Level 2 service currently described.

Level 3 Neurosurgery
No Level 3 service currently described.

Level 4 Neurosurgery
No Level 4 service currently described.

Level 5 Neurosurgery

Service description
A Level 5 services provides elective uncomplicated minor neurosurgical services. Elective services include spinal and peripheral nerve surgery. A Level 5 service does not perform elective cranial procedures. Urgent procedures may be performed only after discussion with a Level 6 Neurosurgery Service. A consultant neurosurgeon participates in the credentialing and scope of practice decisions regarding neurosurgery.

Service requirements
- Network access to Level 6 Neurosurgery Service 24 hours
- Outpatient clinics by a visiting neurosurgeon
- Multidisciplinary spinal assessment clinic
- Link with a Level 4 Rehabilitation Services

Workforce requirements
- Surgeons whose scope of practice includes minor neurosurgical procedures
- RNs with appropriate post graduate qualifications and/or experience in neurosurgical nursing
• Access to designated allied health services with specialist skills in the management of patients with neurosurgical care needs

| Level 6 Neurosurgery

Service description

A Level 6 service is a specialist neurosurgical service that has the capability to deal with all elective and emergency neurosurgical cases.

A Level 6 service is responsible for coordinating all neurosurgical interstate transfers.

Service requirements

As for Level 5 plus:

• Provides statewide advice on all neurosurgical interstate transfers
• On-site interventional neuro-radiology
• Designated neurosurgical ward
• Designated neurosurgical ICU / HDU
• One or more dedicated neurosurgical theatres
• Link with Level 5 Rehabilitation Service
• Neurosurgical training program
• Active research role
• Comprehensive clinical assessment and triage of chronic spinal pain conditions with access to pain management multidisciplinary team on-site
• On-site access to medical sub-specialties including infectious disease and neurology

Workforce requirements

As for Level 5 plus:

• Neurosurgical consultant on-site; and on-call 24 hours
• Neurosurgical registrar on-site; and on-call 24 hours
• CNC providing leadership in neurosurgical care
• On-site specialist infectious diseases and neurology services

Ophthalmology

Ophthalmology deals with diseases of the eye. Ophthalmology surgical services are delivered by medical practitioners who are specialists in the surgical care of the eyes and visual system and in the prevention of eye diseases and injury.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Ophthalmology
No Level 1 service currently described.

Level 2 Ophthalmology
No Level 2 service currently described.

Level 3 Ophthalmology
No Level 3 service currently described.

Level 4 Ophthalmology

Service description
A Level 4 service provides common diagnostic, assessment, testing and treatment of ophthalmological procedures for low and moderate risk patients. These services would normally be performed by visiting ophthalmic surgeons.

Service requirements
- Appropriately equipped treatment rooms
- Operating theatre

Workforce requirements
- Visiting ophthalmologist
- Accredited registered medical practitioner in anaesthetics
- Registered medical practitioner or a GP on-call 24 hours
- RNs with appropriate post graduate qualifications and/or experience in ophthalmology
- Access to orthoptists

Level 6 Ophthalmology

**Service description**
A Level 6 service provides services at Level 5 plus this service has the ability to manage complex major diagnostic and treatment procedures in association with other specialties.

**Service requirements**
As for Level 5 plus:
- On-site neurosurgery
- On-site radiation oncology
- Ability to accept referrals for complex cases from lower level services
- May provide interstate referral role

**Workforce requirements**
As for Level 5.

Oral Health

Oral health includes emergency and elective treatment of oral health problems of varying levels of clinical complexity.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Oral Health

A level 1 service is provided by non-oral health professionals that are trained to identify disease and refer to a Level 2 Service.

Level 2 Oral Health

Service description

A Level 2 service performs low complexity oral health care to paediatric patients. Clinical care is provided by dental therapists or oral health therapists on a minor outpatient or same-day basis. Treatments provided include dental hygiene, restorations for patients aged <18 years and extractions of deciduous teeth. A level 2 service does not extract permanent teeth, but refers these patients to a Level 3 service.

Service requirements

- On-site or mobile dental services
- Outpatient care in a community setting or dental clinic
- Infrastructure required to provide routine oral health services including:
  - Dental chair
  - Compressor
  - Evacuation facilities
  - Dental light
  - Operator and assistant chairs
  - Intra-oral x-ray machines

Workforce requirements

- Dental and oral health therapists with skills in low complexity general oral health services
- Dentist available for consultation or referral

Level 3 Oral Health

Service description

A Level 3 service provides services at Level 2 plus provides services to adult and paediatric patients by registered dentists credentialed to provide community dental services.
Service requirements

As for Level 2 plus:

- Access to dental laboratory within the network

Workforce requirements

As for Level 2 plus:

- On-site prosthodontists
- Registered dentists
- Dental nurse with the appropriate education and expertise

Level 4 Oral Health

Service description

A Level 4 service provides services at Level 3 plus inpatient and outpatient dental services for patients with complex medical and/or dental care needs.

Service requirements

As for Level 3 plus:

- Dental suite with two or more dental chairs
- At least one operating/procedure room with separate recovery area/room for post-operative care
- Access to designated acute surgical inpatient unit with RNs with appropriate post graduate qualifications and/or experience in post-operative nursing; RNs may be supported by ENs in providing care to inpatients

Workforce requirements

As for Level 3 plus:

- Specialist paediatric anaesthetists on-site for children under three years of age
- On-site medical practitioners credentialed to administer anaesthetics
- Access to maxilla-facial services in the network or on-site

Level 5 Oral Health

Service description

A Level 5 service provides services at Level 4 plus moderate to high level of complexity and risk dento-alveolar, osteotomy and oral oncology procedures are performed, and management of some patients with comorbidities and risk of intra- and post-operative complications occurs. This service has the ability to undertake most emergency surgeries.

Service requirements

As for Level 4 plus:

- Outreach services to lower level services in the network
- On-site facio-maxillary surgery service
- Formal linkage with interstate Level 6 Oral Health Service

Workforce requirements

As for Level 4 plus:

- On-site facio-maxillary surgeon
- Formal access to oral medicine specialist
- RNs with appropriate post graduate qualifications and/or experience in peri-operative and post-operative nursing

Orthopaedics

Orthopaedics is the clinical specialty involving the treatment of diseases and abnormalities of the musculoskeletal system due to trauma, congenital developmental abnormalities, degenerative or disease processes.

Depending on the role level of service, this service may include general orthopaedics, trauma, joint replacement, orthotics and a range of other specialised components. Treatment ranges from non-surgical management to surgical management on an emergency, acute and elective basis. Higher level Orthopaedic Services rely on access and links to other appropriate specialists.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

May provide surgical procedures on children (refer to Paediatric Surgery Service Framework within this document).

Level 1 Orthopaedics

No Level 1 service currently described.

Level 5 Orthopaedics Services

Service description

A Level 5 service provides services at Level 4 plus it provides a full range of major diagnostic and treatment procedures on low, moderate and high risk patients performed by orthopaedic surgeons.

Service requirements

As for Level 4 plus:

- On-site ICU
- May have research role

Workforce requirements

As for Level 4 plus:

- Orthopaedic surgeons on-site; and on-call 24 hours
- Radiologist on-call 24 hours
- Specialist intensive care physician on-site 24 hours
- On-site infectious diseases physician
- CNC providing leadership in orthopaedic care
- Access to specialised allied health services Level 3 service and above for inpatients, as required.
- Access to a greater range of pre and post-surgical allied health programs available for outpatients
Level 6 Orthopaedics

Service description

A Level 6 service provides services at Level 5 plus it has the ability to deal with all cases including full range of complex cases (and all emergencies) in association with other specialists.

Service requirements

As for Level 5 plus:

- Statewide referral role
- Research role
- Links/access to comprehensive acute and persisting pain management and rheumatology services
- Use of consultant led but allied health delivered comprehensive clinical assessment and triage systems for degenerative musculoskeletal and soft tissue conditions
- Link to Level 5 Rehabilitation Service

Workforce requirements

Paediatric Medicine

Paediatrics is a medical specialty that manages medical conditions affecting babies, children and young people.

The scope of this Framework describes each level of paediatric medicine service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Paediatric Medicine

Service description

A Level 1 service has no planned inpatient medical service or designated inpatient beds.

A Level 1 service provides outpatient care and stabilisation for children, including first line management of paediatric emergencies by registered medical practitioners or GPs prior to moving to appropriate higher level Paediatric Medicine service.

Service requirements

- Services delivered in an accredited health care facility
- Access to advice and ability to refer to higher level Paediatric Medicine services
- Formal link to community child and family health service
- Access to paediatric emergency training including resuscitation

Workforce requirements

- Registered medical practitioner or GP
- Formal consultative links with paediatrician

Level 2 Paediatric Medicine

Service description

A Level 2 service has a designated inpatient area where care can be provided to paediatric patients with minor medical conditions.

Service requirements

As for Level 1 plus:

Workforce requirements

Paediatric Surgery

Paediatric surgery is a surgical specialty that manages medical conditions affecting babies, children and young people.

The scope of this Framework describes each level of paediatric surgery, its requirements and the minimum staffing needs and clinical support services required within each level.

In addition this Framework covers anaesthesia and sedation of infants and small children who require this for diagnostic procedures and other simple non-surgical interventions, mandating post-procedural care with similar staffing and clinical support needs to the post-surgery child.

Where facilities provide surgical or anaesthetic services for term infants (< 1 year) and ex-premature infants (> 52 weeks post conceptual age), registered medical specialists providing anaesthesia or surgery must have appropriate credentials.

Level 1 Paediatric Surgery

Service description

A Level 1 service provides primary and emergency outpatient care prior to transfer only. No inpatient services available.

Service requirements

- Services delivered in an accredited health care facility
- Access to more specialised paediatric surgical care at a higher level Paediatric Surgery Service
- Requires formal referral pathway for surgical patients

Workforce requirements

- Registered medical practitioner delivering services
- Formal consultative links with paediatrician
- Formal consultative links with paediatric surgeons from higher level service available 24 hours

Level 2 Paediatric Surgery

Service description

A Level 2 service provides services at Level 1 plus manages low-risk (ASA\(^8\) 1-2) paediatric patients undergoing SCI procedures (refer to General Surgery Framework).

A Level 2 service can be performed in an ambulatory, day surgery or emergency room setting. There are no planned inpatient paediatric surgical services available.

Service requirements

As for Level 1 plus:

---

\(^8\) American Society of Anaesthesiologists Score - a global score that assesses the physical status of patients before surgery
• At least one procedure room
• Isolation capacity

**Workforce requirements**

As for Level 1 plus:

• Registered medical practitioner delivering services
• Registered medical practitioner available 24 hours with demonstrated competency in the application of paediatrics anaesthetics
• RNs with appropriate postgraduate qualifications and/or experience in paediatric nursing; RNs may be supported by ENs in providing care to patients

**Support service requirements**

**Level 3 Paediatric Surgery**

**Service description**

A Level 3 service provides services at Level 2 plus performs surgery on low anaesthetic risk (ASA 1-2) paediatric patients undergoing SC11 and SC111 procedures, as well as anaesthesia for simple non-surgical procedures.

This level of service provides inpatient and outpatient care by a paediatrician.

**Service requirements**

As for Level 2 plus:

• Appropriate surgical, anaesthetic and resuscitation equipment available
• Access to operating surgeon until patient has recovered from anaesthesia and meets the post-anaesthetic care service discharge criteria, as per facility guidelines and Australian and New Zealand College of Anaesthetics (ANZCA)
• Access to emergency services 24 hours
• Perioperative services available
• Continuing nursing educational programs available specific to the needs of the service
• Designated children’s ward with parent amenities
• Facility to isolate in single room
• Operating suite and recovery room provide for the special needs of children and carers
• Amenities for parents or carers

**Workforce requirements**

As for Level 2 plus:
• Operating surgeons credentialed in paediatrics with the approved clinical scope of practice
• Anaesthetists credentialed in paediatrics, with the approved clinical scope of practice
• Paediatrician on-site during business hours and available 24 hours
• Paediatrics registrar available 24 hours
• Registered medical practitioner on-site 24 hours
• Access to specialist paediatric allied health professionals

Palliative Care

Palliative care services refer to a group of services that cover the continuum of care required for all people who are experiencing a life limiting illness with little or no prospect of a cure. Services also extend to the patient’s family, friends and their carers and are provided in acute hospital, sub-acute and community settings.

The scope of this Framework recognises that:

- Patients with life-limiting illnesses require different levels of involvement from the Department of Health Palliative Care Service (Palliative Care Service) based on their needs and the primary care provider’s capability and capacity to meet those needs;
- Many patients receive primary palliative care without having any contact with the Palliative Care Service (Level 1) and makes a clear distinction between the consultation-liaison (Level 2), shared care (Level 3) and services provided directly by the Palliative Care Service (Level 4; and
- The Palliative Care Service supports palliative care service provision across all four levels.

Level 1 Palliative Care

Service description

A Level 1 service provides culturally appropriate palliative care for the patient, carer and family in accordance with the National Standards for Palliative Care by a primary care provider. This includes patients, carer and family being informed and involved in decision making. The primary care provider is the designated Coordinator of Care.

A Level 1 service can consult with a higher level Palliative Care service if information is needed or refer the patient for assessment if the patient needs exceed the primary care provider’s capability and/or capacity.

Service requirements

- Assess patient needs
- Pain and symptom control
- Provides social, spiritual and emotional support to patients and their carers and family
- Patient risk assessments
- Agreed care plans
- Provides after-hours support
- Co-ordination of patient, carer and family needs
- Offers bereavement support

Level 2 Palliative Care

Service description

A Level 2 service coordinates and manages all the patient’s needs using a palliative care approach by a primary care provider but with consultation and liaison from a higher level Palliative Care service.
A Level 2 service can consult with a higher level Palliative Care service if information is needed or re-refer the patient for further assessment if the patient needs exceed the primary care provider’s capability and/or resources.

Service requirements

As for level 1 plus care is provided in accordance with the National Standards for Palliative Care.

Level 3 Palliative Care

Service description

A Level 3 service provides multidisciplinary services to patients with complex and unstable conditions to receive ongoing high level care. Level 3 patients have been admitted to the Palliative Care Service. Care of patients is shared between the primary care provider and the Palliative Care Service.

A Level 3 service negotiates and formalises arrangements to meet the patient’s needs with the primary care provider, patient, carer and family. The designated co-coordinator of care (lead agency) may be a palliative care physician.

Service requirements

- Patient assessment and care coordination and management shared between the Palliative Care Service and the primary care provider
- 24 hours, seven days a week support and advice to the patient, carer and primary care provider
- Provide episodic assessment, care planning and/or advice to lower level services (primary care providers)
- Provide after-hours services
- Regular reviews of the plan of care with the primary care provider, patient, carer and family as required
- Access to bereavement support
- Provide training and professional development for lower level services (primary care providers) through the provision of resources and information
- Access to some allied health services and social worker for psycho-emotional, social and spiritual problems

Workforce requirements

- Access to a palliative medicine specialist
- 24 hour cover by RNs with appropriate post graduate qualifications and/or experience in palliative care nursing; RNs may be supported by ENs in providing care to inpatients
- CNC specialising in palliative care and providing leadership across the service
- May have NP
- Social worker with palliative care expertise
Level 4 Palliative Care

Service description

A Level 4 service is provided predominantly by the multidisciplinary Palliative Care Service to patients with complex and unstable conditions to receive ongoing high level care.

A Level 4 service negotiates and formalises arrangements to meet the patient’s needs with the primary care provider, patient, carer and family and assumes primary responsibility for patient management, usually in its dedicated inpatient specialist palliative care unit.

Service requirements

As for Level 3 plus:

- 24 hour clinical management by the specialist palliative care team
- Team consists of allied health members with specialised palliative care experience and knowledge
- Research and development

Workforce requirements

As for level 3.
Persistent Pain Medicine

Pain management specialists are experts in the diagnosis of causes of pain and in the management of pain. Anaesthetists, rheumatologists, neurologists and sub-specialist surgeons may specialise in pain management. Specialist pain services are comprised of multidisciplinary teams of medical practitioners, specialist nurses, allied health professionals, and psychologists.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Persistent Pain Medicine
No Level 1 service currently described.

Level 2 Persistent Pain Medicine
No Level 2 service currently described.

Level 3 Persistent Pain Medicine
A Level 3 service provides appropriate referral of patients by a registered medical practitioner or GP and outpatient management by designated nursing, psychology and allied health services, for patients who have been assessed by a higher-level Persistent Pain Medicine Service.

A Level 3 service may participate in multidisciplinary meetings regarding patient management.

Under a Level 3 service, management of treatment is supervised by a health professional team with persistent pain medicine experience/training.

Level 4 Persistent Pain Medicine

Service description

A Level 4 service provides ambulatory persistent pain medicine services by a multidisciplinary team led by a specialist medical practitioner with sub-specialty training in pain medicine. No inpatient pain medicine services are provided.

A Level 4 service has strong network linkages with a higher level Persistent Pain Medicine Service.

Service requirements

- Formal network linkage with Level 6 Persistent Pain Medicine service for the referral of patients with pain management conditions (as specified in designated statewide musculoskeletal clinical pathways)
- Access to visiting pain management specialist
- Access to Level 6 interdisciplinary persistent pain medicine team
- On-site medically supervised ambulatory service, with therapies determined in consultation with Level 6 Persistent Pain Medicine Service

Workforce requirements

- Visiting registered medical practitioner with sub-specialty training in pain medicine
- Designated allied health professional team on-site, supported by visiting specialist team
• On-site care co-ordinator

## Level 5 Persistent Pain Medicine

### Service description

A Level 5 service provides services at Level 4 plus may provide procedural pain management services.

### Service requirements

As for Level 4 plus:

- Pain management services provided by designated multidisciplinary team with formal network linkage to Level 6 Persistent Pain Medicine Service
- Access to interventional radiology in the network
- Access to neurosurgery and spinal orthopaedics in the network
- May have research role

### Workforce requirements

As for Level 4 plus:

- Designated pain management multidisciplinary team including pain medicine consultant
- Access to pain medicine CNCs
- Medical registrar on-call 24 hours
- Sub-specialists available on-site for consultation
- Specialised allied health services on-site

## Level 6 Persistent Pain Medicine

### Service description

A Level 6 service provides services at Level 5 plus a full range of pain medicine services including clinical supervision, education and prevention activities.

A Level 6 service provides Persistent Pain Medicine inpatient services.

### Service requirements

As for Level 5 plus:
• Statewide referral role
• On-site interdisciplinary pain management service (with a minimum of pain medicine, rheumatology, anaesthetics, specialist physiotherapy and psychology expertise)
• On-site neurosurgery and spinal orthopaedics
• On-site interventional radiology and day case procedure facilities
• Accredited pain medicine training programs
• Research role

Workforce requirements

As for Level 5 plus:
• On-site pain medicine registrar
• Medical registrar on-site 24 hours
• Specialist pain medicine CNC
• Specialised psychology services
• Physiotherapists with advanced scope of persistent pain practice

Plastic and Reconstructive Surgery

Plastic and reconstructive surgery refers to the surgical discipline that delivers services to repair, remodel and / or restore body parts.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Plastic and Reconstructive Surgery

No Level 1 service currently described.

Level 2 Plastic and Reconstructive Surgery

No Level 2 service currently described.

Level 3 Plastic and Reconstructive Surgery

Service description

A Level 3 service provides minor plastic and reconstructive surgery outpatients and same day procedures by a visiting plastic surgeon.

Service requirements

As for Level 2 plus:

- At least one operating/procedure room with separate recovery area/room for post-operative care
- On-site registered medical practitioner credentialed to administer anaesthetic
- Medical, anaesthetic and nursing pre-admission services
- IV (intravenous) fluid therapy available

Workforce requirements

As for Level 2 plus:

- Visiting specialist plastic surgeon
- Registered medical practitioner credentialed to administer anaesthetic
- Perioperative trained RNs
- 24 hours access to a registered medical practitioner (off-site or on-call)
- Access to allied health services, as required

Rehabilitation

Rehabilitation Services provides care that is goal-directed, time limited, and multidisciplinary that aims to:

- Restore functional ability for a person who has experienced illness or injury
- Enable regaining function and self-sufficiency to the level prior to that illness or injury within the constraints of the medical prognosis for improvement
- Develop function ability to compensate for deficits that cannot be medically reversed

Services provided in this category range from ambulatory services or those delivered in a community setting, to inpatient Rehabilitation Services with access to dedicated multidisciplinary teams for those with complex care needs.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

**Level 1 Rehabilitation**

No Level 1 service currently described.

**Level 2 Rehabilitation**

**Service description**

A Level 2 service provides ambulatory care via outreach from higher level Rehabilitation services. Care may be provided in home or community settings and/or in healthcare facilities, generally delivered by nursing and/or allied health led services with oversight from higher level Rehabilitation services.

**Service requirements**

- Care coordination with multidisciplinary team input using documented rehabilitation care and treatment plan
- Individualised self-managed therapy and treatment programs
- Access to higher level Rehabilitation service in the network including the consultation and coordination of rehabilitation services based in the community
- Access to appropriate rehabilitation equipment, as required

**Workforce requirements**

- 24 hours access to a registered medical practitioner, or a GP
- 24 hours access to RN
- Access to allied health professionals, including physiotherapist, occupational therapist, speech pathologist, dietitian, psychologist, and social worker
- Access to Allied Health or Rehabilitation Assistant

Level 3 Rehabilitation

Service description

A Level 3 service provides services at Level 2 plus it provides ambulatory care to clients whose rehabilitation needs are not highly complex.

Ambulatory care will include outpatient clinics for ongoing treatment or review; which may be provided by a visiting medical specialist from a higher level Rehabilitation service or via telehealth.

Service requirements

As for Level 2 plus:

- May have designated therapy areas and equipment
- Multidisciplinary team with access to medical, nursing and allied health staff provided as outreach by higher level Rehabilitation service to co-ordinate
- Access to clinical support services and post-hospital services to facilitate ongoing community management
- Established referral pathway between acute, sub-acute, and community rehabilitation services

Workforce requirements

As for Level 2 plus:

- Access to consultant physician with knowledge and skills in rehabilitation from a higher level Rehabilitation service via telehealth
- On-site RNs with experience in rehabilitation nursing
- On-site allied health professionals with experience in rehabilitation
- On-site allied health assistants or rehabilitation assistants to support rehabilitation management programs.

Level 4 Rehabilitation

Service description

A Level 4 service provides services at Level 3 plus it provides rehabilitation assessment and management of a full range of programs across all settings (admitted, outpatient, community and home).

Service requirements

As for Level 3 plus:

- Designated rehabilitation unit
- Access to manufacture of specialist aids and equipment
- Dedicated multidisciplinary team involvement and case management approach that provides in-reach across the acute, sub-acute and community health settings
- Co-ordinated ambulatory services for ongoing management of patients

**Workforce requirements**

As for Level 3 plus:

- Access to rehabilitation physician from higher level Rehabilitation service
- Visiting specialist consultant rehabilitation physician
- On-site CNC and / or NP providing leadership in rehabilitation
- On-site psychology, occupational therapy, physiotherapy, dietetics, speech pathology orthotics and prosthetics
- Access to additional specialty services (i.e. neuropsychology)

**Level 5 Rehabilitation**

**Service description**

A Level 5 service provides services at Level 4 plus it focuses on patients for targeted rehabilitation programs.

**Service requirements**

As for Level 4 plus:

- Dedicated multidisciplinary team led by a rehabilitation physician and comprising specialists with extensive experience in all disciplines (medical, allied health, nursing) that are involved in leadership, liaison, research and support for other lower level Rehabilitation Services
- Accredited training site for Australasian Faculty of Rehabilitation Medicine trainees
- Additional infrastructure and equipment commensurate with rehabilitation needs of most complex patients, which may include hydrotherapy

**Workforce requirements**

As for Level 4 plus:

- Consultant rehabilitation physician
- Rehabilitation registrar
- Geriatrician
- Neuropsychologists
- CNC
Level 6 Rehabilitation

Service description

A Level 6 service provides services at Level 5 plus it provides services for clients with care needs of the highest complexity, including those with traumatic brain injury, brachial plexus injury, spinal cord injury, multiple fractures, complex multi-trauma and limb amputation care needs.

Service requirements

As for Level 5 plus:

- A range of diagnostic services relating to the individual specialty available on-site
- Networked with hydrotherapy and work conditioning programs
- Designated daily living and therapy areas for activities of daily living and group programs
- Specialist consultancy services, and specialty outreach services provided
- Access to a pool of specialty equipment pertaining to specialty areas
- Has a step down unit
- Has a teaching role
- Has a research role

Workforce requirements

As for Level 5 plus:

- Sub-specialty rehabilitation physicians, including brain injury, spinal cord injury and amputee management
- An extensive range of allied health professionals available on-site, with demonstrated specialist level knowledge and skills pertaining to casemix
- On-site physiotherapist available 7 days a week during business hours
- Access to a social worker, 7 days a week during business hours
- A rehabilitation engineer

Respiratory and Sleep Medicine

Respiratory and Sleep Medicine is the branch of medicine that diagnoses and manages diseases of the respiratory system. The service can be delivered by respiratory specialists at larger hospitals, performing emergency care and diagnostic tests through to registered medical practitioner or GPs providing outpatient services in smaller facilities.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Respiratory and Sleep Medicine

No Level 1 service currently described.

Level 2 Respiratory and Sleep Medicine

A Level 2 service provides inpatient management of low-acuity respiratory conditions, under the management of a registered medical practitioner.

Service requirements

- Basic patient monitoring including oximetry
- Provides on-site oxygen therapy
- May have access to allied health services
- Management and appropriate referral to a higher level Respiratory and Sleep Medicine service, including network access to specialist support

Workforce requirements

- Access to a registered medical practitioner or a GP
- On-site RN; RNs may be supported by ENs in providing care
- May have access to respiratory nurses and physiotherapists

Level 5 Respiratory and Sleep Medicine

Service description

A Level 5 service provides services at Level 4 plus it provides inpatient care by a resident respiratory physician.

Service requirements

As for Level 4 plus:

- Strongly linked with Level 6 respiratory services
- Category 3 or above respiratory function unit on-site and a bronchoscopy suite
- Ward based non-invasive ventilatory capability
- Access to specialist cardiology and cardiothoracic surgery services on-site or within the network
- Provision of specialist pulmonary rehabilitation services
- Accredited respiratory advanced training program
- Strongly linked with a sleep service
- Access to specialised allied health services

Workforce requirements

As for Level 4 plus:

- On-site respiratory physician
- Respiratory physician on-call 24 hours
- Accredited respiratory medicine registrar
- Medical registrar on-site 24 hours
- CNC specialising in respiratory nursing and providing leadership for the service
- Access to specialised allied health services

Level 6 Respiratory and Sleep Medicine

Service description

A Level 6 service provides services at Level 5 plus it provides a complete range of diagnostic services, a full range of respiratory services, with a respiratory department and provision of emergency care. This

---

9 ‘Thoracic Society of Australia and New Zealand Respiratory Function Unit (Adult Lung Function Laboratory) Categories’
service plans and delivers statewide services and develops statewide protocols for management of respiratory conditions.

The following procedures are not currently performed in Tasmania and are sent interstate:

a) Bronchial thermoplasty

b) Endobronchial lung volume reduction techniques.

**Service requirements**

As for Level 5 plus:

- 10 Category 4 Respiratory function unit on-site
- Provides full diagnostic procedures
- Provides advanced bronchoscopy
- Integrated public sleep service with laboratory on-site
- Specialised medical ward with non-invasive ventilation (NIV) capability/area
- On-site Cardiothoracic Surgery and PET scanning
- Statewide and interstate referral role
- Active research role

**Workforce requirements**

As for Level 5 plus:

- On-call respiratory medicine specialist
- Accredited respiratory medicine registrar(s)
- Advanced bronchoscopy provider(s)
- CNC position that complements RNs with specialist skills e.g. Lung cancer, Tuberculosis
- Specialist Respiratory Physiotherapist

10 ‘Thoracic Society of Australia and New Zealand Respiratory Function Unit (Adult Lung Function Laboratory) Categories’
Rheumatology

Rheumatology is a sub-specialty in internal medicine that diagnoses and manages non-surgical joint, muscle and bone conditions, and other rheumatic diseases.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Rheumatology

No Level 1 service currently described.

Level 2 Rheumatology

A Level 2 service provides outpatient management and appropriate referral of patients by a registered medical practitioner or a GP for patients who are under the care of a Level 5 or Level 6 Rheumatology service.

A Level 2 service has links with community nursing and allied health services.

Level 3 Rheumatology

A Level 3 service provides outpatient management and appropriate referral of patients by a physician practicing in general medicine or equivalent, and nurse-led ambulatory rheumatology services, for patients who are under the care of a Level 5 or Level 6 Rheumatology service.

A Level 3 service may participate in multi-disciplinary meetings with higher-level services regarding patient management and has links with community nursing and allied health services.

Level 4 Rheumatology

Service description

A Level 4 service, in consultation with a visiting rheumatologist from a higher-level service, provides on-site ambulatory rheumatology services.

The visiting rheumatologist from higher-level service is responsible for clinical decisions regarding treatment and co-ordinating care.

A level 4 service is responsible for referring patients to a visiting rheumatologist from a higher level Rheumatology Service for diagnosis, assessment and management of their condition.

Service requirements

- Designated ambulatory day beds with capacity to provide day case therapies in consultation with a higher level Rheumatology Service, under medical supervision by an on-site physician practicing in general medicine
- Access to visiting rheumatologist for outpatient care (including via telehealth)
• Formal network linkage with higher level Rheumatology Service for the referral of patients with rheumatological conditions (as specified in designated statewide musculoskeletal clinical pathways)
• Access to allied health services within the network

Workforce requirements

• Registered medical practitioner or a GP on site 24 hours
• Access to visiting specialist rheumatologist (including via telehealth)
• 24 hour access to physician practicing in general medicine (on-call)
• Qualified and/or experienced RNs in the administration of biological and other therapies
• Access to designated allied health professional and psychological services

Level 5 Rheumatology

Service description

A Level 5 service provides services at Level 4 plus may provide some inpatient rheumatology services. This service has access to rheumatology multidisciplinary teams.

Service requirements

As for Level 4 plus:

• Ambulatory and inpatient rheumatological care provided by appointed rheumatologist
• Access to multidisciplinary team including specialised allied health services, including pharmacy
• Formal network linkage to Level 6 Rheumatology Service
• Access to infectious diseases service
• Access to on-site orthopaedic service
• Access to PET scanning and interventional radiology in the network
• Access to neurosurgery, spinal orthopaedics, vascular surgical services and pain management service in the network
• May have research role
• Access to rheumatology clinical trials in the network

Workforce requirements

As for Level 4 plus:
- Appointed rheumatology specialist
- Access to specialist rheumatology CNCs
- Medical registrar on-site and physician practicing in general medicine on-call 24 hours
- Sub-specialists available on-site for consultation
- Access to designated specialised allied health services

Sexual Assault Services

Sexual Assault Services provide medical care to children and adults who have experienced a recent sexual assault (within the preceding 7 days).

The service offers forensic medical examinations (FME) to victims of recent sexual assault. FMEs are conducted principally to aid the investigation of a criminal/legal matter through the collection of biological and other materials. It also allows initial treatment for injuries and provides a plan for ongoing medical care for victim to address the risks of pregnancy or sexually transmitted infections.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Sexual Assault Services

No Level 1 service currently described.

Level 2 Sexual Assault Services

No Level 2 service currently described.

Level 3 Sexual Assault Services

Service description

A Level 3 service provides an integrated assessment and management of children, young people and/or adults prior to referral to higher level sexual assault service, so as to preserve forensic evidence and provide psychosocial crisis response.

It will have formal network linkages with a higher level sexual assault service, including agreed protocols, referral processes, clinical advice and support (may include telehealth).

Level 4 Sexual Assault Services

Service description

A Level 4 service undertakes FMEs on adults who have experienced a recent sexual assault (within the preceding 7 days). It does not perform acute FMEs on children. A Level 4 service also facilitates access to initial and follow-up medical care and counselling services.

Service requirements

- Has qualified Forensic Examiner/s on-call
- Designated area for sexual assault care and examination separate to emergency department care but within the hospital setting
- No after-hours sexual assault medical service
- Able to assist with transport to a higher level Sexual Assault Service
- Formal links with a 24 hours crisis counselling service
- Access to medical care
• Training and adherence to *Child, Young Persons and Their families Act 1997; Family Violence Act 2004*; and collaborative Interagency Agreements in all regions for Victims of Recent Sexual Assault

**Workforce requirements**

• Qualified Forensic Nurse/Midwife Examiner

Trauma

Trauma services provide initial assessment, stabilisation and management of patients presenting with trauma.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

**Level 1 Trauma**

No Level 1 service currently described.

**Level 2 Trauma**

No Level 2 service currently described.

**Level 3 Trauma**

**Service description**

A Level 3 service provides care for minor trauma only, and an initial trauma response including reception, assessment, resuscitation and stabilisation for major trauma and who require emergency transfer to a higher level Trauma Service in accordance with statewide major trauma bypass procedures.

**Service requirements**

- Primary response for trauma cases that do not activate statewide major trauma bypass criteria
- Stabilisation prior to retrieval by road, fixed wing or rotary wing retrieval service
- Helicopter landing site
- Initial disaster response in a mass casualty event where it is the nearest emergency health service
- May have access to emergency blood stock (e.g. O negative units) if supported by a higher level blood service
- Contributes data to state trauma registry

**Workforce requirements**

- Registered medical practitioner or a GP with postgraduate training in emergency management in attendance within 30 minutes
- On-site RN available 24 hours

**Support service requirements**

Level 4 Trauma

Service description

A Level 4 service provides services at Level 3 (i.e. primary response for trauma cases that do not activate statewide major trauma bypass criteria) plus the options for:

1) Limited emergency surgical resuscitation and bleeding control of exsanguinating major trauma; and
2) Limited local holding for stable major trauma cases for up to 24 hours in ICU.

Paediatric and obstetric major trauma may have primary trauma care, and management of immediately life threatening conditions only, prior to transfer to a Level 6 Trauma Service.

A Level 4 service is able to receive patients from a Level 3 service where transfer to a Level 5 or 6 Trauma Service is not feasible or not warranted.

Service requirements

As for Level 3 plus:

- On-site emergency and surgical management of non-major trauma
- Operating suites with 24 hour availability
- Prompt assessment, resuscitation and stabilisation of seriously injured patients prior to transfer to higher level Trauma Service
- Trauma reception capability based on trauma team response
- Formal transfer arrangements in place with Level 5 and Level 6 Trauma Services
- On-site emergency department with 24 hours
- On-site Critical Care Service with limited holding capacity
- Emergency blood stocks and limited blood product availability supported by a higher level blood service
- Access to sub-speciality surgery services (e.g. neurosurgery and cardiothoracic) services within the network
- Role in management, assessment and treatment of minor trauma in mass casualty disaster response

Workforce requirements

- Consultant surgeon (Fellow of the Royal Australasian College of Surgeons (RACS)) available within 30 minutes
- Consultant anaesthetist (Fellow of the Australian and New Zealand College of Anaesthetists) available within 30 minutes
- Emergency medicine personnel available 24 hours
- RNs with experience and/or post graduate qualifications in emergency nursing
Level 5 Trauma

Service description

A Level 5 service is a major trauma service that may provide primary response for trauma cases that do not activate statewide major trauma bypass criteria. This service also provides comprehensive clinical care for major trauma patients whose care needs do not include neurosurgery (including spinal injuries), cardiothoracic surgery, paediatric trauma, obstetric trauma and any other services and interventions not provided by the Level 5 Trauma Service.

These cases may have primary trauma care and management of immediately life threatening conditions prior to transfer to the Level 6 Trauma Service.

A Level 5 service is able to receive patients from Level 3 or 4 Trauma Service where transfer to a Level 6 Trauma Service is not feasible or not warranted.

Service requirements

As for Level 4 plus:

- On-site surgical specialty and sub-speciality disciplines available 24 hours
- Emergency department, operating theatres, adult ICU available 24 hours for trauma
- Role in management of major trauma cases up to 72 hours according to State Incident Management directives and longer if directed during mass casualty disaster response mandating whole-of-state response
- Access to transfusion service support in the network, including blood bank and specialist haematology
- Medical imaging including MRI and limited interventional radiology services

Workforce requirements

As for Level 4 plus:

- Specialist general, orthopaedic, urology and plastic reconstructive surgeons available or on-call 24 hours
- 24 hour availability of consultant specialist anaesthetists in general capacity (Fellows of the Australian and New Zealand College of Anaesthetists), emergency medicine physicians (Fellow of the Australasian College for Emergency Medicine) and critical care medicine physicians (Fellowship of the CICM of Australia and New Zealand)
- Director of Surgery (Fellow of the RACS) as Head of Trauma
- RNs with appropriate post graduate qualifications and/or extensive experience across Trauma services such as Emergency Medicine and Intensive Care Services
• 24 hour availability of general surgery registrar, anaesthetic registrar, emergency department registrar, and ICU registrar
• Speciality registrars on-call 24 hours
• All surgical, anaesthetic, ICU and emergency department consultants on-call 24 hours
• Critical care medicine specialist (Fellow of the CICM of Australia and New Zealand) available 24 hours
• Access to specialist haematologist and transfusion medicine scientist in the network

Level 6 Trauma

Service description

A Level 6 service is a major trauma service that provides a full spectrum of care for the most critically injured patients, from initial reception and resuscitation through to discharge and rehabilitation.

It is the principal hospital for all major trauma cases across the state, including capacity to receive of inter-hospital transfer of major trauma patients from all other levels of care.

Service requirements

As for Level 5 plus:

• On-site elective and emergency surgery and perioperative care for statewide surgical services: neurosurgery, cardiothoracic, vascular, oral and maxillofacial surgery
• On-site statewide services for neonatal and paediatric intensive care, and high risk obstetrics
• Interventional radiology services capable of intravascular intervention
• State trauma outreach responsibilities, both in terms of consultation and advice, as well as capability for pre-hospital responses, transport and intra-hospital retrieval
• Ability to raise and sustain a Medical Assistance Team for deployment to assist in the management of a mass casualty at short notice
• Responsibility for coordination of interstate transfers
• Trauma education: trauma curriculum including RACS: Emergency Management of Severe Trauma Course with access to immersive simulation training
• Research role

Workforce requirements

As for Level 5 plus:

• 24 hour availability of all senior consultant level surgical disciplines
- 24 hour availability of senior consultant specialist anaesthetists with both general and subspecialty capacity (Fellows of the Australian and New Zealand College of Anaesthetists), emergency medicine physicians (Fellow of the Australasian College for Emergency Medicine) and critical care medicine physicians (Fellowship of the CICM of Australia and New Zealand)
- 24 hour availability of neonatologists, paediatric intensive care specialists, and obstetricians
- Statewide major trauma service: appointed Director of Trauma Services;
- Statewide major trauma service: appointed trauma nurse coordinator
- On-site specialist haematologist and transfusion medicine scientists

Urology

Urology deals with the diagnosis and treatment of diseases of both the male and female urinary tract as well as the male reproductive tract. Depending on the role level of surgical service provided, service components may range from day stay surgery and basic endoscopic procedures to elective and acute procedures including trans-urethral or trans-rectal procedures and trauma cases.

Appropriate levels of clinical support service provision are extremely important especially for anaesthetics, perioperative, pathology, medical imaging and pharmacy as well as access to appropriate allied health services. Higher level Urologic Services rely on access and links to other appropriate specialists.

The scope of this Framework describes the surgical service, its requirements and the minimum staffing needs and clinical support services required within each level.

May provide surgical procedures on children (refer to Paediatric Surgery Service Framework within this document).

Level 1 Urology

No Level 1 service currently described.

Level 2 Urology

No Level 2 service currently described.

Level 3 Urology

No Level 3 service currently described.

Level 4 Urology

Service description

A Level 4 service provides common and intermediate day procedures on low risk patients performed by a visiting urologist or general surgeon credentialed in urology.

Workforce requirements

- Visiting urologist or general surgeon credentialed in urology
- RNs with appropriate qualifications and/or experience; RNs may be supported by ENs in providing care to patients
- Access to allied health services, as required

Level 5 Urology

Service description

A Level 5 service provides services at Level 4 plus it performs procedures on low or moderate risk patients by a visiting urologist.

Service requirements

As for Level 4 plus:

- Designated acute surgical inpatient unit with appropriately trained surgical specialist nursing staff
- Has links with cancer services and palliative care services

Workforce requirements

As for Level 4 plus:

- Visiting urologist
- On-site general surgeon on-call 24 hours
- Surgical registrar on-call 24 hours
- Specialist anaesthetists on-site; and on-call 24 hours
- Anaesthetics registrar on-call 24 hours
- RNs/ENs with appropriate post graduate qualifications and/or experience in urology
- Access to CNC specialising in urology
- Access to designated allied health services

Level 6 Urology

Service description

A Level 6 service provides services at Level 5 plus it has the ability to deal with a full range of complex cases on low, moderate and high risk patients performed by an appointed urologist in association with other specialists.

Service requirements

As for Level 5 plus:

- Accredited urology surgical training program

Workforce requirements

As for Level 5 plus:
• Urology consultant on-site; and on-call 24 hours
• Urology registrars on-site; and on-call 24 hours
• Dedicated CNC specialising in urology and providing leadership within the service
• Comprehensive continence service
• Access to specialised allied health services

Vascular Surgery

Vascular surgery is a specialty of surgery in which diseases of the venous, lymphatic, and arterial systems are diagnosed and managed. Depending on the level of service provided, vascular surgical services may include medical, minimally invasive endovascular and open surgical procedures.

Appropriate levels of infrastructure and clinical support service provision are important in vascular surgical services, especially anaesthetics, perioperative, intensive care, imaging, renal medicine, endocrinology and pharmacy services. Higher level Vascular Surgery Services rely on access and links to other appropriate specialists, including cardiothoracic and interventional radiology services.

The scope of this Framework describes the service, its requirements and the minimum staffing needs and clinical support services required within each level.

Level 1 Vascular Surgery

No Level 1 service currently described.

Level 2 Vascular Surgery

Service description

A Level 2 service provides routine day case vascular surgery for low risk patients requiring low complexity surgery.

Service requirements

- Appropriate vascular surgical and anaesthetic equipment available on-site
- Formal consultative links with specialist vascular surgeons 24 hours

Workforce requirements

- Visiting vascular surgeons
- General surgeons credentialed to perform low complexity vascular surgical procedures with scope of practice determined by the relevant credentialing committee with advice where deemed necessary from a specialist vascular surgeon
- RNs with appropriate post graduate qualifications and/or experience; RNs may be supported by ENs in providing care
- On-site allied health professionals with knowledge and experience caring for patients who receive vascular surgery

Level 3 Vascular Surgery

Service description

A Level 3 service provides inpatient, ambulatory and outpatient consulting for vascular surgery. General surgeons may perform basic vascular surgical procedures.

Service requirements

As for Level 2 plus:

- Appropriate vascular surgical and anaesthetic equipment available on-site
- Routine, day case and short stay superficial venous procedures
- On-site high dependency or intensive care services available to stabilise vascular surgical patients with emergency vascular surgical needs prior to their transfer to a higher level Vascular Service
- Formal consultative links with specialist vascular surgeons 24 hours
- Specialist inpatient and outpatient consultations by visiting vascular surgeons
- Ability to receive back from a Level 5 Vascular Service with patients requiring low level rehabilitation

Workforce requirements

- General surgeons credentialed to perform vascular surgical procedures with scope of practice determined by the relevant credentialing committee with advice where deemed necessary from a specialist vascular surgeon
- General surgeon available on-site; on-call 24 hours
- RNs with post graduate qualifications and/or experience in vascular nursing
- Specialist vascular sonographers

Level 4 Vascular Surgery

Service description

A Level 4 service provides elective vascular surgical procedures performed by appropriately credentialed general surgeons or by visiting vascular surgeons. Emergency vascular surgical services are provided within the scope of practise for on-site surgeons.
Service requirements

As for Level 3 plus:

- Routine vascular procedures
- Management of vascular trauma
- Surgical management of diabetic foot
- Elective renal access surgery performed by visiting vascular surgeons
- Hybrid operating theatre or appropriate angiography suite

Workforce requirements

As for Level 3 plus:

- Anaesthetists with appropriate vascular surgical anaesthetic experience and/or qualifications as determined by the credentialing process

Level 5 Vascular Surgery

Service description

A Level 5 service provides services at Level 4 plus it performs minor, moderate and major complexity elective vascular surgical procedures on low, moderate and high risk patients by vascular surgeons credentialed to perform vascular and endovascular surgical procedures. Emergency procedures are performed by vascular surgeons.

Service requirements

As for Level 4 plus

- Complicated open vascular surgery
- Highly complex endovascular procedures
- Statewide provision of emergency vascular surgery services
- Outreach elective renal access surgery performed at lower level vascular sites in the network
- Management of complex vascular trauma
- Surgical management of complex diabetic foot
- Link with Level 5 Rehabilitation Service
- Multidisciplinary meeting with associated specialties e.g. medical imaging, renal medicine, stroke medicine
- Hybrid operating theatre or appropriate angiography suite
Workforce requirements

As for Level 4 plus:

- Appointed vascular surgeons on-site; and on-call 24 hours
- Accredited vascular surgery trainee
- Specialist vascular sonographers
- RNs with appropriate postgraduate qualifications and/or perioperative experience in vascular surgery
- CNC specialising in and providing leadership in vascular surgical nursing
- Specialist vascular surgery nurses in the operating theatres and outpatient clinics

Community Health Services

Community health services are services that are delivered in the community and provided in a variety of settings, including peoples' homes and established health facilities. In Tasmania, community health centres can be distinguished from rural hospitals and multi-purpose centres and services as they do not offer inpatient services. The current Tasmania Health Service (THS) – community health centre sites are listed at Appendix 3.

Community health services work in partnership at each point of the health care continuum comprising of:

- **Health promotion, prevention and early intervention**– partners include public health, local government, schools, other state government departments, non-government organisations, pharmacists, GPs, workplaces, community groups and in some instances the private sector

- **Assessment and investigation** - partners include GPs, community health centres, integrated care centres, other state government departments, Aged Care Assessment Teams (ACAT) and non-government organisations

- **Community treatment** - partners include GPs and hospitals, other state government departments, Human Services, pharmacists, private allied health providers, non-government health service providers, and Australian Government funded services such as Commonwealth Home Support Program (CHSP) and Home Care Packages.

- **Continuing care** - partners include GPs, hospitals, other state government departments, Human Services, pharmacists, non-government organisations, aged care providers and Australian Government funded services such as Commonwealth Home Support Program (CHSP) and Home Care Packages. Various models of care may support the provision of specialist community health services across a range of settings to meet population and patient need.

Community health service provision is also impacted by a number of current national health reforms including the National Disability Insurance Scheme, Consumer Directed Care and Primary Health Networks – rural health care programs as well as outreach services for people living in remote, rural and some urban areas.

Accordingly, the levels have not been delineated for community health services within this iteration of the TRDF.

The next iteration of the TRDF will aim to describe and delineate more accurately the community health service level and demand based on available data analysis and aligning services with need and sustainability.

The range of community health services offered vary across Tasmania, depending on the needs of the local area, but may include the following:-

**Medical, Nursing and Allied Health Services**
- Community Nursing consisting of:
  - Generalist community nursing service
  - Specialist community nursing service
  - Acute and Community interface nursing service
  - Community Rapid Response Service (CommRRS)
- Alcohol and Drug Services
• Cancer Screening Services (Breast Screen mobile bus)
• Cardiology Services
• Child Health and Parenting Services
• Community Dementia Services
• Continence Services
• Diabetes Services
• Geriatrics Services
• Maternity Services
• Mental Health Services
• Ophthalmology Services
• Oral Health Services
• Palliative Care Services
• Respiratory Services
• Wound Care Services
• Youth Health Services
• Allied Health Services including:
  o Audiology
  o Occupational therapy
  o Physiotherapy
  o Podiatry
  o Psychiatry
  o Social work
  o Speech therapy

Support services
• Community Health based programs
• Counselling
• Day Centre services
• Home help and maintenance, and personal care
• Housing services
• Refugee Health
• Rehabilitation programs
• Transport
• Volunteer assistance
• Women’s and Men’s Health programs

Health promotion, prevention and early detection
• Health education and literacy
• Health promotion programs

Primary Health Services
In Australia, primary health care is typically the first contact an individual with a health concern has with the health system. Primary health care covers health care that is not related to a hospital visit, including

11 Note linkage between these support services and medical, nursing and allied health services
health promotion, prevention, early intervention, treatment of acute conditions, and management of chronic conditions.

Primary health care and services are delivered in settings such as general practices, community health centres, allied health practices, and via communication technologies such as telehealth and video consultations. Primary health services may be targeted to the general population but in some circumstances to particular age groups (such as aged persons or young people) and priority populations (such as Aboriginal and Torres Strait Islanders, socioeconomically disadvantaged communities, and migrant and refugee communities).

Other primary health services are provided for specific health conditions (such as dementia, palliative care, mental health or people with chronic diseases). In Tasmania, primary health services are based and delivered from sites that are generally targeted to meet the needs of the surrounding community and local government area.

The Tasmanian public health system only has responsibility for part of the primary health sector, and relies on effective collaboration and commissioning with general practice and private providers to provide a continuum of care for primary health services. For this reason, the 2018 Tasmanian Role Delineation Framework and Clinical Service Profile have only been expanded to publically funded rural hospital inpatient facilities.

**Primary Health Tasmania (PHT)**

On 1 July 2015, the Australian Government established Primary Health Networks (PHNs) as part of its reform of the primary health care system. Primary Health Tasmania (PHT) is one of the organisations established around Australia as part of the Primary Health Networks Programme.

Primary Health Tasmania is a non-government, not-for-profit organisation working to connect care and keep Tasmanians well and out of hospital. It is also responsible for improving the efficiency, effectiveness and coordination of primary care.

PHT manages a range of programs and services based on national priorities set by the Australian Government in areas including Aboriginal health, after hours care, aged care, coordinating and streamlining care, chronic conditions, eHealth, mental health, immunisation, refugee health, rural health and the social determinants of health, as well as supporting general practice to help ensure streamlined care for people moving through the health, aged care and social care systems.

The development of the Tasmanian Health Pathways (THP) is a dynamic collaboration between PHT, THS and DoH. The pathways program gives health professionals access to a single website that provides information on how to assess and manage a wide range of health conditions, and how to refer patients to local specialists and services in the most timely and efficient way.

THPs enable GPs and other health professionals to better help patients by outlining:

- the best available management and treatment options for common medical conditions
- information on how to refer to the most appropriate local services and specialists
- educational resources and information for patients and clinicians

Ongoing collaboration and co-commissioning between the DoH, THS and PHT and other primary health stakeholders is critical to improve service coordination and long term health outcomes particularly for Tasmanian’s living in rural and remote communities.
Appendices

Appendix 1 - Relationship between TRDF and CSP and the Statement of Purchaser Intent and Service Agreement

Appendix 2 – List of Community Health Centres

Appendix 3 – Glossary of terminology

Appendix 4 – Acronyms and abbreviations
Appendix 1 – Relationship between TRDF and CSP and the Statement of Purchaser Intent and Service Plan

Statement of Purchaser Intent

The Statement of Purchaser Intent (SoPI) is an iterative annual (rolling) document, signalling the Department’s intentions (as Purchaser) for the coming financial year. The SoPI articulates in detail, the health priorities of the Department for Tasmania at a strategic policy direction level, and provides direction for the transactional activity of purchasing as articulated via the Service Plan.

The TRDF is a complementary planning and policy document to the SoPI that describes the service capability requirements for varying degrees of acuity for each clinical service and clinical support services across the state.

Used together, the SoPI and TRDF/CSP will provide the evidence base and support the health system to:

- ensure that strategic government directions are actively and appropriately supported in the context of broader health priorities;
- guide funding and purchasing decisions;
- deliver safe, high quality services to improve, promote, protect and maintain the health of Tasmanians;
- deliver a re-balanced end to end service delivery across the full continuum of care, and support the development of service plans and models of care; and
- prioritise directions for appropriate service capability development and system capacity.

Service Plan

The Department, as System Manager, produces the annual Service Plan between the Department of Health and the THS in accordance with the Tasmanian Health Service Reform Act 2018 (the Act). This Plan is a legislated agreement that progresses One Health System White Paper reforms and the delivery of health services including the TRDF via the CSP, as well as safety, quality and cost efficiency.

The Secretary, Department of Health and Tasmanian Health Service (THS) Executive agree to work in collaboration to achieve the common goal of the establishment of a public sector health system that delivers safe, high quality health services and health support services so as to improve, promote, protect and maintain the health of Tasmanians.

## Appendix 3 - Glossary of terminology

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>24 hour/s</td>
<td>Unless otherwise stated, refers to 24 hours a day, 7 days a week.</td>
</tr>
<tr>
<td>Acute Care</td>
<td>Acute care is usually provided in hospitals or day clinics by specialised personnel, often using complex and sophisticated technical equipment and specialised consumables. Unlike chronic care, acute care is often necessary only for a short time.</td>
</tr>
<tr>
<td>Allied Health</td>
<td>Allied Health is a term used to describe the broad range of health professionals who are not doctors, dentists or nurses.</td>
</tr>
<tr>
<td>Ambulatory Care</td>
<td>Care provided to hospital patients who may not undergo a formal admission process, such as patients of emergency departments and outpatient clinics. Can also refer to care provided to hospital patients in non-hospital settings such as a residential aged care facility, school or workplace, through initiatives such as Hospital in the Home (HITH).</td>
</tr>
<tr>
<td>Analgesia</td>
<td>Medication that acts to relieve pain.</td>
</tr>
</tbody>
</table>
| Chronic disease                     | A diverse group of diseases (such as cardiovascular disease, diabetes and arthritis) which tend to be long-lasting and persistent in their symptoms or development and are generally not cured completely. Chronic diseases are mostly characterised by:  
  - complex causality  
  - long latency periods  
  - multiple risk factors  
  - a prolonged course of illness  
  - functional impairment or disability |
| Dysbaric Illness                    | A term that covers a broad range of complex pathophysiological conditions associated with decompression.                                     |
| GX category of pathology laboratory | A Category GX laboratory comprises of a laboratory, or a number of co-located laboratories, performing services in 1 or more groups of pathology:  
  (a) under the direction, control and full-time supervision of a supervising pathologist or senior scientist who is expert in the group, or groups, concerned; and  
  (b) at which the number of working pathologists (whether full-time or part-time) is equivalent to more than 2 full-time pathologists. |
| GY category of pathology laboratory | A Category GY laboratory comprises of a laboratory, or a number of co-located laboratories, performing services in 1 or more groups of pathology: (a) under the direction, control and full-time supervision of a supervising pathologist or senior scientist who is expert in the group, or groups, concerned; and (b) at which the number of working pathologists (whether full-time or part-time) is equivalent to not more than 2 full-time pathologists. |
| **Hybrid Operating Room** | A surgical theatre that is equipped with advanced medical imaging devices such as fixed C-Arms, CT scanners or MRI scanners. These imaging devices enable minimally-invasive surgery, which is less traumatic for the patient. |
| **Interdisciplinary team** | A group of health care professionals from different clinical specialties who work in a coordinated fashion toward a common goal for the patient (e.g. palliative care, pain management). |
| **Interprofessional** | A collaborative practice which occurs when healthcare providers work with people from within their own profession, with people outside their profession and with patients and their families. |
| **Minimal Sedation** | A drug-induced state during which patients respond normally to verbal commands. Although cognitive function and physical coordination may be impaired, airway reflexes, and ventilatory and cardiovascular functions are unaffected. |
| **Multidisciplinary team** | Team with different professional disciplines (e.g. nursing, medical, allied health) who coordinate the contributions of each profession, which are not considered to overlap, in order to improve patient care. |
| **Networked services** | Two or more interconnected health services and/or clinicians that ensure continuity of patient care, especially for smaller or more remote services. This may include the use of technology such as telehealth. Some service levels require that a formal network is established and these are generally negotiated locally, between health services, or with non-government or private sector agencies. Some networking arrangements are governed by policy. Networking arrangements should be documented and regularly reviewed by all participants. The following should be agreed and documented for each site: |
| | • Criteria for patient transfer and back transfer |
| | • Processes for patient referral and transfer, including clinical review requirements |
| | • Defined communication pathways |
| | • Safety and quality indicators for the agreed documented process. |
| **On-call** | Staff, services and/or resources located off-site but available to be called in if needed. |
| **Outpatient care/service** | Clinical services provided to non-admitted patients. |
| **Outreach/Inreach** | Provision of mobile clinical services to patients external to the originating health facility/service. |
| **Pastoral care** | Pastoral care provide support and affirmation through a difficult period, offer to explore the ultimate meaning and value of life as it is experienced by being in hospital. |
| **Point of care testing (POCT)** | Is the testing of a sample from a patient, performed in the surgery/clinic, at or near the time of consultation, in order to facilitate a prompt clinical decision regarding patient management. |
| **Telehealth** | Transmission of images and/or voice and/or data between two or more health units via telecommunication channels (including phone, mobile or V/C) to provide clinical advice, consultation, education and training services. Telehealth has become an important means of networking but remains in a state of development as new uses and systems are implemented. A properly developed telehealth system within a network may enable a hospital to have a support service where there is equivalent functional access to that service and where patient care is not compromised by that service being off-site. |

### Workforce definitions

| **ACCESS Nurse** | An ACCESS nurse provides “on-the-floor” Australian College of Critical Care Nurses (ACCCN) ICU Staffing Position Statement (2003) on Intensive Care Nursing Staffing Assistance, Coordination, Contingency (for a late admission on the shift, or staff sick mid-shift), Education (of junior staff, relatives, and others), Supervision and Support. |
| **Anaesthetic Technician** | An allied healthcare worker who assists with the administration and monitoring of anaesthesia and has an extensive knowledge of anaesthesia techniques, instruments, supplies, and technology. |
| **Clinical Nurse Educator** | A Clinical Nurse Educator (CNE) holds a minimum of a bachelor’s degree in nursing and also has completed a nurse educator training program. They educate and train aspiring nurses or newly graduated nurses. |
| **Clinical Nurse Specialist** | A Clinical Nurse Specialist (CNS) is a registered nurse who is recognised as a senior member of staff across all areas of practice but particularly in acute care. |
| **Enrolled Nurse** | An enrolled nurse is a division 2 nurse who is registered with the Australian Health Practitioner Regulation Agency-Nursing and Midwifery Board of Australia. The EN completes a 2 year or equivalent Diploma of nursing within the vocational education training (VET) sector. They include general enrolled nurses and specialist enrolled nurses (for example, mothercraft nurses in some states) who provide basic medical care under the supervision of more senior nurses. |
| **General Physician** | Medical practitioner who has the postgraduate qualification of Fellowship of the Royal Australasian College of Physicians (FRACP) or equivalent; and actively practises general medicine. |
| **General Practitioner (GP)** | Medical practitioner who has postgraduate qualifications in general practice and who may have specialist registration as a general practitioner. |
**Plaster Technician**
Plaster technicians (sometimes called orthopaedic technicians or orthopaedic technologists) work with orthopaedic surgeons in caring for patients with injured joints and bones. Principally, orthopaedic technicians are responsible for applying casts, splints and braces.

**Resident Medical Officer (RMO)**
A Resident Medical Officer (RMO) is a Medical Officer who has obtained full registration and who has completed the equivalent of at least one year of full time clinical experience. In general, most doctors spend two to three years practicing as a Resident Medical Officer (RMO) or Hospital Medical Officer (HMO) in a hospital before commencing specialist training.

**Registered Medical Practitioner (RMP)**
Doctor practising medicine who is registered with the Medical Board of Australia. Relevant registration categories include specialist, general, provisional, and limited registration.

Medical practitioners work in a range of different roles, including as general practitioners, clinicians, administrators, teachers/educators and researchers.

**Registered Nurse (RN)**
A Registered Nurse (RN) is a graduate nurse who has passed a state board examination and been registered and licensed to practice nursing and provides a high level of day-to-day care and performs some minor procedures. The RN completes 3 years or equivalent of tertiary study in a Bachelor of Nursing.

## Revision History

<table>
<thead>
<tr>
<th>Version</th>
<th>Approved By Name</th>
<th>Approved By Title</th>
<th>Amendment Notes</th>
</tr>
</thead>
</table>
| V4.0 – approved 28 August 2018 | Michael Pervan | Secretary, DoH   | • Extension of TRDF/CSP to include rural inpatient facilities  
• Amendments to higher acuity levels to ensure consistency |
| V3.0 – approved 31 October 2016 | Michael Pervan | Secretary, DHHS  | • Consolidation of TRDF/CSP.  
• Typographical and insubstantial amendments (low risk) to the TRDF/CSP. |
| V2.0 – approved 11 November 2015 | Michael Pervan | Secretary, DHHS  | • Current Gynaecology Level 4 service profile revised and updated to ensure consistency with the White Paper and minor changes to the service description.  
• Pharmacy Services profile revised and updated at the North West Regional Hospital (NWRH) from Level 3 to Level 4 service which meets all of the requirements of a Level 4 Pharmacy service.  
• Rescind Renal Services framework and update with Nephrology Services framework. In the new Nephrology service framework, there is no level 2 service profile therefore Mersey Community Hospital service profile changed from Level 2 service to “no level”. |
