

# COVID-19 CASE AND OUTBREAK MANAGEMENT – KEY ACTIVITIES FOR PRIORITY SETTINGS

I

## PREVENT AND PREPARE READINESS

### PREVENTION

Maintain and implement your COVID-19 Safety Plan

### PLAN FOR CASES

Develop, review and update your Outbreak Management Plan, including details of your internal outbreak response team

Establish systems to rapidly identify possible COVID-19 infections

Identify and maintain records to support contact tracing and risk assessment by Public Health Services

Prepare a communication plan and update contact information

Consider how you will continue to provide essential services and maintain adequate staffing during an outbreak

### INFECTION CONTROL PREPAREDNESS

Maintain adequate supplies of personal protective equipment, hand hygiene and cleaning products and outbreak signage

Educate and train staff

Plan how cases and close contacts will be managed (including isolation and quarantine of residents)

Plan for enhanced infection prevention and control activities during an outbreak
